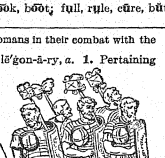
le'gion, n. 1. A Roman military body varying in numbers at different periods. Under the republic it consisted of 4,500 men—1,200 *hastati* (spearmen), 1,200 *principes* (the main strength), 1,200 *triarii* (skirmishers), and 300 *velites* or *pilarii* (veteran reserve), and 300 *equites* (cavalry). In the time of Marius the legion consisted of 10 cohorts of infantry, each of 3 maniples, commanded by a centurion, or about 6,000 men, besides cavalry. See COHORT, MANIPLE, and PHALANX.



The staff of the *legion* consisted of six tribunes who managed the paying, quartering, provisioning, etc., of the troops, and commanded the *legion* in turns for a period each of two months. [In war, a legatus, or lieutenant-general, was appointed as permanent commandant of the *legion*. *Encyclopædia Britannica* 9th ed.]

Leib'nitz, 1 laip'nits; 2 lip'nits, **Gottfried Wilhelm, Baron von** (1ı/a1646–1ı/1716), a German scholar, mathematician, philosopher; invented differential calculus; a friendly rival of Newton; author of many profound philosophical works; was a Fellow of the Royal Society, London. **Leib'nitz-Leibnitz's series** (*Math.*), a formula expressing the derivative of a product to any desired degree.

Leib-nitz'i-an, 1 laib-nits'i-ən; 2 lib-nits'i-an, *a.* & *n.* Of or pertaining to the German philosopher and mathematician Leibnitz. *n.* A follower of Leibnitz.

Leib-nitz'i-an-ism, *n.* The philosophical system of von Leibnitz developed in opposition to the claim of Locke that nothing exists in the mind that was not first in the origin in the senses. To this claim Leibnitz answered in his *Nouveaux Essais* with the dictum *nihil nisi intellectus ipse* (nothing except the intellect itself), maintaining that the very constitution of the faculty of thought determines the nature of human knowledge. This doctrine of knowledge by apperception, instead of knowledge derived solely from sense-perception, was developed by Kant in his *Critique of Pure Reason*, as a so-called transcendental logic. The metaphysical tenets, or theory of reality, of the system of Leibnitz were chiefly set forth in his doctrine of the monads. This doctrine aims to explain the world as the resultant, so to say, of different orders of self-active beings, each of which, in greater or less degree, possesses the power of reflecting in itself, or mirroring the rest of the universe. Above the physical elements with their chemical affinities and the plants and animals with their irresistible or sentient life, rise the monads who have obtained the power of thought and are human souls. The latter form a sort of "Society with God," and are "members of the City of God." The name Leibnitz is also connected with a mathematical and impersonal kind of optimism, which maintained by an a priori argument that this is the best possible world; and also with the doctrine of preestablished harmony governing the relations of body and mind. Among mathematicians the name of Leibnitz is famous as the inventor of the form of infinitesimal calculus now most commonly used. See MONAD and MONADOLOGY. — **Leibnitzo-Wollian system,** Leibnitzianism as developed and systematized by Christian Wolf (1679–1754).

Also called **lepidomelane**. In the monoclinic pseudo-hexagonal system.—**lep'i-do-mor'phite**, *n.* A scaly mica resulting from the alteration of feldspar.—**Lep'i-don'ta**, *n. pl.* [NL.] The primeval fossil genus of interlorous trees in which the transversely rhomboidal areolæ, or bolsters, bear at the lower angle the leaf-scars, marked with three vascular scars or pauplins.—**Lep'i-don'ti-dæ**, *n.* The scales of the fruiting cones of *Lepidodendron*, formerly referred to a distinct genus.—**lep'i-do-phyl'lous**, *a.*—**lep'i-do-phyte**, *n.* *Paleobot.* A Paleozoic fossil fern.—**lep'i-do-pho'ra**, *n. pl.* [NL.] Same as **Lep'i-dop'te-ra**, *n. pl.* [NL., < Gr. *lepis*, scale, + *pteron*, wing.] The great order of insects characterized by the presence of four membranous wings more or less completely covered with minute scales, usually arranged in regular rows, and having the mouth parts developed chiefly as a coiled sucking tube, or proboscis, formed of the greatly elongated maxillæ. (See *Lepidoptera*, below.) The wings are usually of large size, and the body is commonly slender. The metamorphosis is complete, the larva being a caterpillar, and the pupa usually inclosed in a cocoon. The order is divided into the *Rhopalocera*, or butterflies, and the *Heterocera*, or moths. The former have the antennæ terminated by a knob, and fly by day; the latter have the antennæ various, and fly by night. The larvæ of the former are smooth, and pupate naked; those of the latter are usually hairy, and pupate in cocoons. See cuts under *Lepidoptera*, *Papilio*, and *Sphinx*.—**lep'i-dop'ter-al**, *a.* Pertaining to the *Lepidoptera*.—**lep'i-dop'ter-an**, *a.* & *n.* Same as **lepidopteral**.—**lep'i-dop'ter-id**, *n.* & *a.* Same as **lepidopteran**.—**lep'i-dop'ter-ist**, *n.* One who makes a study of *Lepidoptera*.—**lep'i-dop'ter-ol'o-gy**, *n.* That branch of entomology that treats of the *Lepidoptera*.—**lep'i-dop'ter-o-log'i-cal**, *a.*—**lep'i-dop'ter-ol'o-gist**, *n.*—**lep'i-dop'terous**, *a.* Scaly-winged; of or pertaining to the *Lepidoptera*.

Lep'i-do-sau'ri-a, *n. pl.* *Herp.* The *Squamata*.—**lep'i-do-sau'ri-an**, *a.* & *n.*—**Lep'i-do-si'ren**, *n.* *Ich.* **1.** A genus typical of *Lepidosirenidæ*. **2.** [l-] An eel-like lungfish of this or a related genus, as the South-American *Lepidosiren paradoxa* or the African *Protopterus annectens*.—**Lep'i-do-si-ren'i-dæ**, *n. pl.* *Ich.* A family of dipnoans, especially those having a long body, single lateral molars with vertical cuspidate ridges, a pair of conical vomerine teeth, and limbs developed chiefly as tapering rods.—**lep'i-do-si'ren-id**, *n.*—**lep'i-do-si'ren-oid**, *a.* & *n.*—**lep'i-do'sis**, *n.* *Pathol.* Branny tetter: a mild form of skin-disease characterized by shedding dry bran-like scales as dandruff. **lep'i-do-spon'gia**, *n.* *Bot.* A genus of Old World tropical sedges distinguished by distinctive scales.—**lep'i-do-ste'i-dæ**, *n. pl.* *Ich.* **1.** A family of rhomboganoids

Lepidoptera.

1. Wings of a butterfly, showing typical venation: 1, Fore wing. 2. Hind wing. *a*, costal vein; *b*, subcostal vein; b^1, b^2, b^3, subcostal veinlets; *c*, independent vein; *d*, median vein; d^1, d^2, d^3, median veinlets; *e*, submedian vein; *h*, intermedian veinlet; s^1, s^2, s^3, upper, middle, and lower discal veinlets. 2. Ideal wing, showing marking: *a*, articulate fascia, or band; *b*, macular band; *c*, *d*, semimacular bands; *e*, exsuperfascious band; *f*, diminlate band; *g*, abbreviate band; *h*, pyramidate band; *i*, supercilium; *k*, hastate pupil; *l*, compound eyelet, or ocellus; *m*, minimal eyelet; *n*, simple eyelet; *o*, annulet; *p*, lepidilate eyelet; *r*, double eyelet; *s*, caudate wing; *t*, pupil; *u*, iris; *v*, atmosphere. 3. Head: *a*, mental mark; *b*, antennæ; *c*, eye; *l*, labrum; *m*, mandible; *mp*, maxillary palpi; *lp*, labial palpi; *h*, haustellum (maxillæ). 4. Outlines of various scales: *a*, *b*, of *Sphinx ligustri*; *c*, of *Morpho menelaus*; *f*, *g*, of *Papilio machaon*.

having rhombic scales, fulcrate fins, dorsal and anal posterior and opposite, and bill-like jaws with pointed teeth; garpikes; bony pikes. **Lep'i-dos-te'us-i-dæ**, *n. pl.* **Lep'i-so-ste'i-dæ**. **2.** The *Rhombiganoidea*. **Lep'i-dos'te-us**, *n.* (t. g.)—**lep'i-dos'te-id**, *n.*—**lep'i-dos'te-oid**, *a.* & *n.*—**Lep'i-do-ste'ri-dæ**, *n. pl.* *Herp.* [< LEPIDOSTEUS.] Same as **Lep'i-do-ster'noid**, *a.* & *n.*—**lep'i-do-stra'bus**, *n.* A trematoid worm of the genus *Lepidocadron*.—**lep'i-dot'ed**, *a.* *Bot.* Scurfy with minute scales. **lep'i-dot'ic**.

Lep'i-du'rus, 1 lep'i-dū'rus; 2 lep'i-dū'rus, *n.* *Zool.* A genus of leaf-tooted crustaceans of the family *Apodidæ*, occurring chiefly in the pools of the western United States. In appearance they suggest miniature horseshoe-crabs, with a paddle-shaped outgrowth terminating the body. [< LEPIDO- + GR. *oura*, tail.]

Lep'i-dus, 1 lep'i-dus; 2 lēp'i-dŭs, **Marcus Æmilius** (—A. D. 13). A Roman consul; pontifex maximus; triumvir with Antony and Octavius (Augustus); introduced in Shakespeare's *Julius Cæsar* and *Antony and Cleopatra*.

Le-pil'o-ta, 1 le-pil'o-tə; 2 le-pil'o-ta, *n.* *Bot.* A genus of white-spored agarics of wide geographic distribution. They are characterized by a scaly pileus, lamellæ free from the stem, and an annulus persistent. *L. procera* and *L. rhacodes* are edible. [< LEPIS + GR. *ous* (*ōt-*), ear.]

le'pis, 1 lē'pis; 2 lē'pis, *n.* [LEP'I-DES, 1 lep'i-dīz; 2 lēp'i-dēz, *pl.*] A scale. [L., < Gr. *lepis*, scale, < *lepō*, peel.]

Lep-pis'ma, 1 lē-pis'mə; 3 le-pis'ma, *n.* *Entom.* **1.** A genus typical of *Lepismidæ*. **2.** [l-] An insect of this genus; a bristletail or silverfish. [< Gr. *lepisma*, scale.] [< Gr. *lepisma*, peel, < *lepis*; see LEPIS.] **—le-pis'ma-tid**, *a.*

le-pis'mid†, **le-pis'mi-dæ**, 1 lē-pis'mi-dē; 2 le-pis'mi-dē, *n. pl.* *Entom.* A family of thysanurous insects having filamentous caudal stylets, slender many-jointed antennæ, and subequilateral or posterior body covered with shiny scales; bristletails or silverfish. [< Gr. *lepisma*, scale, + -ID².] **Lep'is-mat'i-dæ**.—**le-pis'mid**, *a.* & *n.*—**le-pis'moid**, *a.*

lep'o-cyte, 1 lep'o-sīt; 2 lēp'o-cyt, *n.* *Biol.* A cell or unicellular organism with a cell-wall. [< Gr. *lepos*, husk (< *lepō*, peel), + CYTE.] **le-poc'y-ta†**.

lep'o-lite, 1 lep'o-līt; 2 lēp'o-lit, *n.* *Mineral.* Same as ANORTHITE. [< Gr. *lepos*, scale, + -LITE.]

Lepon'ti-i, 1 le-pon'ti-ī; 2 le-pŏn'shi-ī, *n. pl.* [L.] An ancient Alpine people.

Le'po-re'lo, 1 lē'po-re'lō; 2 lē'po-rē'lo, *n.* In Mozart's *Don Giovanni*, the don's humorous valet.

Le-por'i-dæ, 1 le-por'i-dē; 2 le-pōr'i-dē, *n. pl.* *Mam.* A family of duplicidentate rodents, especially those with 28 teeth and conformation of rabbits and hares. [< LEPUS, + -ID².] —**lep'o-rid**, *n.*—**lep'o-roid**, *a.* & *n.*

lep'o-ride, 1 lep'o-rīd; 2 lēp'o-rid, *n.* A hybrid between the common European rabbit and the hare, or an animal supposed to be such. < L. *lepus*, hare, + -IDE.]

lep'o-ri-form, 1 lep'o-ri-fôrm; 2 lēp'o-ri-form, *a.* Hare-like; rabbit-like. [< L. *lepus* (*lepor-*), hare, + -FORM.]

lep'o-rine, 1 lep'o-rīn *or* -rin; 2 lēp'o-rin *or* -rīn. **I.** *a.* 1. **lep'o-rin²**, } Hare-like. **2.** Of or pertaining to the *Leporidæ*. **II.** *n.* One of the *Leporidæ*. [< L. *leporinus*, < *lepus* (*lepor-*), hare.]

Lep'o-spon'dy-li, 1 lep'o-spon'di-lī; 2 lēp'o-spŏn'dy-li, *n. pl.* *Paleon.* A group of fossil lepospondylous batrachians, which includes certain salamanders and the gymnophionans *Ichthyodea*. [< Gr. *lepos*, scale, + *spondylos*, vertebra.]—**lep'o-spon'dy-lous**, *a.* *Paleon.* Possessing or relating to vertebræ enclosing the notochord, that are constricted cylinders not unlike hour-glasses in shape, as in certain fossil batrachians.

lep'o-thrix, 1 lep'o-thriks; 2 lēp'o-thriks, *n.* *Pathol.* A microbic affection of the hair of the axilla and scrotum, causing its cuticular sheath to scale off.

lep'ra, 1 lep'rə; 2 lēp'ra, *n.* *Pathol.* Same as LEPROSY. **2.** A white nearly subcutaneous on the surface of some plants. [L.: see LEPER.]

le-pra'li-a, 1 lē-prā'li-ə; 2 le-prā'li-a, *n.* An escharoid polyzoan (genus *Lepralia*) with a crustaceous zoarium spreading from the center in a subcircular form. [< Gr. *lepros*, scaly, < *lepō*, peel.] **—le-pra'li-an**, *a.*

le-pra'ri-a, 1 lē-prā'ri-ə; 2 le-prā'ri-a, *n.* **1.** A morbid condition of some lichens, in which the crust becomes a dusty mass mixed sometimes with a few threads, as seen in the yellow powdery and white patches common on the oak. **2.** [L.] A former supposed genus of lichens, embracing those

exhibiting this condition. [< Gr. *lepra*; see LEPER.] — **le-pra'ri-oid,** *a. Bot.* Of, pertaining to, or resembling lichens affected with lepraria.

lep're-chawn, } 1 lep'rɪ-kēn; 2 lĕp're-çạn, *n. Ir. Folk-lore.* A
lep're-cawn, } fairy or dwarf supposed to know the secret of wealth, which he must reveal if captured.

The Cluricaune, sometimes called the *Lepricaune*, is the shoemaker of the Irish fairies. He is about as tall as a span, . . . and gives leg-bail with great celerity if not captured at once.
R. S. MACKENZIE *Sir Walter Scott* p. 371. [O. & CO. 1871.]

lep'ric, 1 lep'rɪk; 2 lĕp'ric, *a.* Of or pertaining to leprosy.

lep'ro-lin, 1 lep'ro-lin; 2 lĕp'ro-lin, *n.* An antileprous serum prepared from cultures of the leprosy bacillus. [< LEPRA + -OL.] **lep'ro-line‡.**

lep-rol'o-gy, 1 lep-rel'o-jɪ; 2 lĕp-rŏl'o-ġy, *n.* The branch of medical science that pertains to the treatment of leprosy. [< Gr. *lepra*, leper, + -LOGY.] — **lep-rol'o-gist,** *n.*

lep-ro'ma, 1 lep-rō'mə; 2 lĕp-rō'ma, *n.* [-MA-TA, *pl.*] *Pathol.* **1.** A tubercle of leprosy. **2.** A tumor of a leprous character. [< LEPRA.] — **lep-ro'ma-tous,** *a.*

lep'rose, 1 lep'rōs; 2 lĕp'rōs, *a. Bot.* Having a scurfy appearance; covered with thin scales; scale-like; leprous.

lep'ro-ser-y, 1 lep'ro-ser-ɪ; 2 lĕp'ro-sĕr-y, *n.* [-IES, 1 -ɪz; 2 -iş, *pl.*] *Med.* A hospital for lepers. [< F. *léprosarie*, < LL. *leprosaria*, < *leprosus*; see LEPROUS.] **lep"ro-sa'ri-um‡.** [leprosy; leprous.

lep'ro-sied, 1 lep'ro-sɪd; 2 lĕp'ro-sid, *a.* Affected with

lep-ros'i-ty, 1 lep-res'ɪ-tɪ; 2 lĕp-rŏs'i-ty, *n.* **1.** The condition of being leprous. **2.** A scale. **3†.** Scaliness. [< LL. *leprosita(t-)s*, < *leprosus*; see LEPROUS.]

lep'ro-sy, 1 lep'ro-sɪ; 2 lĕp'ro-sy, *n.* **1.** *Pathol.* A chronic disease of the skin and nerves, caused by the *Bacillus lepræ* and characterized by ulcerous eruptions and successive desquamations of dead skin. The leprosy of the ancients included various forms of skin-disease. It is infectious, but its contagiousness is quite feeble. The drug most frequently used in its treatment is chaulmoogra-oil, but no specific cure has been discovered. During the middle ages it was a widespread disease, and in the 13th century there were over 19,000 leper colonies in Europe. It has been asserted that the disease is again on the increase. See plate of BACTERIA.

Leprosy was indeed nothing short of a living death, a poisoning of the springs, a corrupting of all of the humors of life, a dissolution little by little of the whole body.
TRENCH *On the Miracles* p. 176. [A. 1853.]

2. [Rare.] A leper-house. **3.** Figuratively, any defilement or disease in the moral order; as, idleness is a moral *leprosy*. [< OF. *leprosie*, < Gr. *leprōsis*, < *lepra*; see LEPER.] — **anesthetic leprosy,** a common kind of tropical leprosy, caused by the invasion of the nerves by the bacilli, thus causing peripheral neuritis, and subsequent loss of sensation in areas of the skin and underlying tissues. There is an eruption of reddish or purplish spots preceded by itching and numbness; in time blisters form and break, the muscles of the hand become atrophied, and the bones become necrotic, while often a hand or foot falls off.— **Italian l.,** pellagra.— **tubercular** or **nodular l.,** leprosy characterized by red areas that develop into nodules composed of tubercular granulation-tissue or diffuse infiltration of the cuticle, whence mutilation and distortion often result. The earliest symptom is an eruption of reddish patches, and in time an eruption occurs on the face, where the tumorous masses and horizontal furrows cause an appearance that has been likened to the face of a lion. See LEONTIASIS.

lep'rous, 1 lep'rʊs; 2 lĕp'rŭs, *a. Pathol.* **1.** Relating to, affected with, or resembling leprosy; unclean; foul. **2.** Scale-like; covered with scales. **3†.** Causing leprosy. [OF., < LL. *leprosus*, < L. *lepra*; see LEPER.] — **lep'rous-ly,** *adv.*— **lep'rous-ness,** *n.*

-lepsia, } *suffixes.* Derived from the Greek suffix *-lepsia*:
-lepsy, } used in pathology to denote a seizure, as in cata*lepsy*. [< Gr. *lambanō*, seize.]

Lep'si-us, 1 lep'sɪ-us; 2 lĕp'si-us, **Karl Richard** (12/23 1810–7/10 1884). A German philologist and Egyptologist; head of the antiquarian expedition, to Egypt, 1840 to 1845; published a *Standard Alphabet* (1855), for reducing unwritten languages and foreign graphic systems to a uniform orthography in European letters.

lept-. See LEPTO-.

lep'ta, 1 lep'tə; 2 lĕp'ta, *n.* Plural of LEPTON.

Lep-tam'ni-um, 1 lep-tam'nɪ-um; 2 lĕp-tăm'ni-ŭm, *n. Bot.* A genus of leafless purple or yellow branching herbs of the family *Orobanchaceæ*, natives of North America, parasitic on beech-tree roots. *L. virginianum*, the beechdrops, is the only species. [< LEPT- + Gr. *amnion*, bowl.]

lep-tan'dra, 1 lep-tan'drə; 2 lĕp-tăn'dra, *n.* The rootstock and rootlets of *Leptandra virginica*, or Culver's physic. [< LEPT- + Gr. *anēr* (*andr-*), man, male.]

lep-tan'drin, 1 lep-tan'drɪn; 2 lĕp-tăn'drin, *n.* A bitter crystalline glucosid contained in the root of *Leptandra virginica*, and regarded as containing the medicinal qualities of the drug leptandra. **lep-tan'drine‡.**

Lep'ti-dæ[1], 1 lep'tɪ-dī; 2 lĕp'ti-dē, *n. pl. Entom.* A family of brachycerous dipterous insects with three basal cells much prolonged and third antennal joints simple. **Lep'tis,** *n.* (t. g.) [< Gr. *leptos*; see LEPTO-.] — **lep'tid,** *a.* & *n.*— **lep'toid,** *a.*

Lep'ti-dæ[2], *n. pl. Arach.* A family of arachnids, based on immature forms of harvest-mites. [< LEPTUS.]

lep'ti-form, 1 lep'tɪ-fērm; 2 lĕp'ti-fôrm, *a.* Having a leptus-like form; vermiform. [< LEPTUS + -FORM.]

Lep'ti-lon, 1 lep'tɪ-lon; 2 lĕp'ti-lŏn, *n. Bot.* A genus of asteraceous herbs of the north temperate zone, distinguished from *Erigeron* by the shorter rays and smaller heads, as in *L. canadensis*, the horseweed. [< LEPT-.]

Lep'ti-nes, 1 lep'tɪ-nīz; 2 lĕp'ti-nēş, *n.* **1.** (–383 B. C.) A Syracusan admiral who fell in battle near Cronium. **2.** An Athenian orator, attacked by Demosthenes, 355 B. C. **3.** A Syracusan, tyrant of Apollonia, who was expelled by Timoleon.

Lep-tin'i-dæ, 1 lep-tin'ɪ-dī; 2 lĕp-tĭn'i-dē, *n. pl. Entom.* A family of minute clavicorn beetles having the dorsal segments partly membranous and ventral free, the mentum transverse and with extended hind angles, and palpi distant. **Lep-ti'nus,** *n.* (t. g.) [< Gr. *leptos*; see LEPTO-.] — **lep'ti-nid,** *a.* & *n.*— **lep'ti-noid,** *a.* [lep'tyn-ite‡.

lep'tin-ite, 1 lep'tɪn-ɑit; 2 lĕp'tin-īt, *n.* Same as GRANULITE.

lep-tin'o-lite, 1 lep-tin'o-lɑit; 2 lĕp-tĭn'o-līt, *n. Petrol.* A rock formed by contact action of granite on adjacent schists, typically in the French Pyrenees. [< Gr. *leptos*, small, + -LITE.]

Lep'tis, 1 lep'tɪs; 2 lĕp'tis, *n.* An ancient seaport city in N. Africa; founded by the Phenicians.

lep'to-, lept-, 1 lep'to-, lept-; 2 lĕp'to-, lĕpt-. From Gr. *leptos*, fine, small (< *lepō*, peel): combining forms, used in zoological and botanical terms.— **Lep"to-car'di-i,** *n. pl. Ich.* A class or other division of vertebrates with a persistent notochord, no distinct skull, brain, or heart, and a longitudinal mouth, as in lancelets. **Lep"to-car'di-a‡.**— **lep"to-car'di-an,** *a.*— **lep"to-cen'tric,** *a. Bot.* Relating to a concentric bundle.— **lep"to-ce-pha'li-a,** *n. Terat.* A form of monstrosity in which the head is abnormally small.— — **lep"to-ce-phal'ic,** *a.* Slender- or narrow-headed. **lep"to-ceph'a-lus‡.**— **Lep"to-ce-phal'i-dæ,** *n. pl. Ich.* **1.** A family of anguilloidean fishes, especially *Enchelycephali*, with enlarged preorbitals, about 8 stout branchiostegites, and uniserial incisorial teeth; conger-eels. **2.** A family based on the hyaline ribbon-like young of various eels, especially of congers.— **lep"to-ceph'a-lid,** *n.* One of the *Leptocephalidæ*.— **lep"to-ceph'a-loid,** *a.* & *n.* **lep"to-ceph'a-lan‡.**— **lep"to-ceph'a-lous,** *a.* **1.** *Craniol.* Having an abnormally small or narrow head. **2.** *Zool.* Leptocephaloid.— **Lep"to-ceph'a-lus,** *n. Ich.* **1.** A genus typical of *Leptocephalidæ*. **2.** The ribbon-shaped translucent young of various eels and other fishes.— **lep"to-ceph'a-ly,** *n.* Smallness and narrowness of the head.— **lep"to-cer'cal,** *a. Zool.* Having an acuminate tail, whip-like, as the stingaree. — **Lep"to-cer'i-dæ,** *n. pl. Entom.* A family of caddis-flies with very slender antennæ, hairy palpi, and pubescent narrowed wings, whose larvæ are aquatic and free and construct tubular cases. **Lep-toc'er-us,** *n.* (t. g.) — **lep-toc'er-id,** *a.* & *n.*— **lep-toc'er-oid,** *a.*— **lep"to-chlo'rite,** *n. Mineral.* A chlorite that is not distinctly crystallized, as are the orthochlorites.— **lep-toch'ro-a,** *n.* Fineness of the skin.— **lep'to-chrous,** *a.*— **lep"to-dac'tyl. I.** *a.* Having slender fingers or toes. **II.** *n.* A bird or other animal with slender toes. **lep"to-dac'tyle‡.**— **Lep"to-dac'ty-li,** *n. pl. Ornith.* A division of ornithichnites with narrow toe-impressions. — **lep"to-dac'ty-lous,** *a.* Leptodactyl.— **lep"to-der'matous,** *a.* Thin-skinned: applied to moss-theca.— **lep"to-der'mi-a,** *n.* Unusual delicacy of complexion and fineness of skin.— **lep"to-der'mic,** *a. Anat.* Relating to the thinness or fineness of the skin.— **lep"to-der'mous,** *a. Bot.* Thin-coated or thin-walled: said of soft, pliable moss-capsules. **lep"to-der'ma-tous‡.**— **Lep"to-dor'i-dæ,** *n. pl. Crust.* A family of gymnomerous cladoceres with the abdomen straight, terminal short claws, and six pairs of legs. **Lep-tod'o-ra,** *n.* (t. g.) — **lep-tod'o-rid,** *n.*— **lep-tod'o-roid,** *a.*— **lep"to-gas'tru-la,** *n. Embryol.* A form of gastrula in which the cavity contains no food-yolk and the entoderm is a simple cell-layer, as in *Amphioxus*.— **Lep"to-gen'e-sis,** *n.* [Gr.] The Book of Jubilees, one of the Old Testament pseudepigrapha.— **Lep"to-glos'sa,** *n. pl. Herp.* A division of lizards, especially a superfamily having the clavicles expanded proximally, the vertebræ procœlous, and the tongue scaly and slender, as in *Lacertidæ* and *Scincidæ*.— **lep"to-glos'sal,** *a.*— **lep"to-glos'sate,** *a.* & *n.*— **lep"to-go-nid'i-um,** *n. Bot.* A slender gonidium.— **lep'toid,** *n. Bot.* A sieve-tube; a cell which is part of the leptome.— **Lep"to-lep'i-dæ,** *n. pl. Ich.* A family of amioid fishes. **Lep-tol'e-pis,** *n.* (t. g.) — **lep-tol'e-pid,** *n.*— **lep-tol'e-poid,** *a.* & *n.*— — **Lep"to-li'næ,** *n. pl. Zool.* An order of hydrozoans consisting of the hydroids and their medusæ, and including the suborders *Leptomedusæ* and *Anthomedusæ*. It has a fixed polyp form of generation alternating with a free-swimming medusa form.— **lep-tol'o-gy,** *n. Rhet.* A detailed or subtle discourse on matters of small moment; quibbling; literary trifling.— **lep'tome,** *n. Bot.* The bast or phloem portion of a fibrovascular bundle: distinguished from *hadrome*. **lep'tom‡.** — **lep"to-mat'ic,** *a.*— **Lep"to-me-du'sæ,** *n. pl. Zooph.* The *Calyptoblastea* as an order of *Medusæ*.— **lep"to-me-du'san,** *a.* & *n.*— **lep"to-men"in-gi'tis,** *n. Pathol.* Inflammation of the leptomeninges, or soft membranes pertaining to the brain or spinal cord, the pia mater, and the arachnoid membrane.— **lep"to-me-ninx',** *n.* [-NIN'GES, *pl.*] One of the more delicate membranes of the brain, the pia mater and the arachnoid.— **lep-tom'e-ter,** *n.* An instrument for testing the viscosity of oil, by comparing the rate at which it drops from a small orifice with the known rate of dropping of a standard oil.— **Lep-tom'i-tus,** *n. Bot.* A genus of aquatic fungi having strongly indented hyphæ, causing a linked appearance. The only species (*L. lacteus*) is found on submersed wood and stones and is common in the waste matter from sugar factories.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

lep'ton[1], 1 lep'tən; 2 lĕp'tŏn, *n.* [LEP'TA, *pl.*] [Gr.] *Numis.* **1.** A small modern Greek coin. See COIN. **2.** An ancient Greek and Syriac coin; the "widow's mite." See plate of COINS.

The small copper coin of the last emperors was the *lepton*, a small piece of twenty grains, by some thought to be the uncia, or minimus, of the early emperors.

let'ter[1], *n.* **1.** (1) A mark or character used to represent a sound or articulation of human speech; a character of the alphabet; a primary element of written speech.

Letters, as used in modern languages, are conventional phonetic symbols, which have been gradually evolved during the course of centuries from primitive hieroglyphic ideograms. See ALPHABET. In English these symbols may indicate single sounds, as *t, d,* etc.; any one of a related group of sounds, as *a, e, o,* etc.; compound sounds, as *g,* which represents *dzh,* and *x,* which represents *ks* and *gz;* or they may be combined to indicate sounds differing from those of the component symbols when used separately, as *wh, au,* etc. The same sounds are frequently represented by more than one letter, as *c, k,* and *q, c* and *s,* etc., and the same letter may also represent more than one sound, as *c* (which is sometimes *k* and sometimes *s*), *n* (which is sometimes *n* and sometimes *ng*), etc. See section on Spelling and Pronunciation in Introductory pages.

The new language was to have every sound represented by a *letter,* and no *letter* was to be suffered to remain that did not stand for a distinct sound.
J. B. MCMASTER *People of the U. S.* vol. i, p. 428. [A. 1883.]

(2) A type bearing such a character; also, collectively, printers' type or a style of type; as, set it in black *letter.*

The relative frequency in the use of the letters of the English alphabet, from observations of printers and typewriters, is said to be as follows:

e	1,000	o	672	l	360	f	236	g	168	j	55
t	770	n	670	u	296	w	190	v	158	q	50

i	704	r	528	m	272	p	168	k	88	z	22
s	680	d	392								

Capital initial letters have been found to be used in the following proportions:

S	1,000	D	423	E	285	W	228	V	144	K	39
C	785	B	388	H	258	G	223	N	128	Y	19

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

Leu-cob'ry-um, 1 lū-kŏb'rı-um; 2 lū-cŏb'ry-ŭm, *n.* *Bot.* A genus of widely distributed mosses of the family *Dicranaceæ*. They have the external leaf-cells disposed in two or more strata, are void of chlorophyll and are connected by clear-cut apertures. The chlorophyll-cells are situated in the center of the leaves. *L. glaucum*, the white moss, forms large tufts in damp woods.

leu-coch'ro-i, *n. pl.* *Anthrop.* Individuals of the white races.—**leu"co-chro'ic,** *a.* Of a whitish color or complexion: white.—**leu'co-cid'ic,** *a.* Destructive to leucocytes.—**leu'co-cid'in,** *n.* A toxin for leucocytes, or white blood-cells, destroying or dissolving them. **leu'co-ci'dinę.**—**leu'co-cra'fic,** *a.* *Petrog.* In igneous rocks, characterized by the predominance of light-colored over dark-colored minerals.

Leu-coc'ri-num, 1 lū-kŏk'rı-num; 2 lū-cŏc'rı-nŭm, *n.* *Bot.* A genus of low subterranean-stemmed liliaceous herbs with large white flowers, the perianth long-funnelform, narrow tube and a salverform limb. *L. montanum* is the only species. [< LEUCO- + Gr. *krinum*, lily.]

leu'co-cyan, *n.* *Bot.* A bluish-green pigment found in diatoms and certain brown algæ.—**leu'co-cy'elite,** *n.* Same as APOPHYLLITE.

leu'co-cyte, 1 lū'kō-saĭt; 2 lū'co-cīt, *n.* One of the minute, nucleated, colorless masses of protoplasm, capable of ameboid movements, found swimming freely in the blood and lymph (white blood-corpuscles), in the reticulum of lymphatic glands (lymphoid cells), and in bone-marrow and other connective tissue (wandering cells). Their average diameter is $^1/_{2500}$ inch. In human blood there are the following varieties: the **large uninuclear,** with a large amount of protoplasm, the **multinuclear,** having the nucleus distorted or separated into several parts and constituting 70 per cent. of the entire number of white blood-corpuscles in the body, the **eosinophil,** which stains readily with eosin, and the **mycelocyte,** a large cell with neutrophile granules. Embryologically the white blood cells originate in the mesoblast, and are important factors in the coagulation of the blood. See fibrin-ferment and red-corpuscles. Leucocytes prey upon and take into their substance bacteria and other micro-organisms within the blood and tissues. They also absorb solid and fatty particles.

The white corpuscles, or *leucocytes*, are the minute bodies which protect the animal economy against disease, and wage constant warfare against the numerous bacilli, microbes, bacteria, etc., which are the essential elements of contagion.
ROBERT BELL *The Deputy Physician* p. 62. [L. n. d. 1900.]

[< LEUCO- + CYTE.]—**leu"co-cy-the'mi-a,** *n.* *Pathol.* A disordered condition of the blood, characterized by excess of white and a decrease of red corpuscles, due to disease of the blood-making organs; the white-blood disease. **leu"co-cy-thæ'mi-a†.**—**leu"co-cyt'ic,** *a.* Relating to, or abounding in leucocytes; possessing more than a normal amount of leucocytes. **leu'co-cy'tal;**—**leu'co-cyt'i-form,** *a.*—**leu'co-cy"to-gen'e-sis,** *n.* The production of leucocytes.—**leu'co-cyto-ly'sis,** *n.* The extermination of leucocytes by the action of leucocytotoxins.—**leu"co-cy"to-lyt'ic,** *a.*—**leu"co-cy-to'ma,** *n.* A tumor made up of white blood-corpuscles.—**leu"co-cy"to-pæ'nic,** *a.* Diminished in the normal number of leucocytes in the blood. See LEUCOPENIA.—**leu'co-cy-to'sis,** *n.* *Pathol.* **1.** A condition in which there is a temporary increase in the white corpuscles of the blood, usually with no decrease in that of the red corpuscles. **2.** The number of white corpuscles contained in a certain amount of blood.—**leu"co-cy-tot'ic,** *a.*—**leu'co-cy-tu'ri-a,** *n.* The discharge of leucocytes in the urine.

leu'co-der'ma-tous, *a.* Characterized by an abnormal lack of pigment in the skin.—**leu"co-der'mi-a,** *n.* *Pathol.* Deficiency of colorless matter in the rete mucosum or pallor; also, unnatural whiteness of the skin, as in the albino.—albinism **leu"co-der'ma†.**—**leu"co-dex'trin,** *n.* *Physiol. Chem.* A substance of compound character, resulting from the conversion of starch into sugar. **leu'co-dex'trine†.**—**leu'co-dor'i-de,** *n. pl.* *Helminth.* A family of sedentary annelids with thoracic and abdominal gills and tentacles. **Leu-cod'ore,** *n.* (*c.* *c.*) —**leu'co-dor'ic,** *a.*—**leu'co-gel,** *n.*—**leu'co-drin,** *n.* *Chem.* A colorless compound ($C_8H_{10}O_5$), derived from the leaves of *Protea concinna*. **leu'co-drine†.**—**leu'co-ec'ceph'a-lit'ic,** *a.* Same as FOLIOCEPHALITIC.—**leu"co-e'thi-op'ic,** *a.* Of or pertaining to a leucoethiops or leucopathy; affected with leucopathy.—**leu"co-e'thiops,** *n.* [< GR. *leukos*, white + *aithiops*, negro.] An albino, especially one of a dark-skinned race. **leu'co-e'thiop†.**—**leu"co-fla'vic,** *a.*—**leu'co-gal'lol,** *n.* *Chem.* An organic compound ($C_7H_8O_3$) formed by the action of chlorin on pyrogallol in the presence of acetic acid.—**leu'co-gen,** *n.* *Chem.* Same as LEUCOBASE. **2.** A white paste consisting of indophenol that has been reduced by glucose and sodium hydroxid. **leu-co'i-um†.**—**Leu-co'jum,** *n.* *Bot.* A genus of bulbous, spring-flowering plants of the family *Amaryllidaceæ*, with white equal-segmented spicate flowers; the snowflakes. *L. vernum*, the spring snowflake, is sometimes called St. Agnes's flower. *L. æstivum* is the summer snowflake.—**leu'co-ker'ite,** *n.*—**leu'co-lin, leu'co-line,** *n.* *Chem.* An organic compound (C_7H_7N) obtained from coal-tar by distillation, and isomeric with quinolin, which is resembles. **leu'co-line†.**—**leu'co-lite,** *n.*—**leucolinic acid,** a colorless compound ($C_9H_9NO_3$), derived from quinolin and coal-tar by oxidation.—**leu'co-ly'sin,** *n.* A destructive leucocytotoxin found in the blood-serum by Metschnikoff from inoculations of guinea-pigs by emulsion of the spleen of rats, which destroys white blood-corpuscles.—**leu'co-ly'sis,** *n.* *Pathol.* The dissolution of leucocytes.—**leu'co-ly'tic,** *a.*

leu-co'ma, 1 lū-kō'mə; 2 lū-cō'mą, *n.* *Pathol.* A white opaque portion in the cornea, caused by a wound or inflammation of the eye. [< Gr. *leukōma*, white spot in the eye, < *leukos*, white.] **leu-com'ma†.**

leu-co'ma-in, leu-co'ma-ine, *n.* *Chem.* An alkaloid found in living animal tissue, as distinguished from one found in dead tissue (ptomain) or one of vegetable origin.—**toxic leucomain,** a leucomain possessing toxic qualities.—**leu-com'e-tous,** *a.* *Med.* Relating or similar to leucoma.—**leu'co-me'la-nous,** *a.* With fair complexion and dark hair.—**leu'co-me-lan'ic†.**—**leu'co-my"e-li'tis,** *n.* *Pathol.* Inflammation of the white matter in the spinal cord.

Leu'con, 1 lūk'ən; 2 lūc'ŏn, *n.* A powerful king of Bosporus, who reigned nearly forty years, from 393 to 353 B. C.

Leu"co-na'ri-a, *n. pl. Spong.* A tribe of heteroceolous calcispongians with a canal system of the eurypylous rhagon type.— **leu"co-na'ri-an,** *a.*— **leu"co-ne-cro'sis,** *n. Pathol.* White or dry gangrene.— **Leu-co'nes,** *n. pl. Spong.* The *Heteroceha.*— **leu'co-nate,** *a.*

leu-con'ic, 1 liu-kon'ik; ǰi-con'ic, *a. Chem.* Of or pertaining to a whitish compound obtained from croceonic acid.— **leuconic acid,** a colorless strong compound $C_6(OH)_3O_3$ derived from croceonic acid by oxidation and the absorption of water. [< LEUC- + CROCONIC.

Leu-con'i-dæ, *n. pl. Crust.* A family of cumaceans with the mandibles small and esserted into two angular processes, uropods large, and telson wanting. **Leu'con,** *n.* (t. g.)— **leu'co-nid,** *n.*— **leu'co-noid,** *a.* and *n.*— **leu'co-noi'dæ,** *n. pl. Biol.* A spirillum with jelly-like envelop.— **leu"co-nu'cle-in,** *n.* An acid nucleoprotein derivable from nucleohiston.— **leu"co-nych'i-a,** *n.* A state of the nails in which white patches appear underneath them.— **leu"co-path'i-a,** *n. Pathol.* 1. Congenital albinism. 2. Greensickness; chlorosis. **leu-cop-a-thy't.**— **leu"co-pe'ni-a,** *n. Pathol.* Deficiency of white corpuscles in the blood.— **leu"co-pe'nic,** *a.*— **leu-coph'a-nite,** *n. Mineral.* A vitreous pale-green sodium, calcium, and glucinum fluosilicate ($NaCaBeSi_2OF$) crystallizing in the orthorhombic system.— **leu"co-phane',**— **leu-coph'ite,** *n.* Same as LEUCITE.— **leu"co-phe'nic,** *a.*— **leu-coph'i-lous,** *a.* Loving the light; fond of light. [C.]— **leu"co-phleg-ma'si-a,** *n. Pathol.* 1. A dropsical condition. **leu"co-phleg'ma-sy.** 2. The whitish leg of lying-in women; phlegmasia alba dolens. **leu"co-phleg-mat'ic,**— **leu"co-phleg-mat'ic,** *a.* Of, pertaining to, affected with, or characterized by leucophlegmasia.— **leu"co-phu'ri-cite,** *n.* A basic orthosilicate of manganese and aluminium, related to humite.— **leu'co-phyl,** *n.* A colorless chromogen found in the corpuscles of an etiolated plant. It is, or under certain conditions may be, converted into chlorophyll.— **leu"co-phyll',**— **leu"co-phyl'lous,** *a. Bot.* Having white leaves.— **leu"co-pla'ci-a,** *n. Pathol.* A morbid condition characterized by the formation of white patches on the skin or on a mucous membrane. **leu'co-pla"cy**‡; **leu"co-pla'kia.**— **leu"co-plas'tid,** *n. Bot.* One of the colorless granules embedded in the protoplasmic mass of active vegetable cells, forming points about which starch is deposited.— **leu"co-plas'tic,**— **leu-cop'last;**— **leu-cop'ter-ous,** *a.* White-winged.— **leu"co-py'rite,** *n. Mineral.* A metallic, nearly silver-white, brittle iron arsenid ($FeAs_2$), crystallizing in the orthorhombic system.

leu"cor-rhe'a, 1 liū"ko-rī'o; 2 liū"co-rē'a, *n. Pathol.* Catarrh of the female genital passages, attended by discharge of a greenish-white mucus; the whites. [< LEUCO- + Gr. *rhein,* flowing, < *rhein,* to flow.]— **leu"cor-rhe'al-ic;**— **leu"cor-rhe'ic;**— **leu"cor-rhe'al,** *leu"cor-rhe'al, a.*

leu'co-cyx, 1 liū'ko-ciks; 2 liū'co-cī'ks, *n.* A North-African antelope (*Oryx leucoryx*), related to the gemsbok, with curved horns and uniform coloration. [< LEUC- + Gr. *oryx,* kind of gazel.]

leu"co-sar'co'ma, *n. Pathol.* Non-pigmented sarcoma.— **leu'co-scope,** *n.* An instrument for comparing the relative whiteness of lights or colors, or for testing the power of the eye to perceive colors.

Leu-cos'i-a, 1 liū-kosh'o; 2 liū-cō'si-a, *n.* 1. *Myth.* One of the three sirens. 2. A small island in the gulf of Salerno: named from the preceding. [< Gr. *leukēsis,* whiteness.]— **Leu"co-sil'i-des,** *n. pl. Crust.* A family of oxystomatous crabs with carapace subcircular but variously modified. **Leu-co'si-a,** *n.* (t. g.) **Leu-cos'i-dæ,**— **leu-co'si-an,** *a.* & *n.*— **leu'co-sil, leu-co'si-id,** *n.*— **leu-co'si-oid, leu'co-soid,** *a.*

leu'co-sin, *n.* 1. An albuminiferous substance found in barley and other grains. 2. The albuminoid coloring substance found in certain flagellate infusoria. **leu'co-sine;**— **leu'co-sis,** *n. Pathol.* 1. The process of forming leucoma; a becoming abnormally white. 2. The morbid condition characteristic of the albino.— **leu'co-sism,** *n. Pathol.* Albinism affecting only parts of the body; partial albinism.— **Leu"co-sol'de-a,** *n. pl. Crust.* A superfamily or division of oxystomatous crabs, sometimes considered as a suborder, and including at times restricted to *Leucosiidæ* and closely related families.— **leu"co-sol'de-an,** *a.* & *n.*— **leu'co-sper'mous,** *a. Bot.* White-seeded.— **leu'co-spore,** *n. Astron.* The inner corona.— **leu'co-spher'ic,** *a.*

Leu"co-sy'ri, 1 liū'ko-siu'ri; 2 liū'co-sī'ri, *n. pl.* The Cappadocians, as distinguished from the Syrians beyond the Taurus Mountains. [Gr., white Syrians.] **Leu-ko'sy-roi** [Gr.].

Leu-co-the'a, 1 liu-kō'thi-a; 2 liū-cō'thi-a, *n.* See INO. [Gr., white goddess.] **Leu-ko-the'ē**‡ [Gr.].

leu"co-thi-op'ic†, *a.* Leucothiotypic.— **leu-co'thi-op, leu-co'thi-ops,** *n.* [Rare.] A leucothiops or albino.

Leu-coth'o-ē, 1 liu-koth'o-i; 2 liū-cō'thō-ē, *n. Gr. Myth.* (1) A daughter of Orchamus, king of Babylon; was dishonored by Apollo and buried alive by her father: according to the fable apollo changed her into the frankincense tree. (2) A goddess of the sea, the wife of Athamas. Compare INO. **Leu-co'the-as,** 2. A genus of tall shrubs of the family *Ericaceæ,* natives of the north temperate zone. They have alternate leaves and small white racemose flowers. The stamens are 10 and the disk is 10-lobed. There are about 35 species, 5 being natives of the United States.

Leu'co-thoi'dæ, *n. pl.* A family of natatory gammaroideans having the anterior antennæ elongate and without accessory branches and the corneous laminæ of the maxillipeds very small. **Leu-coth'oe,** (t. g.)— **leu'co-thoid,** *n.*— **leu"co-tho'oid,** *a.*— **leu'co-tin,** *n. Chem.* A crystalline, neutral component of the extract of parreira bark. **leu'co-tine;**— **leu"co-tox'in,** *n.* Same as LEUCOCYTOTOXIN.— **leu"co-trich'i-a,** *n.* Deficiency of coloring-matter in the hair.— **leu"co-tu'ric,** *a.* Of, pertaining to, or designating a white compound derived from uric acid.— **leuturic acid,** a crystalline compound ($C_5H_4N_4O_3$) formed by the action of zinc and hydrochloric acid on parabanic acid.

leu'cous, 1 liū'kus; 2 liū'cus, *a.* Of light color or white; bleak; especially, albinotic [< *leukos,* white.]

leu-cox'ene, 1 liu-koks'in; 2 liū-cōks'ēn, *n. Mineral.* A white decomposition product of titanic iron; probably titanite.

Ilmenite is frequently represented by a white opaque alteration product known as *leucoxene.*

Encyc. Brit. 11th ed., vol. xiv, p. 227.

Leuc'tra, 1 liūk'tra; 2 liūc'trā, *n.* An ancient village in Bœotia, Greece, near Thebes. Here Epaminondas defeated the Spartans, 371 B. C. **Leūk'tra**‡ [Gr.].

leud, *a.* Lewd. **Leuder.**

leud, 1 liūd; 2 liūd, *n.* [LEUDS or LEU'DES, 1 liū'dis; 2 liū'dēs, *pl.*] A feudatory or vassal in the Frankish kingdoms. [< *L. ledes.*]

leugh, *v.* [Scot.] Same as LEUCH: laughed.

leuk, *n. & vi.* [Scot.] To look.

Leuk, 1 loik; 2 lōik, *n.* A town in Valais canton, Switzerland; altitude, 4,643 ft.; with hot saline, chalybeate, and sulfur springs, water-cures, and baths in the vicinity.

Leu'kas, *n.* Same as LEUCAS.

Leu'kip-pos, *n.* [Gr.] Leucippus.

leuk'o-, Same as LEUCO-.

Leu'kŏn, *n.* [Gr.] Same as LEUCON.

Leu-km'mlm, 1 leu-um'; 2 leū-ūm'm, *n. Bib. Gen.* xxv, 3.

Leu'pold, n. [G.] See LEOPOLD.

Leu"ret', 1 lū"rē'; 2 lū"rē, *Francois* (1797–1851). A French physician and allenist. [Hebraist.

Leu'tem, 1 lois'den; 2 lōis'dēn, *Jan* (1624–1699). A Dutch

Leu'then, 1 loi'tsen; 2 lōi'tsn, *n.* A village in Silesia province, Prussia. Here Frederick the Great defeated the Austrians, December 5, 1757.

Leut'schau, 1 loit'shou; 2 lōit'shou, *n.* An ancient town, capital of Szepsi county, Hungary.

Leut'ze, 1 loit'so; 2 lōit'se, **Emanuel** (3/21816–7/11868). A German-American painter; *Washington Crossing the Delaware,* etc.

Leuw'en-hoek, *n.* Same as LEEUWENHOEK.

Lev., Levit., *abbr.* Leviticus.

Le'va, *n.* Same as LEVYA.

le-va'da, 1 le-vā'di; 2 le-vā'da, *n.* [Sp.] 1. A trench or furrow, as in fields. 2. A run or mill-race; also, a canal. [Sp. & Pg., < *levar,* raise.]

Le Vaillant', 1 le vā"yäñ'; 2 le vā"yāñ', **François** (1753–1824). A French traveler and ornithologist, who explored southern Africa.

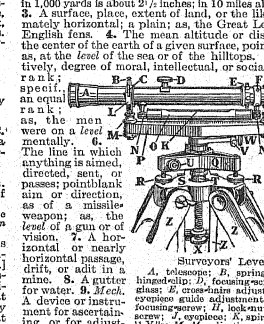
To adapt, adjust, or proportion, as to a given capacity or level; accommodate; suit; as, to *level* a discourse to the capacity of an audience. 7. *Surv.* To go over with a leveling-instrument; ascertain the vertical contour or the changes or differences of level of; hence, to lay out: sometimes used with *over* or *up.* 8. *Dyeing.* To make even and uniform, as colors. 9. *Philol.* To place in the same category, as words.

II. *i.* 1. To aim a weapon, as a gun or spear, directly at a mark or object or in a horizontal line; hence, to aim in any way directly at a thing; take aim; point; as, to *level* blindly or at random. 2. To be or come to a level state or condition; used with *up* or *down.* 3. [Rare.] To be in line or level with something; be aimed; hence, to be in accordance with something; agree; suit. 4. *Surv.* To use a leveling-instrument; take a level. 5. To conjecture; guess.

lev'el, *a.* 1. Having a flat and even surface, with no part higher than another; without inequalities; strictly conforming to the idea of a plane or still water; as, a *plane* is plain; also, approximately flat and even; not hilly, mountainous, or rugged; as, a *level* country. 2. Conforming to or lying in a horizontal plane; not sloping; not ascending or descending; parallel to the plane in which the instrument is *level;* this floor is not *level.* 3. Being or acting in the same line or plane or at the same height with something else; even with something; as, the stream is *level* with its banks. 4. Equal to something else in importance, rank, or degree; as, a position *level* with the highest. 5. Aimed or moving in a direct or straight line; direct; straight; conformable; accordant; hence, straightforward; open. [Colloq.] Having or showing good judgment or equipoise; well-balanced; as, *level* head. 7. Not rising and falling; not changing; uniform; unbroken; even; as, a *level* tone; *level* color. 8. Denoting a surface everywhere at right angles to the line in which a force acts, so that motion upon it causes no gain or loss of energy; equipotential; as, a *level* electrical conductor or surface.



Syn.: even, flat, horizontal, plain, plane, smooth. We speak of a *horizontal* line, a *flat* common, a *level* road, a *plain* country, a *plane* surface (especially in the scientific sense). That which is *level* may not be *even,* and that which is *even* may not be *level:* a *level* road may be very rough; a slope may be *even.* See FLAT; HORIZONTAL.— ANT.: broken, hilly, inclined, irregular, rolling, rough, rugged, slanting, sloping, uneven.

Prep.: *level with* the horizon; *level to* one's comprehension.

— level crossing, a grade crossing.— **lev'el-ed'ness,** *n.*

A process adopted by dyers for regulating the absorption of dye.— **l.-headed,** *a.* [Colloq.] Having well-balanced judgment; shrewd.— **l. in the wind,** (*Naut.*) having the upper and lower front teeth evenly set.— **l. lines** (*Ship-building*), lines bounding sections of a vessel's hull, made by horizontal planes coinciding with the load-water line of the vessel is trimmed on an even keel.— **to do one's l. best** [Colloq.], to put forth all one's powers; do all that one can naturally and reasonably be expected to do.— **l.-page,** *n.* [Rare.] Leveling.— **lev'el-ly,** *adv.*— **lev'el-ness,** *n.*

lev'el, *n.* 1. A line or surface, real or imaginary, that at every point is at right angles to the vertical; a line or surface having the same relative position to the surface of still water. See GEOD. 2. Popularly, a horizontal line, surface, plane, or position; as, to bring anything to a *level.* In this sense a *level* is tangent to the **true level** (def. 1), which it touches only at one point. It is often called **apparent l.** The difference between true and apparent level in 1,000 yards is about 2½ inches; in 10 miles about 66 feet. 3. A surface, plane, extent of land, or the like, approximately horizontal; a plain; as, the Great Level in the English fens. 4. The mean altitude or distance from the center of the earth of a given surface, point, or thing; as, at the *level* of the summit of the hilltops. 5. Figuratively, degree of moral, intellectual, or social elevation; rank; specif., an equal rank; as, the men were on a *level* mentally. 6. The line which anything is aimed, directed, sent, or passes; pointblank aim or direction, as of a missile-weapon; as, the *level* of a gun or of a missile. 7. A horizontal or nearly horizontal passage, drift, or adit in a mine. 8. A gutter laid to carry off water. 9. *Mech.* A device or instrument for ascertaining, or for adjusting something in, a horizontal line, or with reference to, a horizontal line, plane, or position, or for determining whether a surface is horizontal; specif., a leveling-instrument bearing a telescope. Such levels usually consist of a device having an air-bub-

Surveyors' Level.

A, telescope; *B,* spring plunger; *C,* vernier; *D,* adjusting-screw of objective-glass; *E,* cross-hairs adjusting-screw; *F,* eyepiece guide adjustment; *G,* eyepiece focusing-screw; *H,* leads for footing-screw; *I,* eyepiece; *K,* spirit-level; *L, L'V's; M, M,* adjusting-nuts for *V's*; *N, N,* adjusting-nuts for spirit-level *V*; spirit-level tube; *P,* bar; *Q,* leveling-arms; *R, R,* leveling-screws; *S,* shoe of screw; *T,* center; *U,* clamp-screws for slotted arms; *V,* tangent-screw; *W,* clamp for center; *X,* screw for adjusting center; *Y,* adjustable stop for telescope; *Z, Z, Z,* legs of tripod.

ble floating in a glass tube nearly full of a liquid, as ether and alcohol (then called a *spirit-level*), or holding liquid whose free surface shows the horizontal line, or of a frame with a horizontal cross-ba- adjusted by a plumb-line.

10. A section of a canal from one lock to another. [< OF. *livel*, < L. *libella*, dim. of *libra*, balance.]

[Certain mechanical levels not named here, such as **balance-level**, **batter-** or **battery-l.**, **bubble-l.**, **clinometer-l.**, **contact-l.**, **dumpy-l.**, will be found in their respective alphabetical places.]

Mechanical levels are named (1) from their construction, arrangement, or mechanism; as, **A level** (fastened together like an A), (a spirit-level) with **adjusting box l.** (a spirit-level in which the tube is replaced by a glass-covered box), **combination l.** or **fo t-l** (a combined rule and level, hinged in the center, the level being in one arm and the other being graduated to 45°), **hydrostatic l.**, **mercurial l.** or **mercury-l.**, **pendulum-l.**, **plumb-** or **plummet-l.** (having a cord and plumb), **reflecting-l.** (with a reflector, as a Locke or Wollaston's level), **self-recording l.**, **spirit-l.**, **striding-l.** (a spirit-level with forked feet), **triangular l.**, **water-l.**, **Y l.** (resting in forks or Y's); (2) from their use; as **artillery-l.** (for adjusting the angle of elevation of a piece of ordnance), **bench-l.**, **bricklayers' l.**, **carpenters' l.**, **gunners' l.**, **masons' l.**, **road-l.** (for laying off the surfaces of macadamized roads), **sloping-l.** (for measuring angles and slopes), **surveyors' l.**, **training-l.** (for gaging the depression or elevation of a gun), **trunnion-l.**

— **all-dade-level'**, *n. Astron.* A spirit-level which forms a part of the meridian circle. — **ball-l.** *Mining. n.* A level separate from other workings. **2.** A drainage-gallery having a vertical shaft at each end and acting as an inverted siphon. — **bed-l.**, *n.* Same as **bottom-l.** — **bottom-l.**, *n.* an absolute or unbroken level (position or surface), especially a very level and nearly horizontal tract or stretch of land; hence, figuratively, unvarying monotony or uniformity. — **dial-level**, *n.* a miner's compass having an engine-shaft with the rooms or chambers. — **flying l.**, in civil engineering, a hasty experimental leveling or survey, as over a proposed route. — **footing-l.** *n. Railroad.* A grade-level prepared for the ballast and tracks. — **Gravatt l.**, same as **DUMPY-LEVEL.** — **hand-l.**, *n. Surv.* A telescope having a bubble-tube attachment, so placed that the reflection of the bubble can be observed through the telescope. — **level-bear'ing**, *n.* Same as **STRIKE**, *n.*, 4 (1). **l.-counter-l.** — **l.-constant**, *n. Astron.* The angle between the declination circle and the axis of a transit or other astronomical instrument. In a first-class instrument this will remain very constant. — **l.-error**, *n. Astron.* The exact deviation from the true horizontal in the position of the axis of a transit-instrument. — **l.-free**, *a. Mining.* That may be drained or worked by means of a level driven into the hillside: said of coal or ironstone works. — **l. of the sea**, an imaginary surface, lying at the mean distance between high water and low water, which is used as a basis in the measurement of altitudes. — **l. stand**, *n.* Same as **LEVELING-STAFF.** — **l. staff**, *n. Mining.* One of a series of stones above ground to show the direction of levels beneath. — **l.-support**, *n. Mech.* A support or bracket adjustable by means of levelling-screws. — **l. of l.**, a line in which a horizontal plane intersects the surface of a slope. — **on the l.** [Slang, U. S.], without equivocation; seriously; in an open, honest, and fair manner: marked by square dealing.

lev'el, *adv.* **1.** In a right (or level) line; directly; directly straight; as, the missile went *level* to its mark. **2.** In an even or steady manner; steadily.

So sways she *level* in her husband's heart.
SHAKESPEARE, *Merchant of Venice, Act* iii, sc. 4.

lev'el-age, *n.* [Rare.] The act of making level.

lev'el-coil', *n.* An indoor game once popular at Christmas-tide, the fun of which consisted chiefly in unwrapping for a season, boisterous fun. **lev'el-sīce'**, **lev'el-sūse'**.

lev'el-er, } 1 lev'el-ər; 2 lēv'el-ər, *n.* **1.** One who or that
lev'el-or, } which levels or brings things to a level; as, the great Leveler, death. **2.** One who would destroy social distinctions and reduce all men to a state of equality. Specif.: [L-] (1) A member of an English political body that flourished during the rule of Oliver Cromwell and insisted on an equal distribution of property. (2) Same as **WHITEBOY.** **3.** A scraping-implement used in grading. **4.** A device for making an object level, as a billiard-table, by adjusting the legs. **5.** *Arch.* A flat stone for making a level-bearing.

lev'el-ing, *p. a.* & *vb.* ppr. of **LEVEL**, *v.* **1.** The reduction of uneven surfaces to a level or plane. **2.** *Surv.* The operation of ascertaining the comparative levels of different points of a surface for the purpose of laying out a grade, etc., by sighting through a leveling-instrument at one point to a leveling-staff at another point. — **lev'el-ling!**.

Levelin -rods.
1. Philadelphia. 2. New York. 3. Boston.

— **lev'el-ing-block'**, *n. Arch.* An iron platform or framework bearing adjustable slates, used in shaping, but not metal for the frames of ships. — **l. instrument**, *n.* A surveyors' level bearing a telescope. See the phrase, under **LEVEL**, *n.* — **l. party** (*Surv.*), a party consisting of a leveling, rodman, axman, engaged in leveling. — **l.-pole** -rod, or -staff, *n.* A graduated pole bearing a marker used by surveyors to range a level, being sighted through a leveling-instrument. A disk-shaped targ t divided into quad nants, alternating red and white, is fixed to the upon a rod, and by means of these the point a which a given horizontal line cuts the rod may be determined. A vernier attached to the target allows the graduations to be read to fifths part of a foot. For convenience sake the level-ing-rod is usually made of telescoping sections which may be lengthened out when necessary. The common rods in use are the **Boston, New York,** and **Philadelphia,** which differ in weight rather than in construction. — **l.-screw**, *n.* Any screw used to adjust something to a proper level, as in astronomical instruments. — **l. stand**, *n. Phot.* An instrument employed in supporting a glass-plate horizontally.

lev'el-ish, *a.* [Lev'el-ish; 2 lēv'el-ish.] (*a*) The doctrine that all social distinctions should be abolished; also, the disposition or endeavor to abolish them.

lev'el-ize', *v. t.* To -el-īz' -eld; 2 lēv'el-i-zd'shən, *n.* The act or process of leveling.

lev'el-ly, *adv.* [Rare.] In an even or level manner.

lev'el-ness, *n.* One who operates a level in surveying.

lev'ęn, *vt.* & *vi.* To smite -n and with lightning. — **lev'en'ing**, *n.* Lightning. — **lev'en-ing!**, *n.* Lightning.

lev'en, [lev'n; 2 lēv'n, *n.* [Scot.] A lawn.

Le'ven, [lē'vən; 2 lē'vēn, *n.* **1. Earl of**, see LESLIE, ALEXANDER. **2.** A seaport in Fifeshire, Scotland. **3. Loch**, a lake in Kinross-shire, Scotland, 3½ m. in circumference; in Loch Leven Castle, on one of its seven islands, Mary Queen of Scots was imprisoned, 1567–1568. — **the Lady of Loch Leven**, in Scott's *The Abbot*, the mother of the regent Murray.

lev'end, *pp.* Leavened. S. S.

lev'er-hulme, [lē'vənz-hulm; 2 lē'vēnz-hūlm, *n. A.* A town in Lancashire, England.

lev'er, [lev'ər *or* lī'ər; 2 lēv'er *or* lē'ver (XIII), *v.* To move with or as with a lever; use a lever.

lev'er, *n.* **1.** *Mech.* A device, consisting of a rigid structure, often a straight bar, turning freely on a fixed point or fulcrum, and serving to impart pressure or motion from a source of power to a resistance: one of the six so-called mechanical powers, intended to increase power at the expense of speed, or vice versa, or to change the direction of motion, as a crowbar, the human jaw, the human arm, or an oar.

Levers.

Three classes of levers, shown in the diagram, are commonly divided according to the different positions of *f*, fulcrum; *p*, power; and *w*, weight (1) those in which the fulcrum or resistance. 1. Roll-crank. 2. Connecting-rod. 3. Tilt-hammer. is between the power and the resistance; (2) those in which the resistance is between the power and the fulcrum, as in a lemon-squeezer; (3) those in which the power is between the resistance and the fulcrum, as in the forearm. The **principle of the lever** is that in equilibrium the power and the weight or resistance are in the inverse ratio of their respective arms. **2.** Specif., any one of various tools on the principle defined above. (*a*) A removable rod or bar inserted in a machine, to be operated by hand-leve-age. (2) *Steam-engin.* (*a*) A starting-bar. (*b*) A throttle-lever. (3) *Firearms.* A piece by which the hammer is drawn back to the bent of a small arm. (4) *Dentistry.* An instrument for extracting the stumps of teeth; a turnkey. (5) One of the branches of a horse's bit. (6) *Horn.* The forearm. (7) A leverwatch.

3. Figuratively, that which exerts, or through which one may exert, great power; as, fashion is the *lever* that moves society.

Mind the great *lever* of all things. WEBSTER *Works, Bunker Hill Monument* in vol. i, p. 71, [n. s. a. co. 1858.]

[< F. *levere*, < L. *levator*, lifter; see LEVATOR.]

lev'er, *vt.* To move with a lever; use a lever.

lev'er-age, *n.* [Lev'er-aj; 2 lēv'er-aj.] **1.** In some forms of construction, form, or mechanism; as, **bent lever** (in which the power, the fulcrum, and the resistance are not in a straight line), **cat-l.** (having a pawl or catch), **claw-l.** (terminating in a pair of claws), **elbow-l.** (bent at a sharp angle, as a corner), **ratchet-l.** (in a pawl-and-ratchet mechanism), **rock-** or **rocking-l.** (an equalizing-bar); (2) from their use or purpose; as **balance-l.** (for measuring the weight of a change speed gear), **equalizing-l.** (an equalizing-bar), **hand-l.** (as a reversing-lever), **link-l.** (in a link-motion), **lock-** or **locking-l.** (*a*) (*Railroads*) (which operates the supply-pipe of an automobile engine), **reverse-l.** (used in the reversing-mechanism of a steam-engine), **safety-valve l.**, **side l.** (a side beam, as of an engine), **throttle-l.** (controlling a throttle-valve), **tilt-** or **tilting-l.** (as for tilting the block in sawing shingles), **tripping-l.** (by which to release a piece or part); (3) from their inventor; as, **Sta-thope l.** (a compound lever in Stanhope printing-presses which actuated the platen so that its pressure increased as it descended).

— **arithmetical lever**, a lever graduated so that different weights may be placed at different distances from the fulcrum, for illustrating the principle of the lever, or for calculating. — **compound l.**, a combination of levers acting on one another, as in the steelyard, the treadle and crank and axle. — **perpetual l.**, — **dead l.**, see LIVE LEVER. — **lever's arm**, *n. Mech.* Same as **LEVERAGE OF A FORCE.** — **l.-board**, *n.* A keyboard, as in lutes or luffe-boarding. **2.** The movable slats of window-blinds, or movable louver-boards. — **l.-crank**, *n.* A mechanism comprising four links, one link being shorter than the others, so that as this link revolves the link directly opposite will swing to and forth. — **l.-sheave**, *n.* A shearing-machine in which the power is applied by or through levers: for metal-cutting. — **l.-watch**, *n.* A watch having a lever escapement. — **l.-wheel**, *n.* A toothed wheel. — **live l.**, the brake-lever of a car which first receives the power, as distinguished from the second or *dead lever*.

lever-brace (*Organ-building*), a device by which the pressure of air in a wind-chest is made to overcome the resistance of a spring-seat valve controlling the passage of air from the chest. — **universal l.**, a lever that by its reciprocation rotates a certain crank-shaft.

Compound nouns with *lever* as the first element name things operated by or having a lever; as, **lever-brace** (a brace consisting of a lever and its fulcrum), **l.-compressor** (a device for compressing an object to be viewed in a microscope), **l.-drill**, **l.-engine**, etc. (see DRILL, etc.), **l.-frame** (an A-shaped supporting frame which actuates the pump-rod on a hand-car), **l.-hook** (having a spring-lever which makes fast when the fish pulls at the bait), **l.-jack** (a holsting-jack operated by a lever), **l.-press**, **l.-punch**, **l.-valve** (a safety-valve, etc.).

Le'ver, [lē'vər; 2 lē'ver, **Charles James** (⁸/₂₁1806–⁶/₁1872). An Irish novelist; nicknamed by the Nationalists "the Irish Recruiting Sergeant"; *Charles O'Malley*.

lev'ers, *adv.* Liefer; rather. **lev'erest**.

lev'er-age, [lev'ər-ij *or* lī'ər-ij; 2 lēv'er-aj *or* lē'ver-aj (X"), *n.* **1.** The mechanical advantage or power gained by use of a lever.

The proofs drawn by such writers as Paley from the wondrous *leverage* and curiously formed joints of the animal frame are untouched by Mr. Darwin's theory. MCCOSH *Christianity and Positivism* lect. i, p. 7. [c. a RDS. 1871.]

2. Hence, figuratively, increased power or advantage; as, his knowledge of law is his *leverage* for success.

With the power of a lever is increased or reduced. — **leverage of a couple** (*Mech.*), the distance measured perpendicularly between the lines of action of the two forces. — **l. of a force** (*Mech.*), the distance from the fulcrum to the body measured perpendicularly to the line in which a force acts.

lev'er-ed, *pp.* Levered.

lev'er-et, [lev'ər-ət; 2 lēv'er-ēt, *n.* **1.** A young or half-grown hare. **2†.** A mistress; paramour. [< OF. *levret*, *v. l.dre*, < L. *lepus* (*lepor-*), hare.] — **lev'er-et-skin"**, *n.* A Japanese glaze applied to ceramic ware, supposed to resemble a leveret's fur.

Le Ver'rier', [lə vãr'yē'; 2 lē vēr'ye', **Urbain Jean Joseph** (⁹/₁₁1811–³/₁₀1877). A French astronomer who calculated the position of the planet Neptune in the sky, Sept. 23, 1846.

le-ver'ri-er-ite, [le-vēr'i-ər-īt; 2 le-vēr'ē-ər-īt, *n. Mineral.* A pearly light-brown hydrated aluminum silicate closely allied to kaolinite. [< *Le Verrier*, French mining engineer.]

lev'erst, *n.* [Prov. Eng.] **1.** A plant having ensiform leaves. **2.** The European yellow-flowered iris (*Iris pseudacorus*).

lev'er-wood", [lev'ər-wud"; 2 lēv'er-wōd", *n.* The American hop-hornbeam or ironwood (*Ostrya virginica*).

lev'e-sail', *n.* **1.** A bower, lattice, or arbor. **2.** A pent-house. — **lev'e-sel'**; **lev'e-sil'**.

Lē'vesque', [lē'vēsk'; 2 lē'vęk', **Pierre Charles** (1736–1812). A French historian and translator; *History of Russia*, etc.

Le'vi, [lī'vī; 2 lē'vī, *n.* **1.** A masculine personal name. **2.** *Bib.* Third son of Jacob. *Gen.* xxiv, 34. **3.** The tribe descended from Levi, "divided in Jacob and scattered in Israel." **4.** *Bib.* The Apostle Matthew. *Mark*, ii, 14. **5.** *Bib.* An ancestor of Christ. *Luke* iii, 24. **6. Israel** (⁷/₂ 1856–). a French rabbi, scholar, and author; *Semitic Studies*. **7. Leone** (⁹/₁₄1821–⁹/₁1888), an Anglo-Jewish writer; born at Ancona; *Hist. of Brit. Commerce*, etc.

lev'i-a-bil'ee, [lev'i-ə-bl; 2 lē'vi-ə-bl, *a.* **1.** That may be levied upon or seized; as, the goods are *leviable*. **2.** That may be levied; as, a *leviable* tax.

le-vi'a-than, [lə-vī'ə-thən; 2 le-vī'a-thən, *n.* **1.** A large aquatic or other unidentified animal mentioned in the Scriptures: possibly a crocodile or other large reptile (*Job* xli, 1), a serpent (*Isa.* xxvii, 1), or a whale (*Ps.* civ, 26). **2.** Hence, any large animal, as a whale. **3.** By extension, something huge and colossal, as a ship of unusual size.

4. In a magnificent world, that planet Jupiter,— the *leviathan* of our solar sea. STARR KING *Substance and Show* p. 275. [c. a co.] **4.** [L-] The title of a work published by Thomas Hobbes in 1651, in which he expounded his theory of absolute monarchy: so named because he saw in political society an imaginary body represented by an illusory animal larger than man. [L., < Heb. *liwyâthân*, an aquatic monster.] — **Leviathan of literature**, a sobriquet of Dr. Samuel Johnson.— **le'vi-a-than'lic**, *a.* Resembling or as large as a leviathan.

lev'i-bur'lum, [lev'ə-bəl'yu-bər; 2 lē'vi-bēl'yu-bər, *a.* Consisting of smooth muscle-fiber. [< L. *levis*, smooth, + CELLULAR.]

lev'i-er, [lev'i-ər; 2 lēv'i-er, *n.* A person who makes a levy.

lev'i-gate, [lev'i-gēt; 2 lēv'i-gāt, *vt.* [LAT. *lēvigātus*.]

1. To reduce to a fine, impalpable powder, as by grinding between hard surfaces. See LEVIGATION.

His paint may be colored . . . with *levigated* charcoal.
H. W. BEECHER *Plain and Pleasant Talk* p. 183, [c. a. 1859.]

2†. To smooth; polish. [< L. *levigatus*, pp. of *levigo*, < *levis*, smooth, + *ago*, make.] — **lev'i-ga'ting-mill"**, *n.* A mortar or pan-mill for grinding pastils or white lead operated by a crank. — **lev'i-ga-bi(e)**, *a.* [Rare.] That may be powdered.

lev'i-ga'ted, *vt.* [Archaic.] To lighten or belittle. [< L. *levigatus*, pp. of *levigo*, < *levis*, light, + *ago*, make.]

lev'i-gate', *a.* Made smooth; polished: in botany, said of seeds, leaves, etc., that appear as if polished. **lev'i-gate!**; **lev'i-ga-tous!**.

lev'i-gate', *a.* [Rare.] Lightened.

lev'i-ga'tion, [lev'i-gā'shən; 2 lēv'i-gā'shon, *n.* The grinding of a solid substance to a fine, impalpable powder, especially by rubbing between flat surfaces while moist.— **lev'i-ga'tor**, *n.*

le-vig'il-an-ite, [lə-vij'il-ən-īt; 2 le-vij'il-an-īt, *n. Mineral.* A fluoriferous variety of gundalcarazite. [< *Levigliani*, in Italy.]

lev'in, [lev'in; 2 lēv'in, *n.* [Poet. or Archaic.] **1.** Lightning. **2†.** The sun's rays. **leav'en†**; **lev'en‡**.— **lev'in-brand"†**, *n.* A flash of lightning. — **lev'in-bolt"**, *n.* }.

lev'i-nus, [lev'i-nəs; 2 lē-vī'nus, **Charles A.** (⁹/₁1897–). American merchant; owner of Bellanca-Wright monoplane "Columbia," accompanied Clarence Chamberlin in transatlantic flight to Germany, June 4–6, 1927. See CHAMBERLIN.

lev'i-ner', *n.* A swift species of hound.

lev'i-pede, [lev'i-pēd; 2 lēv'i-pēd, *a.* Smooth-footed. [< L. *levis*, smooth, + *pes* (*ped-*), foot.]

le'vir, [lī'vər; 2 lē'vir, *n.* [L.] A husband's brother.— **lev'irate**, *n.* The ancient custom of marriage between a man and the widow of his brother, required by the Mosaic law when there was no male issue and when the two brothers had been residing on the same family estate. The Deuteronomic Code introduced *chalitza*, which is now the general rule. Compare NIRGAL. — **lev'i-rat'ic**, *a.* Pertaining to the levirate. **lev'i-rat'ic!**; **lev'i-rat'ical**. — **lev'i-ra'tion**, *n.* Marriage according to levirate usage.

lev'i-ros'tres, [lev'i-ros'trēz, *n. pl. Ornith.* A former division of birds, including the toucans and others supposed to be related to them. [< L. *levis*, light, + *rostrum*, bill, < *rodo*, gnaw.]

Lē'vis', [lē'vi'; 2 lē'vī', *n.* **1. François, Duc de** (⁴/₂₁1720–1787), a French marshal; commanded the French army in Canada. **2.** (1) A district in Quebec, Canada; 271 sq. m. (2) Its chief town.

Le-vis'ti-cum, [le-vis'ti-kum; 2 le-vis'ti-cūm, *n. Bot.* A monotypic genus of herbs of the family *Apiaceæ*, the only species being *L. officinale*, the common lovage. [LL., < L. *ligusticum*; see LIGUSTICUM.]

Le-vi'tha, [lē-vī'tə; 2 le-vī'tä, **Elias** (1470–1549). A German-Jewish grammarian, exegete, and rabbi.

lev'i-tant, [lev'i-tənt; 2 lēv'i-tant, *n.* One who professes or exhibits the spiritualistic levitation.

lev'i-tate, [lev'i-tēt; 2 lēv'i-tāt, *v.* [-TAT'ED; -TAT'ING.]

I. *i.* To rise from light or buoyant, so as to cause to rise in the air.

II. *v. t.* To rise or move because of lightness or levity; tend to ascend because lighter than the surrounding atmosphere. **2.** To be suspended or move about in the air without contact, as in dreams or the alleged phenomena of spiritualism. [< L. *levita(t-)s*; see LEVITY.] — **lev'i-ta'tive**, *a.* Relating to or capable of levitation.

lev'i-ta'tion, [lev'i-tā'shən; 2 lēv'i-tā'shon, *n.* **1.** The act of making light, or the state of being light; buoyancy, whether physical or spiritual; lightness.

The mysterious *levitation* that enables him [the poet] to rise above the general run of men.
G. P. LATHROP *Representative Poems* intro., p. 9. [CAS. co. 1885.]

2. The illusion of suspending heavy objects or the human body in the air without support, as in dreams or spiritualistic scances.

lev'i-ta"tor, [lev'i-tā'tər; 2 lēv'i-tā'tōr, *n.* One who believes in or exhibits the alleged phenomena of spiritualistic levitation.

Le'vite, [lī'vīt; 2 lē'vīt, *n.* **1.** *Bib. Hist.* One of the tribe or family of Levi, son of Jacob, especially a descendant of Levi, acting as assistant of the priests of the tribe in the services of the sanctuary. *Num.* xviii, 6. **2.** One whose religion does not prompt him to charity; a hypocrite: in allusion to the conduct of the Levite in the parable of the good Samaritan. *Luke* x, 32.

Grim-hearted world, that took'st with *Lesite* eyes
On those poor fallen by too much faith in man.
LOWELL *Legend of Brittany* pt. ii. st. 7.

lib'er-tin-ism, 1 lĭb'er-tĭn-ĭzm; 2 lĭb'er-tin-ĭzm, *n.* **1.** Unrestrained indulgence in lewd or licentious practises; debauchery. **2.** An extreme exercise of freedom in thought or opinion, especially on religious subjects.

In these days . . . free toleration is made both pretext and excuse for intellectual *libertinism*.

PORTER *Books and Reading* p. 63. [S. 1873.]

3. [Rare.] The condition of a freeman. [< F. *libertinisme*, < *libertin*, = LIBERTINE.] **lib'er-tin-age†; lib'er-tism†** [Rare].

lib'er-ty, 1 lĭb'er-tĭ; 2 lĭb'er-ty, *n.* [-TIES, 1 -tĭz; 2 -tiş, *pl.*] **1.** The state of being exempt from the dominion of others, or from restricting circumstances: opposed to *slavery*, *subjection*, or *bondage*; as, *liberty* of speech or of trade. **2.** A special right, exemption, or immunity granted by authority, or the privileges consequent upon this; franchise; privilege: sometimes in the plural, and with *of*; as, a *liberty* to fish; the boys had *liberty* to play on the stairs; the *liberties of cadets* (privileges of making evening calls, etc.); the *liberties* of a city. **3.** Freedom beyond the ordinary bounds; ungranted and sometimes undue freedom; as, I take the *liberty* of addressing you; improper *liberties*. **4.** The possession and exercise of the right of self-government, either politically or religiously; as, the *liberty* granted by the constitution.

The Englishman loves *liberty* like his lawful wife, the Frenchman loves her like his mistress, the German loves her like his old grandmother. HAMERTON *Matthew Arnold's Essays in Criticism* essay v, p. 179. [MACM. 1883.]

5. Freedom of action, so far as this may be without trespassing on the rights of others; as, *liberty* under law. **6.** *Ethics.* The power of spontaneous and self-originated choice; freedom of will, both as undetermined by external compulsion and as not necessitated by subjective influences or motives. See FREEDOM OF THE WILL; NECESSITY. It is called also **liberty of indifference,** because before turning the agent is conscious of having regarded as determined in favor of one course rather than another. When the choice lies between alternatives, it is called **l. of contrariety;** when between doing and not doing some particular thing, the **l. of contradiction.**

7. A place or district within which certain immunities or privileges are enjoyed. Specif.: (1) In England, a district within a county, exempt from the jurisdiction of the sheriff and having a separate commission of the peace. (2) † A region outside a debtors' prison within which a prisoner was sometimes permitted to reside; as, the *liberty* of the Fleet. **8.** The curvature in a horse's bit, allowing freedom for the tongue. **9.** *Naut.* Leave of absence on shore. **10.** [L.] *Poet. & Rhet.* The personification of freedom; as, sweet *Liberty*. [< F. *liberté*, < L. *libertā(t-)s*, < *liber*, free.]

Syn.: freedom, independence, license. In general terms, it may be said that *freedom* is absolute, *liberty* relative; *freedom* is the absence of restraint, *liberty* is the removal or avoidance of restraint. The two words are constantly interchanged; the slave is set at *liberty*, or gains his *freedom*; but *freedom* is the nobler word. *Independence* is said of states or nations, *freedom* and *liberty* of individuals; the *Independence* of the United States did not bring *liberty* or *freedom* to its slaves. *Liberty* keeps quite strictly to the thought of being clear from restraint or compulsion; *freedom* takes a wider range, applying to more positive influences; thus, we speak of *freedom* from annoyance or intrusion. See PERMISSION. *License* is, in its limited sense, a permission or privilege granted by adequate authority, a bounded *liberty*; in the wider sense, *license* is an ignoring and *defiance of all that should restrain*, and a reckless doing of all that is inimical to the peace of society. *License* is to do — a base and dangerous counterfeit of *freedom*.—Ant.: captivity, compulsion, constraint, imprisonment, necessity, obligation, oppression, serfdom, servitude, slavery, subjugation.

—**at liberty.** **1.** Free from restraint; as, *at liberty* to take action. **2.** Free from restraint or hindrance; as, we are now at liberty to suggest; as, the prisoner was left *at liberty*.—**civil l.,** liberty of the individual to conduct his own affairs as he pleases, with only so much legal restraint as the public good may require.—**individual l.,** freedom from restraint in the exercise of one's outside governmental control, as freedom of opinion and conscience, etc.—**L. Bell** (*U. S. Hist.*), see under BELL.—**L. Bond,** a United States interest-bearing bond issued by authority of Congress in 1917 and 1918, in value ranging from $50 to $100,000, and bearing from 3½ to 4½ per cent. interest.—**liberty of the press,** the right on human manof-war, keeping account of the leaves of absence of each man and of the condition in and promptness with which he returned.—**L. Party.** [U. S.] Anglo-Am.] An apprentice, journeyman, or street-crough ever ready for a riot; hence, specif., one noisily zealous in the cause of liberty. **2.** [U. S.] A member of the Sons of Liberty. See under SON. **L.-cap,** n. A close-fitting cap worn as a symbol of liberty. Specif.: (1) The Roman pileus, a Phrygian cap worn by manumitted slaves. (2) The bonnet rouge, or red liberty-cap of the French Revolution of 1789.—**L.-day,** *n. Naut.* A day on which the ship's crew are at liberty to go ashore.—**L. Enlightening the World,** a bronze statue of heroic size which stands upon Bedloe's Island at the entrance of New York harbor. The statue rises to a height of 151 feet from the high and is mounted upon a pedestal 135 feet in height) was presented by the people of France to the United States in commemoration of the 100th anniversary of the Declaration of American Independence. It was off red July 4, 1884, and dedicated Oct. 28, 1886.—**L.-man,** *n. Naut.* A sailor who has permission to go ashore.—**l. of conscience,** a system of non-interference by the state with the religious beliefs, or modes of worship of its citizens.—**l. of the press,** freedom to print and publish without previous supervision.—**l. of the tongue,** same as LIBERTY, 8.—**L. party** [U. S.], an abolition party that came into being in 1840, coalesced with the Free-soil party in 1848, and became a part of the Republican party in 1854.—**l.-pole,** n. **1.** A tall mast with a liberty-cap of liberty at its top, set up by the "Sons of Liberty," radical patriots who supported the American Revolution. As rallying-places in the open air, such poles were first erected in the city of New York, and finally wherever republicanism abounded. They became objects of contests between citizens and British troops. **2.** Any isolated flagstaff.—**l.-ticket,** *n. Naut.* A paper giving the date and extent of the leave of absence granted to a seaman or a marine.—**l.-tree,** *n.* Same as TREE OF LIBERTY.—**moral l.,** the possession and power of choice essential to moral responsibility.—**natural l.,** a condition in which nature's laws are the only restriction.—**personal l.,** the right of a person to come and go at pleasure; freedom of the individual to follow his own pursuits.—**personal-l. laws** (*U. S. Hist.*), statutes passed by various Northern States, during the existence of the fugitive-slave laws, for securing to alleged fugitive slaves the privilege of the writ of habeas corpus and trial by jury in the State where the arrest was made, because in the slave States the defendant was not lawworthy. The first personal-liberty laws were those of New York in 1840, Massachusetts and Vermont in 1843, Pennsylvania and Rhode Island in 1847–1848. The fugitive-slave law of 1850 avoided the use of State officers by devolving the duties on the United States officers in the several States. Non-personal-liberty laws followed. The conflict between these personal-liberty laws and the fugitive-slave law of 1850 became the declared cause of the secession of South Carolina in 1860.—**political l.** 1. The right to participate in the election of rulers and the making and administration of the laws. **2.** National independence. **3.** Personal liberty.—**religious l.,** freedom of religious opinion and worship as one's conscience may dictate.

A *good lie* signifies that the ball lies in such position from which it may be freely played; a *bad lie* that it is in a hole, etc.: a *hanging lie* is a case of a ball resting on a slope inclining forward.

lie, *n.* **1.** An untruth deliberately told; the uttering or acting of that which is false, for the purpose of deceiving; intentional misstatement; falsehood.

The lie involves (1) the expression of what is false or misleading, (2) the intention to deceive, and (3) a violation of some moral obligation. In its strictest sense, it excludes the *lie proper*, whether by word or act, *equivocation*, and *reservation* both real and mental. Fiction, fables, etc., as they are not involve intentional deception, are not properly lies.

As soon as he ceases to write trifles he bears to write *lies*; and such *lies*! A man who has never been within the tropics does not know what a *lie* can be. A missionary is a man who has never looked on Niagara has but a faint idea of a cataract: and he who has not read Baker's *memoirs* may be said not to know what it is to lie. MACAULAY *Barère's Memoirs, Edinburgh Review* for 1844.

2. That which is designed to deceive, or which creates a wrong impression; as, his daily life is a *lie.* **3.** An accusation of lying; as, I gave him the *lie.* [< AS. *lyge*, < *leŏgan*, lie.] *lye*†. Syn.: Deception, deceptive, fabrication, falsehood, untruth. A *lie* is the uttering of what one knows to be false with intent to deceive. The novel or drama is not a *lie*, because not meant to deceive; the man supposing that the earth was flat was not a *lie*, because not ken known to be false. *Untruth* is more than lack of accuracy, implying always lack of veracity; but it is a somewhat milder and more dignified word than *lie.* Compare synonyms for DECEPTION; FRAUD.— Ant.: fact, truth, veracity.

— a **lie out of the whole cloth,** a complete falsehood: not patched with truth.— **lie in the ear,** an accurate, malicious falsehood.— **white lie,** a false statement made without intention of malice, but out of conventionality, or to save another's feelings; as, the familiar *white lie*, "not at home."

H'en, 1 li'ən *or* lin; 2 lī'ən *or* lin (xui), *n.* 1. *Law.* A legal claim or hold on property as security for a debt or charge. In general application the term *lien* embraces all cases in which real or personal property is charged with the payment of a debt, whether created by act of the property differs from a *tax*, for the latter may be discharged at any time upon the payment of the amount due, and from a mortgage in the fact that while the latter is incidental to the bailment, the mortgage is made, whether or not the property be delivered, expressly as a form of security. The most common forms of *liens* are: **agricultural lien** (upon crops, to secure money advanced for their cultivation, or for wages due to laborers): **attorney's l.,** sometimes called **charging l.** (upon documents of value or money held by an attorney, for the payment of his fees); **common-law l.** (one arising under the rules of common law, as distinguished from an **equitable l.**) (upon real or personal property whether or not in the actual possession of the lienor, the form which courts of equity alone recognize); **general l.** (upon property for a general balance due from the owner); **judgment l.** (following upon a judgment, *governed entirely by statute*, and usually dependent upon the filing of the judgment); **logging l.** (upon the logs cut for wages due for the labor of logging, governed by statute); **maritime l.** (upon a vessel or her cargo as for the labor of her crew, and not requiring actual possession, but may be secured by libeling the ship in an admiralty court); **mechanics' l.** (upon buildings and material furnished for their labor by mechanics and material men, entirely statutory); **particular l.** (upon specific property for labor or money expended on that property alone).
A lien upon land does not imply a right to sell, but a mere right to have it, in some form, applied towards satisfying a claim upon it. WARSHBURN *Am. Law of Real Property* vol. ii, bk. i, p. 36. [n. d. 1886.]

Lif, 1 lif; 2 lĭf, *n. Norse Myth.* The female survivor who, with her husband Lifthrasir, is to continue the new human race after Ragnarok. [Isl. *f.* < *lifa*, live.]
life, 1 laif; 2 līf, *n.* [LIVES, 1 laivz; 2 līvz, *pl.*] **1.** The state of being alive; that condition in which animals and plants exhibit the distinguishing characteristics and functions and from dead organisms. The three principal distinctions are: (1) metabolism, with the power of growth; (2) reproduction; and (3) automatic or internally initiated adaptations to changes in the environment.
2. The animation of the body, in animals and man, by the vital principle or animal soul; the condition or time between birth and death; as long and useful life.
3. Upon the friendship we contracted at Scandinavia will last for *life.* T. SHOLLETT *Humphrey Clinker, Letter to Letty Willis* p. 14. [n. d.]
3. Any conscious and intelligent existence; a particular state of living; as, the *life* here and hereafter.
Much of English mental *life* is an intellectual shock.
MIVART *Genesis of Species* p. 14. [e. a. c. 1880.]
4. The manner in which one lives; as, the *life* of a recluse; a *life* of poverty and obscurity. 5. The vital principle; the principle or power scientifically assumed as the rational explanation of the facts of organic existence and development, embracing the origin and growth of living beings, and the phenomena of metabolism in this process, their plan of growth, their constant changes with continued identity, self-repair, etc.; in narrower sense, the power of self-preservation and growth by the natural processes of assimilation and excretion, the permanent cessation of which is death; as, there is *life* in him yet. In the philosophy of Aristotle developed by schoolmen, the vital principle was defined from the principle of the inorganic forces, and the kingdoms of nature were considered as actuated by distinct principles or causes. Above the inorganic kingdom was placed the vegetable; above this kingdom actuated by **vegetative life;** higher in the scale came the animal kingdom acting under the impulse of **animal l.,** or sensation; above this was placed the rational principle or form which controls the sensitive and vegetative actions; above these was placed **intellectual l.** as a faculty of a higher principle capable in itself of the functions of the animal and vegetative principle. Modern biologists explain *life* as a resultant of physical and chemical elements and forces acting and reacting under laws, so as to result in the evolution of individual living beings and the development of the species.
Those who hold that the soul is material in its composition, must of course reject the new idea of separate principles of *life.* Those who account for the existence of the higher forms of being in matter, *life* and spirit, by a preconceived theory of evolution of the higher from the lower, are precluded by the necessity of their metaphysical theory from accepting a vital force.
Mrs. MADISON *Forest Human Intellect* p. 25. [a. D. 1870.]
6. That which tends toward growth, development, and progress, energy; animation; vigor; spirit; as, to put *life* into an enterprise. 7. That which inspires liveliness and animation; that which gives spirit.

S.] **1.** To be unwell; ail. **2.** To be on the point of leaving. **3.** To be about to die.

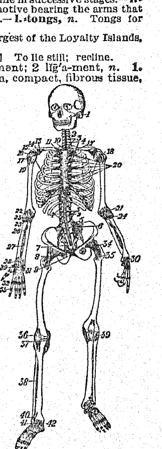
lift², *n.* [Prov. Eng.] The heavens, sky, or atmosphere.

lift³†, *n.* A thief.

lift'a-bl(eᴾ, 1 lift'ə-bl; 2 lĭft'a-bl, *a.* That may be lifted.

lift'er, 1 lift'ər; 2 lĭft'er, -*n.* **1.** A person who lifts. **2.** A contrivance by which something is lifted. Specif.: (1) A curved piece of iron for lifting a stove-lid. (2) *Steam-engine.* A lever or long arm for raising a puppet-valve. (3) *Paper-making.* A bucket-wheel for raising paper-pulp. (4) *Founding.* Either of two tools used for handling sand. See illus. under MOLDERS' TOOLS. (5) A cross-piece of iron attached to the poles of a horseshoe magnet. (6) *Mining.* The beams on which stamps were formerly mounted. **3.** A thief; as, a shop*lifter*; cattle-*lifter*. **4.** A member of a Scotch Presbyterian sect, the main tenet of which was that the minister should lift the sacramental bread during the prayer of consecration.

Lif'thra-ser, 1 lif'thrā-sər; 2 lĭf'thrā-ser, *n.* See RAGNAROK.



lift'ing, 1 lift'iŋ; 2 lĭft'ing, *n.* **1.** The act of raising. **2.** [Rare.] Assistance. **3.** In heel-and-toe walking, the raising of the heel of the rear foot before the front foot reaches the ground, an act which disqualifies a competitor. **4†.** An experimental attack.

—**lift'ing-arms″**, *n. pl.* Arms for raising locomotive-links.—**l.-bar**, *n.* *Textile.* A horizontal bar that raises the needles of a Jacquard loom or the jacks of a knitting-machine.—**l.-blade**, *n.* *Textile.* A metal plate receiving the lifting-wires of a loom when they are raised.—**l.-day**, *n.* The first or second day after Easter; heaving-day.—**l.-dock**, *n.* Same as HYDRAULIC DOCK.—**l.-dog**, *n.* A pawl, clutch, or similar member that lifts some other piece.—**l.-gear**, *n.* Any mechanism for raising or lowering loads.—**l.-hitch**, *n.* A hitch for slinging something that is to be hoisted.—**l.-irons**, *n. pl.* *Founding.* Strips of iron serving as handles when withdrawing a pattern from a mold.—**l.-machine**, *n.* A health-lift.—**l.-piece**, *n.* A mechanism for raising the striking-hammer of a clock.—**l.-plate**, *n.* *Founding.* An iron plate so attached to a wooden pattern that it will accommodate the lifting-screws by which it is drawn from the mold.—**l.-rod**, *n.* A rod receiving motion from the rock-shaft and imparting motion to the lifter of the puppet-valve. *Am. Mech. Dict.*—**l.-rods**, *n. pl.* *Founding.* Iron rods which screw into a lifting-plate. **l.-screws‡.**—**l.-sail**, *n.* *Naut.* Any sail, such as a jib, calculated to lift a ship's bows out of water.—**l.-screw**, *n.* A screw-jack.—**l.-set**, *n.* *Mining.* A series of pumps or sets of pumps by which water is lifted from the mine in successive stages.—**l.-shaft**, *n.* The shaft in a locomotive bearing the arms that raise the links or their blocks.—**l.-tongs**, *n.* Tongs for grasping and lifting crucibles.

Li-fu', 1 lī-fū'; 2 lī-fu̇', *n.* The largest of the Loyalty Islands, S. Pacific; 37 by 10 to 20 m.

lig, 1 lig; 2 lĭg, *vi.* [Dial. or Obs.] To lie still; recline.

lig'a-ment, 1 lig'ə-ment *or* -mənt; 2 lĭg'a-ment, *n.* **1.** *Anat.* A band or sheet of firm, compact, fibrous tissue, closely binding related structures together, especially one connecting or investing the opposed surfaces of a joint. Ligaments are named: (1) from their anatomical position; as, **articular, auricular, clavicular, coronary, hepatic, iliofemoral**, etc.; (2) from the men who have been more prominently associated with their treatment; as, **Bigelow's ligament, Cooper's l., Flood's l., Gimbernat's l., Henle's l., Hesselback's l., l. of Winslow, l. of Zinn, Poupart's l.**, etc. **2.** Hence, a band or connecting tie; that which binds objects together; a bond or union; as, the *ligaments* of family affection. **3.** *Conch.* The uncalcified chitinous cuticular matter, usually very elastic, between or above the hinge-margins of a bivalve shell. [F., < L. *ligamentum*, < *ligo*, bind.]

System of Ligaments.

1. Temporo-maxillary articulation with its external lateral ligament. 2, 2. Anterior common ligament of the spinal column. 3, 3. Intervertebral disks. 4, 4. Intertransverse ligaments. 5. Iliolumbar ligament. 6. Anterior sacro-iliac ligament. 7. Great sciatic ligament. 8. Obturator membrane. 9. Anterior pubic ligament. 10. Interclavicular ligament. 11. Sternoclavicular joint with its anterior ligament. 12. Rhomboid ligament. 13. Conoid part of the coracoclavicular ligament. 14. Trapezoid part of the coracoclavicular ligament. 15. Coraco-acromial ligament. 16. Shoulder-joint. 17. Its capsular ligament. 18. Coracohumeral ligament. 19. Tendon of the long head of the biceps muscle. 20. Anterior chondrosternal ligaments. 21. Elbow-joint. 22. Its anterior ligament. 23. Its internal lateral ligament. 24. Superior radio-ulnar joint. 25. Its orbicular ligament. 26. Oblique ligament. 27. Interosseous membrane. 28. Inferior radio-ulnar joint with anterior ligament. 29. Anterior ligament of wrist. 30. External lateral ligament of wrist. 31. Internal lateral ligament of wrist. 32. Anterior transverse ligament of the metacarpus. 33. Interphalangeal joint with its capsular ligament. 34. Capsular ligament of hip-joint. 35. Iliofemoral or Y ligament. 36. Capsular ligament of the knee-joint strengthened by the ligamentum patellæ. 37. Internal lateral ligament of knee-joint. 38. Interosseous membrane. 39. Superior tibiofibular joint. 40. Inferior tibiofibular joint with its capsular ligaments. 41. Anterior ligament of ankle-joint. 42. Deltoid ligament, or internal lateral ligament of ankle-joint.

lig″a-men'tous, 1 lig″ə-men'tus; 2 lĭg″a-mĕn'tŭs, *a.* Of, pertaining to, or of the nature of a ligament; connecting; binding. **lig″a-men'tal‡**; **lig″a-men'ta-ry†.**—**lig″a-men'tous-ly**, *adv.*

lig″a-men'tum, 1 lig″ə-men'tum; 2 lĭg″a-mĕn'tŭm, *n.* [-TA, *pl.*] [L.] A ligament.

—**ligamenta arcuata** (*Anat.*), tendinous arches, to which the diaphragm is attached posteriorly. The *external* one extends from the tip of the last rib to the transverse process of the 1st or 2d lumbar vertebra; the *internal* one from that transverse process to the body of the corresponding vertebra; the *middle* one across the bodies of the upper lumbar vertebræ uniting the crura of the diaphragm.—**ligamenta flava, ligamenta subflava**, ligaments containing much yellow elastic tissue, that pass between the neural laminæ of the vertebræ, from the ventral surface of one lamina caudalward to the adjacent margin of that next in order.—**ligamentum arteriosum**, a fibrous band connecting the pulmonary artery and the arch of the aorta in the adult: a relic of the ductus arteriosus of the fetus.—**l. nuchæ**, an important elastic band of fibrous tissue at the middle of the back of the neck of various animals. It is a forward prolongation of the supraspinous ligaments, and proceeds from the cervical neural spines to the skull, helping to support its weight.—**l. patellæ**, a continuation of the powerful common tendon of the extensor muscles of the thigh, extending from the patella to the tuberosity of the tibia.—**l. teres.** *Anat.* **1.** A flattened band of fibrous tissue that extends from a depression in the head of the femur to the margin of the acetabular notch. It probably has but little function as a ligament. **2.** Any round ligament.

li'gan, 1 lai'gən; 2 lī'gan, *n.* *Law.* Goods cast adrift or sunken at sea with something attached to float, as a

buoy, as evidence of ownership. [Apparently < L. *ligamen* (< *ligo*, tie), band: but cp. LIE.] **lă'gan.**

Li-ga'ri-us, 1. (-rĭ-ŭs), *n.* [P. L.] A tropical tree (*Semecarpus perrottetii*) yielding a resin used for illuminating purposes. The wood is of no value, except for fuel.

li'gate, 1. (-gāt), *a.* [Lat. *ligatus*; pp. of *ligo*.] Tied; bound. 2. (-gāt), *v.t.* To bind with a ligature; bandage. [< L. *ligo* (pp. *ligatus*), tie.]

li-ga'tion, 1. (-gā'shon; 2 li-gā'shon, *n.* 1. The act of tying or binding up, especially of an artery: also, the constriction of being bound. 2. Something used in tying; bandage.—**distal ligation** (*Surg.*), the tying of an artery, in curing aneurism, on the side of the dilatation farthest from the heart.—**immediate l.** (*Surg.*), the ligation of an isolated artery without including with it any of the surrounding tissue.—**medial l.** (*Surg.*), the ligation of an artery which includes also some of the neighboring tissue.—**proximal l.** (*Surg.*), the tying of an artery, in the cure of aneurism, by a ligature around the affected part between the heart and the dilated portion of the artery.

li-ga'tor, 1. (li-gā'tŏr; 2 li-gā'tŏr, *n.* A surgical instrument for tightening a ligature or keeping it in place. **li-ga'tŭre.**

lig'a-ture, 1 (lig'a-tūr; 2 lig'a-tūr, *n.* *pl.* [LL.] Ligatures: an old system of connecting notes whereby only one syllable is to be sung to all the notes in one ligature.

lig'a-ture, 1 (lig'a-chur *or* -tūr; 2 lig'a-chur *or* -tūr, *v.t.* [-TURED; -TUR-ING.] To bind or compress with a ligature.

lig'a-ture, *n.* 1. Anything that constricts, or serves for binding or tying; specif., a thread, usually of silk, catgut, or wire, tied around an artery or other part to arrest bleeding or for removing a tumor. 2. A tying or binding; ligation. 3. In writing and printing: (1) Two or more connected letters, as fi, fl, ffi, æ: usually called by printers a character or logotype. (2) The character to indicate connection.

> In the earlier monumental scripts the letters are separate, but in some of the Egyptian papyri certain letters are united by ligature, and at the same time a connection is established between the words. I. TAYLOR *The Alphabet* vol. i, p. 263. [N. Y. & CO.]

4. *Mus.* (1) A band, tie, or other character connecting two or more notes; a slur. (2) A curved line over a slur, indicating that they are to be sung or played continuously. (3) In counterpoint, a contraction or syncopation. (4) In medieval music, a compound note-form including several tones or to be slurred or sung in one syllable. 5†. Impotence magically induced. [F. < LL. *ligatura*, < L. *ligo*, bind.] —**provisional ligature** (*Surg.*), a broad ligature placed around a large artery and tied after an operation, to facilitate its completion.—**soluble l.** (*Surg.*), a ligature made of material that will ultimately be absorbed by the tissues through which it passes.

Lig'ea, 1. (lij-ē'a; 2 lij-ē'a, *Myth.* One of the three sirens. [Gr., sweet-voiced or shrill.] [river. **Lig'er-ist.**

Lig'er, 1 lig'ar; 2 lī'gĕr, *n.* The ancient name of the Loire

ligget, *n.* To lie; recline. **lige.**

lig'ger, *n.* To fish with a ligger. See LIGGER, *n.*, 3.

lig'ger, 1 lig'ar; 2 lig'er, *n.* [Prov. Eng.] 1. A horizontal member in a scaffolding; a ledger or ledger-piece. 2. An under millstone or bedstone. 3. A fishing line with a float and bait for pike-fishing. 4. A coverlet. 5. A board pathway over a ditch. 6. A bait or spent salmon. 7. *Weaving*, one who places the material on a candlepin machine.

Lig'gett, 1 lig'at; 2 lig'et, **Hunter** (?-1857-). An American lieutenant-general in World War; Commander of First American Army, 1917-18, and Army of Occupation in Germany.

light[1], 1 lĭt; 2 līt, *v.* [LIGHT'ED *or* LIT; LIGHT'ING.] **I.** *t.* 1. To set fire to; ignite or inflame: used also figuratively. 2. To enlighten or illuminate with light: commonly with *up*; as, the flame *lighted up* the cavern.

3. To conduct by means of a light; furnish with a light. **II.** *i.* 1. To take fire; become ignited; kindle; as, the wood *lights* readily. 2. To become bright or luminous: reflect or receive light; as, the peaks *light* up at dawn. [< AS. *hihtan*, < *hiht*, light.]—**light'a-bi(e)**, *a.*

light[2], *vi.* [LIGHT'ED *or* LIT; LIGHT'ING.] 1. To descend and stay down after flying; rest or perch. 2. To happen or stumble, as by chance or accident: with *on or upon*, formerly with *into* or *of*; as, sometimes we *light upon* unpleasant truths. 3. [Local, U. S., & Archaic.] To descend, as from a horse, mule, etc., or from a carriage; dismount; alight. 4†. To feel happy. [< AS. *ihtan*, < *ūht*, light.]—**to light into** [Slang, U. S.], to assail, as a person: to fall upon, as food.—**to l. on or upon.** 1. To fall upon, as a person, with blows. 2. To chance upon; meet with; discover.—**to l. out** [Slang, U. S.], to abscond; depart in haste.

light[3], *a.* [LIGHT'ER; LIGHT'EST.] 1. [Prov. Eng.] To deliver, as of a child. 2. To lighten: obsolete except in the phrases.—**to light along** (*Naut.*), to move forward by lifting and carrying: said of a sail or cable.—**to l. up** (*Naut.*), of slackin.

light[4], *a.* 1. Full of light; having light; bright; clear; as, a *light* room. 2. Reduced in color; pale or whitish; as, a *light* shade of orange. [Archaic.] [light.]

light[5], *a.* 1. Having little weight; of small weight by comparison; not heavy; as, *light* as air. 2. Easy to carry, handle, move, etc.; not taxing to the muscles or digestive organs; not burdensome; as, a *light* task; *light* food. 3. Free from that with which one is not heavily loaded; as, *light* troops; a *light*-ballasted vessel.

> The legions had come *light*, without tents or baggage.
> EMERSON *Misc.*, 202. [S. 1879.]

4. Of no great consequence; lacking gravity; trivial; unimportant; as, a *light* affliction; a *light* error. 5. Lacking in intensity or effect; moderate; as, a *light* remark; a *light* wind; a *light* sensation; applied to wind, denoting a force of less than 6 miles an hour. 6. Free from anxiety, trouble or distress; not burdened with care; cheerful; as, *light* of spirits. 7. Not in full possession of the senses; flighty; dizzy; as, *light* in the head. 8. Below the proper weight; short in weight; as, a *light* coin. 9. Well leavened and raised; not soggy; as, *light* bread. 10. Loose or sandy; as, a *light* soil. 11. Characterized by levity; without dignity or substantial character; also, loose in morals; as, she is inclined to be *light*. 12. Handling or touching with slight force; hence, easy; graceful; as, a *light* touch; a *light* style. 13. [Rare.] Suitable for light work. 14. [Rare.] Lacking in nutrition. 15. [Prov. Eng.] Sickly; weak. 16. *Falconry*. Flying toward its feeding-ground (*i. e.*, not heavy because of a full stomach): said of a falcon. 17. (1) *Pros.* Having no metrical stress: said of a syllable or vowel. (2) *Sanskrit gram.* Having a short vowel: said of a syllable. 18†. Evanescent. [< AS. *leoht*, light.] SYN.: see AIRY.—**light'armed"**, *a.* Provided with such arms and accouterments as are light and convenient to carry; as, *light armed* cavalry.—**l. bob** [Slang, Eng.], a thin Irishman.—**l. bread** [So. U. S.], bread made of wheat flour, in distinction from that made of corn meal.—**l. eater**, one who habitually eats a small quantity of food.—**l. ending** (*Pros.*), such a word as *am, are, be, can, could, do, does, has, had*, used at the end of a verse.—**l.-fingered**, *a.* 1. Overapt in picking up with the fingers; addicted to petty theft; thievish.

There was a yokel looking up at the fenced chancel, while the *light-fingered* folk are operating upon their pockets behind. THACKERAY *Vanity Fair, Before the Curtain* p. 5. [S. 1869.]

2. Light or graceful in touch; as, a *light-fingered* pianist.—**l.-foot**, *a.* [Poet.] Light-footed.

> The joyous Nymphs and *light-foot* Fairies,
> Which thither came to hear their music sweet.
> SPENSER *Tears of the Muses* st. 6.

—**l.-footed**, *a.* Nimble in running or dancing.—**l.-limbed**, —**l.-footedly**, *adv.*—**l.-handed**, *a.* 1. Not having a full complement of hands or assistants, as a two skiper or vessel: short-handed. 2. Having little to carry; as, the sportsman returned *light-handed*. 3. Having ability to use the hands lightly; as, a *light-handed* masseur.—**l.-handedness**, *n.*—**l.-headed**, *a.* Having little brain; frivolous; thoughtless; delirious or flighty.—**l.-head**, *n.*—**l.-headedness**, *n.*—**l.-hearted**, *a.* Free from sorrow; cheerful; gay.—**l.-heartedly**, *adv.*—**l.-heartedness**, *n.*—**l.-heeled**, *a.* 1. Same as LIGHT-FOOTED. 2†. Of light or loose character.—**l.-horse**, *n.* Cavalry bearing light arms and equipments.—**l.-horseman**, *n.*—**l. in the mouth**, insensitive to the bit: said of a horse.—**l.-legged**, *a.* Able to run swiftly: swift-footed.—**l. line**, the waterline of a ship when at light displacement.—**l.-minded**, *a.* Having little serious or steady mind; frivolous; foolish.—**l.-mindedness**, *n.*—**l. sails** (*Naut.*), skysails, studdingsails, flying jibs, and the like, used on ships only when very light winds prevail.—**l. sand**, *a.* Same as LIGHT, *a.*, 10. an unloaded vessel: in the expression *lightwater draft*. See DRAFT, 3.—**l.-weight**, *a.* 1. *Sporting*. Of light weight; according to the accepted system of rules, weighing 133 pounds; below the welter-weight and above a feather-weight; as, a *light-weight* boxer. 2. Hence, of little account.—**light'-weight"**, *n.* One who or that which is of light weight.—**l.-witted**, *a.* Feebleminded; idiotic.—**to make l. of**, to treat as of little consequence; slight or disregard.—**to set l. by**, to undervalue or despise.

> If this *light* be from God, we must search out the reason of that worth with men, what is heaven, than God commendeth it? BUNYAN *Works, Pilgrim's Progress* p. ii, p. 191. [S. & C. CO. 1874.]

light, *n.* 1. (1) That form of radiant energy or movement of the ether-waves which is capable of acting upon the eye in such a way as to make visible the object from which it comes; the illumination or radiance that is apprehended by the sense of vision; as, the *light* of the sun. (2) The wave-movement which, in its passage in part, travels with a speed of about 186,000 miles per second, depending somewhat upon the medium.

The chief phenomena concerned, whose existence is independent of any theory, are **reflection, refraction, dispersion, interference,** and **polarization.** See these words. According to the **undulatory theory,** now generally received, radiant energy is propagated through space in waves that vary in length, and only those that affect the eye are known as *light*, the others being spoken of as **dark heat, chemical rays,** etc., according to the effect they are regarded as producing, the these effects are produced also by light-rays. Recent experiments show that electromagnetic induction is propagated in waves that have all the properties except the visible, and therefore the rules of the theory now generally accepted is that light-waves are generated by the oscillation of electric charges. The old **corpuscular emission** or **Newtonian theory** is now considered, tho its terms still remain in literature and affect thought, supposed the propagation of light to be by an actual transfer of material particles. See PHOTOMETRY; SPECTRUM.

(3) The sensation produced by exciting the visual organs, consisting of the eye, the optic tracts, and the visual cortex of the brain.

> For her [woman] Materialism means more utter ruin than for man, for it extinguishes the ideal which in her alone *light* of life.
> GRANT ALLEN *On Right and Wrong* p. 36. [C. & N. 1890.]

3. That which admits light; a window or part or pane of a window through which light comes; as, a sky*light*; one *light* was broken in the sash. 4. The state of visibility; openness to view; hence, common observation; publicity, exposure; as, "the thing that is hid bringeth he forth to *light*," *Job* xxvii, 11. 5. The period when the light of day is visible; esp., daytime, as the dawn of day; as, "God called the *light* Day." *Gen.* i, 5. 6. The point of view from which, or circumstances in which, a thing is seen or considered; aspect; as, in the *light* of new facts the question is altered.

It is the common opinion of human souls, and its nature stands before our mind in quite a different light since man has been taught to know and feel himself as a member of one great family.
MAX MÜLLER *Chips* vol. ii, p. 6. [S. 1873.]

7. The manner in which the light falls on a picture or the like; as, it is in just the right *light*. 8. In art, a part of a picture which represents luminous effect.

> There are shades in all good pictures, but there are *lights* too, if we choose to contemplate them.
> DICKENS *Nicholas Nickleby* p. 33. [C. & N.]

9. The power of vision; perception; intelligence; as, the *light* of an active mind; "the *light* of the body is the eye." *Matt.* vi, 22. 10. Prosperity; felicity; heaven; as, "the saints in *light*." *Col.* i, 12; "*Light* is sown for the righteous." *Ps.* xcvii, 11. 11. Something with which to enkindle or make a blaze or light; as, a *light* for a pipe. 12. *Law.* The right to have the light of one's windows and doors unobstructed. 13. A gleam or brightness in the eye, expressive of feeling or animation; as, the lover *light* in her eye. 14. *pl.* [Slang.] The eyes. 15. An aid to the solution of a puzzle or the like; as, the *lights* of an acrostic. 16. *Mech.* A clear space or opening. 17. One who illuminates his fellow men or serves as a model; one notable for wisdom; as, "He was a burning and a shining *light*." *John* v, 35. 18†. One who carries a light. [< AS. *leoht*, light.]

SYN.: blaze, flame, flash, flicker, glare, gleam, glimmer, glistening, glitter, glow, illumination, incandescence, scintillation, sheen, shimmer, shine, shining, sparkle, twinkle, twinkling. A *flame* is both hot and luminous; it it contains few solid particles it will yield little *light*. The it may afford intense heat, as in the case of a hydrogen-*flame*. A *blaze* is an extensive, brilliant *flame*. *Light* is the general term for any luminous effect perceived by the eye, from the faintest phosphorescence to the *blaze* of the noonday sun. A *flare* is a wavering *flame* or *blaze*; a *flash* is a *light* that appears and disappears in an instant; as, a *flash* of lightning; the *flash* of gunpowder. The *glare* and *glow* are steady; the *glare* painfully bright, the *glow* subdued; as, the *glare* of torches; the *glow* of dying embers. *Shine* and *shining* refer to a steady or continuous emission of *light*; *shine* is often *shining*, usually by reflection. *Glimmer, glitter*, and *shimmer* denote wavering *light*. We speak of the *glimmer* of distant lamps through the mist; of the *shimmer* of waves in sunlight or moonlight. A *gleam* is not wavering, but transient or intermittent; a sudden *gleam* of *light* came through the half-open door; a *gleam* in a warrior's eye; the *glitter* of burnished arms. A *sparkle* is a sudden *light*, as of sparks thrown out; *scintillation* is the more exact and scientific term for the actual emission of sparks, also the figurative term for what suggests such emission; as, *scintillations* of wit or of genius. *Twinkle* and *twinkling* are used of the intermittent *light* of the fixed stars. *Glistening* is a *shining* as from a wet surface. *Illumination* is a widespread, brilliant *light*, as when all the windows of a house or of a street are lighted. The *light* of *incandescence* is intense and white like that from metal at a white heat.—**ARR:** Haze, dimness, dullness, murkiness, gloom, gloominess, obscurity, shade, shadow.—**absorption of light**, the disappearance of a portion of the light which falls on any substance and fails to be reflected or to pass through, most marked in opaque bodies, least in transparent ones. The **coefficient of absorption of light** is the constant K in the formula $\frac{A_0}{A_1} = \frac{1}{e^{-2Kx}}$, where e is the base of natural logarithms, A_0 the amplitude of the incident ray, and A_1 its amplitude when one wavelength in the refracting medium.—**aerial l.**, a light dropped from a balloon, sometimes with a parachute, for illuminating objects below: used in war.—**Aluminum l.**, a bright sunlight nearly as brilliant by the gas being saturated close to the burner with a hydrocarbon.—**anchor l.** (*Naut.*), a white light shown by a vessel at anchor. See quotation.

A vessel under 150 feet in length, when at *anchor*, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a globular lantern so constructed as to show a clear, uniform, and unbroken light visible all round the horizon at a distance of at least a mile. *Lloyd's Calendar, Regulations for Preventing Collisions at Sea* p. 149. [LLOYD'S REGISTER.]

—**ancient l.** (*Law*), a window opening toward the property of another, unobstructed for twenty years, which gives the owner of the house the right to its light free from molestation: law in England, Ireland, and some of the United States.—**arc'-light**, *n.* See ELECTRIC LIGHT, under ELECTRIC.—**ashen l.**, the faint illumination of the part of the moon without the bright crescent, by sunlight reflected from the earth: a translation of the French *lumière cendrée*.—**Auer l.** or **burner**, same as WELSBACH BURNER. See under BURNER.—**beam l.**, an inverted light: same as *broad light*.—**Bengal l.**, any steady colored fire, as for signaling. See FIRE.—**between the lights**, between daylight and the time of artificial lighting; the period of twilight.—**between two lights** [Colloq.], during the night; between two days.—**Boccius l.**, a gas-burner having two concentric metallic cylinders over the flame, inside a chimney.—**borrowed l.**, *light* derived from without, as that of a reflecting object: often figuratively.

> E'en such is man, whose *borrowed light*
> Is straight called in, and paid to-night.
> HENRY KING *Life* l. 7.

—**Bude l.**, an Argand flame produced by burning illuminating gases with a current of oxygen.—**Bude-light**, *v.t.* To flash-*light* made by blowing powdered resin and magnesium through an alcohol-flame.—**Children of l.**, the Society of Friends: a name assumed in their earliest meetings, from John xii, 36, but later often disclaimed.—**clearance l.**, a lamp on a launch showing a bow-light in front and red and green lights at the sides.—**cone of l.**, same as LIGHT-SPOT, 2.—**Coston lights** (*Naut.*), colored lights used as signals for distress by ships at sea and by the life-saving service: sometimes used as plain green, red, white, or blue lights or as a pyrotechnic light.—**double l.**, a pair of lighthouse lights shown on separate towers, or of intermittent lights.—**efficiency of a source of l.**, the ratio of luminous to total energy in a source of light.—**emission l.** (*Lighthouse*), an artificial light that may be carried about, employed when unloading cars.—**fixed l.**, a lighthouse showing beams constant in direction, and in duration: distinguished from revolving, intermittent, and flash lights.—**floating l.** An artificial light shown at the masthead of an anchored vessel. 2. A light-ship. 3. A buoy bearing a light.—**Friends of l.**, Free Congregationalists.—**glow-l.**, n. An incandescent electric light. 2. One of a row of lights illuminating the base of a scene, as in a theater.—**Gurney l.**, same as BUDE BURNER.—**Holmes l.**, a device for measuring the intensity of a beam of light, consisting of a selenium cell, which, when thrown into the water, ignites and furnishes a brilliant light.—**Holmes signal.**—**incandescent l.** A light caused by incandescence. 2. An incandescent electric lamp.—**incandescent l.**, see ELECTRIC LIGHT, under ELECTRIC.—**intermittent l.**, a lighthouse light eclipsed at regular short intervals.—**light'-as-pose"**, *n.* Same as ACCOSTREMENT, 2.—**l.-ball**, *n.* *Mil.* A canvas sack filled with an illuminating composition: burned to throw light, as upon an opposing force or their works.—**l.-boat**, *n.* A boat to carry the magazine of a war-ship. 3†. A box containing the substance by which early matches were ignited.—**l.-buoy**, *n.* A buoy which carr es a light at night; also, a buoy which ignites a light on contact with the water.—**l.-colored**, *a.* Same as LIGHT, *a.*, 1.—**l.-dues**, *n.* The length of space traversed by light during a century.—**l.-curve**, *n.* *Astron.* A curve used to illustrate in graphic manner the functions of brightness and magnitude.—**l.-demanding**, *a.* *Forestry.* Same as INTOLERANT, 3.—**l.-dues**, *n. pl.* Tolls levied on ships navigating certain waters, for the maintenance of lighthouses, etc.—**l.-duty**, —**l.-equation**, *n.* See EQUATION OF LIGHT, under EQUATION.—**l.-filter**, *n.* Same as COLOR-SCREEN.—**l.-flaw**, *n.* The flow of light that in one second crosses a given surface.—**l. horseman**, *n.* 1. Same as LIGHT-HORSEMAN. 2. The spadefish. 3. [Slang, Eng.] A thief frequenting the banks of the Thames river, London, and obtaining money by false salvage.—**l.-iron**, *n.* An iron stand for a candle or lamp: not now in use.—**l.-keeper**, *n.* A person who takes care of the light in a lighthouse or light-ship.—**l.-maker**, *n.* One which makes or gives light, as a star.—**l.-mill**, *n.* Same as RADIOMETER, 1.—**l.-moderator**, *n.* An appliance on a microscope, consisting of two glass disks, one red, the other blue, used to neutralize the tint of any artificial light and produce a white light.—**l.-money**, *n.* Money levied and

devoted to the maintenance of lighthouses; light-dues.— **l. of nature.** 1. The capacity for apprehending truth that is natural or innate to man, independently of sense-experience, especially as used by Descartes and his followers. 2. *Theol.* The ability to perceive religious truth without supernatural revelation.— **l. of one's eyes,** a person deeply beloved; a special favourite.— **l. of the countenance,** favorable regard: chiefly a Scriptural use.— **l. of the world,** Jesus Christ. *John* vii, 12.— **l.-organ,** *n.* An organ in the thorax or abdomen of an insect, by which it makes itself visible.— **l.-pillar,** *Meteor.* A luminous column sometimes seen extending vertically from the sun or moon, when either of these bodies is near (above or below) the horizon: a form of parhelion.— **l.-pipe,** *n.* An opening to let light into a vessel's hold.— **l.-pressure,** *n.* Pressure exerted by light where it falls, and also on the source of light by reaction.— **l.-radio,** *n. Astron.* A number, 2,512, used to multiply the light of a star of a given magnitude, so that it may equal the light of a star in brightness precisely one magnitude brighter.— **l.-room,** *n.* 1. *Naut.* A small room next the powder-magazine in a war-vessel, having in the partition between them thick glass panes through which the latter is illuminated, thus avoiding the danger of explosion; light-box. 2. The chamber containing the lighting-apparatus of a lighthouse; lantern.— **l.-scot,** *n. Old Eng. Law.* A tax, payable three times a year, of a halfpenny per hide of land, for providing altar-candles.— **l.-shoot,** *n.*— **l.-screen,** *n. Forestry.* A frame for the partial shading of a seed-bed. Gifford Pinchot *Terms Used in Forestry, U. S. Dept. of Agr., Bulletin No. 17,* 1905.— **l.-spot,** *n.* 1. *Bot.* A cell-eyelopsm back-wall area which is susceptible to illumination by sunlight. 2. Same as cone of light. See cone.— **l.-standard,** *n.* See candle and standard.— **l.-struck,** *a. Phot.* Injured by exposure to actinic rays; fogged: said of a sensitized plate when spoiled by undue exposure.— **l.-tight,** *a.* Impenetrable by light-rays.— **l.-vector,** *n.* A vector of direction showing the magnitude direction of the light-disturbance at any point in a region traversed by polarized light.— **l.-vessel,** *n. Naut.* A light-ship.— **l.-wave,** *n.* A wave or undulation of light.— **northern lights,** the aurora borealis.— **oxycalcium-l.,** *n.* A lime-light.— **oxyhydrogen-l.,** *n.* The light formed by directing two mingling streams of oxygen and hydrogen while burning, upon a cylinder of lime. **Drummond l.;; lime-l.;; oxyether l.;; oxygas l.;.— patent l.,** a window made of extra thick glass used in vaults and pavements.— **platinum standard l.,** the light given out by a square centimeter of platinum at solidifying temperature.— **position l.,** *n.* A ship's night light when in sight of other vessels.— **quarter-l.,** *n.* A side window in a closed vehicle, distinct from that in the door.— **revolving l.,** a lighthouse light that, by means of revolving reflectors, alternately disappears and then reappears and shines with increasing brightness.— **ruby l.** (*Phot.*), a non-actinic red dark-room light.— **running lights,** the lights carried by a vessel between sunset and sunrise, red on the port, green on the starboard side, showing ahead. If moving, a steam-vessel carries, in addition, a white light at the foremast-head (two if towing one or more vessels or rafts).— **secondary l.,** an accessory light in a picture, as a light from a window in a lighted scene.— **shining l.,** one who possesses exceptional intellectual attainments; an eminent person; luminary.— **spot-l.,** *n.* [U. S.] Light concentrated and thrown upon some number, as a song, as an actor; hence, figuratively, a conspicuous position; prominence.— **stay-l.,** *n.* A light depending from the forestay of a vessel at anchor.— **taper l.,** *Gr. ch.* The great feast of the Epiphany. 2. *Jewish Ch.* The feast of the Dedication.— **the l. of the countenance,** kindly recognition; favor.— **to come to l.,** to be discovered or comprehended.— **to see l.,** to see a possible way out of a difficulty; begin to understand something; begin to apprehend the truth of anything.— **to see the l.** To come into notice; come into view; be born; be published.— **to stand in one's own l.,** to obstruct that which is to one's own advantage.— **to throw l. on,** to make clear.— **voltaic l.,** an arc-light.

light, *adv.* 1. Not with full weight or value. 2. Without exertion or effect; easily. [< AS. *leōhte,* < *leoht,* light.]

light'ball', 1. **-due,** etc. See under LIGHT, *n.*

light'brain', 1 lait'brān'; 2 lit'brān', *n.* One of weak intellect.

light'ecourse', 1 lait'-kōrs'; 2 lit'-cōrs', *n. Sugar-making.* A copper band about the middle of the top of a sugar-clarifying pan, to prevent the syrup from boiling over.

lighted†, *imp.* of LIGHT‡, *v.*

light'en‡, 1 lait'n; 2 lit'n, *v.* **I.** *t.* 1. To make light or more light; illumine; as, to *lighten* a room by opening the shutters. 2. To make clear or understandable; enlighten; as, to *lighten* the mind. 3. To make lighter in shade, or add high lights to; as, to *lighten* a painting. 4. [Archaic.] To relieve of sorrow or sadness.

They looked unto him, and were *lightened.* Ps. xxxiv, 5.

5. [Rare.] To emit or radiate; as, to *lighten* forth an angry flash.

II. *i.* 1. To become or grow lighter; as, the sky *lightens;* the fabric *lightened* in the wash. 2. To display a sudden light, as lightning; emit lightning.

light'en‡, *v.* **I.** *t.* 1. To reduce in weight; make less heavy; relieve of weight; as, to *lighten* a ship by throwing the cargo overboard. 2. To make less burdensome; render less oppressive; alleviate; as, to *lighten* grief.

Hitherto it is questionable if all the mechanical inventions yet made have *lightened* the day's toil of any human being.

Mill *Political Economy* bk. iv, ch. 4, p. 518. [A. 1883.]

3. To relieve from distress; gladden.

II. *i.* To become less burdensome or heavy.

light'en‡, *vt.* To settle down; descend. S. S.

light'end, *pp.* Lightened.

light'en-er, *n.* [Rare.] An illuminator; that which flashes lightning.

light'en-ing, 1 lait'n-iŋ; 2 lit'n-iŋ, *n.* 1. A becoming bright; daybreak. 2. *Metal.* A peculiar brightening of molten silver, indicating that maximum purity has been attained. 3. [Rare.] The act of lightening. 4. Lightning.

light'er, 1 lait'er; 2 lit'er, *v.* **I.** *t.* To transport in a lighter or in a similar manner. **II.** *i.* To be in the business of transporting by lighters.

light'er‡, *a. compar.* More slight.

light'er, *n.* 1. *Naut.* A barge or similar vessel, especially one used in loading and unloading ships, etc.

The depth and the supply of water for a navigable canal must be proportioned to the number and tonnage of the *lighters,* which are likely to carry goods upon it. Adam Smith *Wealth of Nations* vol. ii, bk. v, ch. i, p. 371. [w. L. & co.]

2. A barge for transporting railroad-cars.

light'er‡, *n.* 1. One who or that which lights or illuminates. Specif.: (1) A mechanical device for lighting a gas-jet. (2) A twisted piece of paper, a torch, or the like, for lighting. 3. *Woolen-manuf.* Any one of successive layers of wool that are to be blended.

light'er-age, 1 lait'er-ij; 2 lit'er-*aj, n.* 1. The price for unloading a ship by lighters, or for the use of lighters. 2. The removal of a cargo by lighters.

light'erd, *pp.* Lightered. S. S.

light'er-man, 1 lait'er-man; 2 lit'er-mān, *n.* [-men, *pl.*] *Naut.* A man managing or employed on a lighter.

light'er-screw'†, 1 lait'er-skrū'; 2 lit'er-scrū', *n.* A screw for adjusting the distance between millstones.

light'er-staff', 1 lait'er-staf'; 2 lit'er-stăf', *n. Milling.* A lever by which the adjustable end of a bridge-tree may be lifted. Knight.

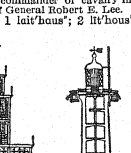
light'er-than-air', *a.* Less in weight than the air displaced: said of an airship. Orville Wright.

light'est, *a. superl.* of LIGHT, *a.* See under LIGHT, *a.*

light'foot'‡†, *n.* [Old Slang.] Venison.

Light'foot', 1 lait'fut; 2 lit'fōōt, *n.* 1. **Hannah,** an English Quakeress; alleged to have been secretly married to George III., about 1758. 2. **John** (?/₂1602–⁸/₄1675), an English divine and Hebraist. 3. **John** (?/₂1735–⁵/₁₀1788), an English botanist and curate. 4. **Joseph Barber** (¹⁰/₁₁1828–⁸/₂₃1889), Biblical critic; Bishop of Durham.

light'foot'ed, 1. **-headed,** etc. See under LIGHT, *a.*



light'full, *a.* [Rare.] Full of light; bright.—**-ness‡,** *n.*

light'ful, *a.* [Rare.] Light of heart; cheerful.—**-ness‡,** *n.*

light'heeled', 1 lait'-hīld'; 2 lit'-hēld', *a.* Walking or running with little apparent effort. See LIGHT‡, *a.*

Light'-Horse' Harry. Sobriquet of General Henry Lee (1756–1818), commander of cavalry in the Revolutionary war; father of General Robert E. Lee.

light'house', 1 lait'haus'; 2 lit'hous', *n.* A tower or other structure bearing at the top a lamp or lamps, erected at the entrance of a port, on a shoal, or at a point of danger on the coast, for guiding navigators by night; a pharos. The primitive lighthouse was a fire on an eminence or on the top of a rude stone tower. From the middle of the 18th century candles and lamps were used. The modern lighthouse illuminates by means of powerful electric arc, electric incandescent lamp, incandescent lamp-mantle lamp using oil-vapor or gas, acetylene-gas, or cavalry in multiple concentric wick, from which the light is gathered and directed toward the horizon by some form of optical apparatus like the Fresnel lens. The light produced may be white or colored, fixed, flashing, intermittent, or occulting according to the type of optical apparatus or mechanism used. By the differences so produced individual lights can be identified, and the part of the coast known. Many modern lighthouses are constructed of hard stone, such as granite, or of cement-concrete faced with stone; others are constructed of steel, on a foundation of stone or concrete, or are iron skeleton structures on iron piles driven into the coral reefs, or supported on and drawn into sand shoals by disk-like screws (screw-piles). The Bell Rock lighthouse on Inchcape reef, off the coast of Scotland, is 139 feet high to the base of the lantern; the new Eddystone lighthouse in the English Channel, 132 feet high from high-water level to the focal plane of the lantern; the Minot Ledge lighthouse, Massachusetts Bay, 85 feet high. The distance at which lights can be seen is, in some instances, very great. The holophotal light (an oil-light) of Alleppi at Travancore is visible 28 miles; a gas-light, 30 miles; a flash-light of 1,000,000 candle-power, 40 miles. The tower of Navesink, N. J., has a light-equipment equal to 90,000,000 candle-power; its light might be seen for a distance of 140 miles. By law, in the case of survivors, sailors do not "pick it up" until they come within a distance of about 22 miles. See illus. under PROJECTOR.

— Lighthouse Board. 1. [U. S.] A board formed in 1789 and reorganized in 1852, having control of the construction and management of lighthouses, beacon-lights, etc., on the coast. This board was abolished by act of Congress, June 17, 1910, and its place taken by the **L. Bureau.** 2. [G. B., pl.] (a) The corporation, known as Trinity House of London, which was chartered in 1514, and is the general lighthouse authority for England and Wales, the Channel Islands, and Gibraltar, with 11 districts under its jurisdiction. (b) The Northern Lighthouse Board of Scotland, chartered in 1786. (3) The Irish Lighthouse Board, chartered in 1786. [lighthouse.

light'house-keep'er, *n.* An employee having charge of a

light'ing‡, 1 lait'iŋ; 2 lit'iŋ, *n.* 1. The science, theory, system, or means of providing natural or artificial illumination in a building. 2. *Metal.* Annealing.

— electric lighting, the lighting of several buildings or places by currents from a single station, as distinguished from isolated lighting, in which each place is supplied with a current from its own source.

light'ing², *n.* The act of alighting or descending to the ground, as from horseback.

light'ly'man, 1. **keeper,** etc. See under LIGHT, *n.*

light'ish, 1 lait'ish; 2 lit'ish, *a.* Somewhat light.

light'less, 1 lait'les; 2 lit'les, *a.* Having or giving no light; dark.—**light'less-ly,** *adv.*—**light'less-ness,** *n.*

—Light-loving. Lively dart-filled with love.
Bulwer-Lytton *Lost Tales of Miletus, Orend's Son* st. 114.

light'ly, 1 lait'li; 2 lit'li, *v. t.* [Scot.] To make light of.

light'ly, *adv.* 1. With little weight or pressure; softly; as, his trials affect him *lightly.* 2. Without heaviness of spirit; cheerily; light-heartedly; airily; playfully. 3. With levity; carelessly; heedlessly; also, frivolously, irreverently, or wantonly. 4. In a slight degree. 5. On grounds of little weight. 6. With light step or motion; nimbly. 7. Without effort or strain; easily; readily.

By an almost universal law of our nature, money *lightly* gained is *lightly* spent. T. Arnold *Modern Hist.* lect. iii, p. 166. [A. 1874.]

8†. Usually.

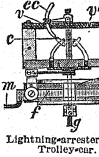
light'man, 1 lait'man; 2 lit'mān, *n.* 1. A light-keeper. 2. A linkman.

light'ness', 1 lait'nes; 2 lit'nēs, *n.* The condition or quality of being light or bright; clearness; brightness; as, the *lightness* of day; *lightness* of hue.

light'ness', *n.* 1. The condition or quality of being light or not heavy; levitation and *lightness* of a feather. 2. Ease or elasticity of movement; agility; grace; facility; as, *lightness* of touch. 3. Levity of mind or conduct; frivolity; dissoluteness. 4. Buoyancy; volatility; sprightliness. 5. In cookery, sponginess.

light'ning', 1 lait'niŋ; 2 lit'niŋ, *n.* 1. A sudden flash of light caused by the discharge of electricity between two electrified regions of cloud, or between a cloud and the earth; the discharge itself. When the discharge is between a cloud and the earth, it may destroy any poorly conducting materials it encounters.

The disruptive lightning-discharge differs from an artificially produced discharge by being at the same time of very great quantity and very high potential, sometimes crossing an interval of a mile or more. In other respects it is like the spark from a Leyden jar, following a sinuous path, producing its light by heating the dielectric along that path to incandescence, and causing a detonation. See THUNDER.



If you are near a person who has been struck by *lightning,* . . . try to stimulate the respiration and circulation, and do not cease in the effort to restore animation for at least one hour.

A. Meadie in *Popular Science Monthly* Aug., 1893, p. 453.

2. A lightening or brightening; a growing bright; illumination.

In the golden *lightning* of the sunken sun.
Swinburne *To a Skylark* st. 3.

— **beaded, chapleted,** or **pearl lightning,** that appears as a string of brilliant beads.— **chain l.,** a long flash of lightning occasionally branched at one or both ends, and often called forked l., a passing between clouds or a cloud and the earth, and appearing to follow a zigzag course.— **fillet or ribbon l.,** lightning in which several parallel discharges together appear like a band or ribbon.— **globe, globular, or ball l.,** lightning-discharge presenting a moving ball of fire, destructive to objects in its path, and sometimes disappearing with an explosive sound. Its reality is doubted.— **Lightning-arrester** [U. S.], a device for protecting electric instruments from lightning by deflecting the discharge to the ground. It usually consists of a low resistance lead to the earth, whose terminal plate is insulated from the line by a thin sheet of mica, or by a very small air space between two toothed plates, the lightning perforating the one, or jumping across the other in its downward pass up the ground. **l.-discharger;; l.-protector,** etc. See **-rod,** *n.* Same as FULGURITE.— **l. brace,** a bit-brace consisting of two principal parts, a sleeve, analogous to a bolt and nut. The threads consist of extremely coarse pitch, the rod may be rapidly rotated by moving the sleeve back and forth upon it.

Lightning-arrester for a Telegraph Trolley-wire.

If the lightning runs down the trolley, it reaches the arrester by the wire *i,* passes through the lead fuse, *f,* to the earth *e,* then to the *c,* then to the *c,* forming an arc between the carbons. The heat generated by the arc expands the air in the chamber and blows the curved carbon out of its rest, to the other curved carbon, ready for the next discharge. The small continuous current supposed to be a photo-passes off to the ground after the arc is extinguished, the wire *g;* *i* is an insulator.

— **l.-bug,** *n.* [U. S.] A firefly.— **l.-conductor,** *n.* A lightning-rod.— **l.-pains** (*Med.*), severe shooting pains that occur in locomotor ataxia.— **l.-print,** *n.* A mark impressed on the body by lightning, especially on the human body: it commonly assumes a tree-like form, and is popularly supposed to be a photograph of a feature of the landscape.— **l.-proof,** *a.* Protected or proof against lightning.— **l.-recorder,** *n.* See **-rod,** *n.*— **l.-rod,** *n. Elec.* A metallic conductor extending from a short distance above a building or similar structure to a point where it makes good electrical connection with a body of water or of moist earth. Its upper extremity is sharp-pointed, so as to prevent the discharge of strong electric currents toward or from the earth.— **l.-stone,** *n.* **1.** A lightning-tube or fulgurite. **2.** A primitive stone weapon or tool, as an axe-head: popularly so called.— **l.-tooth,** *n.* The tooth of a lightning-rod under water.— **l.-tube,** *n.* Same as FULGURITE.— **rocket l.,** a rare form of lightning, in which a luminous trail appears to shoot up from a cloud like a rocket disappearing in a clear sky.— **sheet l.,** a lightning caused by the reflection of forked lightning; heat-lightning. See HEAT.— **stellar l.,** lightning that appears to radiate in several directions from a point.— **summer l.,** heat-lightning. See under HEAT.— **volcanic l.,** lightning attending a volcanic eruption.— **zigzag l.,** sinuous or irregularly branched lightning, popularly represented as moving in a zigzag manner.

light'ning, *n.* [Rare or Obs.] A making or becoming light or less heavy.

light'o'love', 1 lait'-o-luv'; 2 lit'-o-lōv', *n.* 1. An old dance-tune. 2. A coquettish or wanton woman.

lights, 1 laits; 2 lits, *n. pl.* Lungs, especially of mammals. [< LIGHT‡, *a.*]

light'-ship', 1 lait'-ship'; 2 lit'-ship', *n.* A vessel with a warning light, usually fitted with fog-signals and bells, and moored where a lighthouse would be impracticable.

Light-ship at Sandy Hook.

light'some', 1 lait'sem; 2 lit'som, *a.* Of a light, gay, or cheerful mood or character; blithesome; playful; airy.

Then was Christian glad and *lightsome.* Bunyan *Works, Pilgrim's Progress* pt. i, ch. 6, p. 104. [n. & co. 1874.]

—**light'some-ly,** *adv.*—**light'some-ness‡,** *n.* Cheerfulness; gaiety.

light'some', *a.* Full of light; luminous; light of color.—**light'some-ness',** *n.* Luminousness.

light'-struck', 1 lait'-struk'; 2 lit'-strūk', *a. Phot.* Blurred by accidental exposure to light.

light'-wedge', etc. See under LIGHT‡, *a.*

light'wood', 1 lait'wud'; 2 lit'wōd', *n.* 1. [So. U. S.] Resinous pine, commonly the heart of the yellow pine.

light'wood'‡, 2. An Australian acacia (*Acacia melanoxylon*) yielding a very valuable timber: so called from its lightness of weight. See BLACKWOOD, 1.

light'y†, *a.* Full of light; illuminated.

light'-year', 1 lait'-yir'; 2 lit'-yēr', *n. Astron.* The space traversed in one year by a ray of light, which in air travels at the rate of about 186,000 miles per second. It is employed

as a unit in stating the distances of the stars; thus, the pole star is distant 45 *light-years* from the earth, Capella 71 *light-years*, and Vega 23 *light-years*.

Ign'ager, *n.* Lineage. **Iin'ager.**

Ig-nal'oes, 1 lig-nal'oz or lain-al'oz; 2 lig-nal'oz *or* lin-al'oz (XIII), *n.* **1.** A fragrant Oriental wood; aloes-wood or agallochum. **Ilgne aloe's.** CHAUCER *T. & C. iv.*, l. 1,137.

Where the dew distilled
All night from leakes of old lignaloe's trees.
SPENSER, *Muiopotmos*, 1. 91.

2. The aloes of Scripture, probably the same. *Num.* xxiv, 6. **3†.** Aloes, the drug. [OF., < L. *lignum aloes*, wood of aloes; see LIGNUM and ALOE.]

Ig'nar-ious, l lig'na-ri; 2 lig-nā'ri-əs, *a.* Same as LIGNICOLINE.

Ilgne', l. [F.] Lineage. CHAUCER *T. & C. v.*, l. 1,480.

Ilgne, l. [F.] Lineage. **Earl Joseph, Prince de** (ē/ı1735–12/ı2 1814). An Austrian marshal and author; served in the Seven Years' war.

Ig'ne-ous, l lig'ni-us; 2 lig'ne-əs, *a.* Composed of or having the texture or appearance of wood; woody.

In approaching the equator *the lignous* exceed the number of herbaceous plants. MARY SOMERVILLE, *Connexion of Phys. Sciences* I, p. 27, p. 2nd. (a. 1853.)

[< L. *lignosus*, < *lignum*; see LIGNUM.] **—lignous marble,** an imitation of marble made of prepared wood.

Ilg-nes'cent, l lig-nes'ent; 2 lig-nē's'ent, *a.* Slightly woody; becoming ligneous or woody. [< L. *lignum*; see LIGNUM.]

Ig'nic, l lig'nic; 2 lig'nik. From the Latin *lignum*, wood: a combining form.—**Ig-nic'o-line,** *a.* Growing upon wood.

Ig'ni-colet, —**Ig-nic'o-lous,** *a.* That grows or lives on wood, as a fungus.—**Ig-nif'er-ous,** *a.* Producing wood.—**Ilg"ni-fi-ca'tion,** *n.* The state or condition of being or becoming lignified; the conversion of a cell-wall into lignin or wood.—**Ilg'ni-form,** *a.* Having the form or appearance of wood.—**Ilg'ni-fy,** *vt. & vi.* [-FIED; -FY"ING.] To convert into or to become wood.—**Ilg'ni-lite,** *n.* Same as SYLVINITE.

Ig'nin, l lig'nin; 2 lig'nin, *n. Chem.* A compound ($C_6H_{10}O_5$) like cellulose, the insoluble woody cell-walls and plant-fibers; xylogen. [< L. *lignum*; see LIGNUM.] **Ig'ninet.**

Pure woody fibre, or *lignin* from all kinds of wood, has exactly the same composition.
YOUMANS *Handbook Household Science* p. 53. (a. 1857.)

Ig'ni-per'dous, *a.* Destructive to wood, as insects.—**Ilg-nip'er-ous,** *a. Chem.* Containing lignin characterized by slight solubility in water. **Ilg-nir'i-ous.**

Ilg'nite, l lig'nait; 2 lig'nīt, *n.* A compact, partially carbonized vegetable matter, often retaining fibrous structure, forming an intermediate bed immediate between peat and true coal, and abundant in Cretaceous and Tertiary strata. [< L. *lignum*; see LIGNUM.]

—lig"ni-tif'er-ous, *a.* Lignite-bearing.—**Ilg'ni-tize,** *vt.* To convert into lignite.

Ilg-nit'ic, l lig-nit'ik; 2 lig-nit'ic. **I.** *a.* Of or pertaining to lignite. **II.** *n. Geol.* See GEOLOGY.

Ig-niv'o-rous, l lig-niv'o-rus; 2 lig-niv'o-rəs, *a.* Feeding on wood; xylophagous. [< L. *lignum*, wood, + *vorare*, devour.]

Ig'no-. Same as LIGNI-: a combining form.—**Ilg"no-cel'lu-lose,** *n.* A combination of lignin and cellulose, as in linenfiber.—**Ilg"no-cer'le,** *n.* Of, pertaining to, or contained in the wax or tar of wood.—**Ignoceric acid,** a crystalline compound ($C_{24}H_{48}O_2$) derived by distillation from the tar or products of certain trees, as the beech.—**Ilg'no-graph,** *n.* [Rare.] A wood-engraving.—**Ilg-nog'ra-phy,** *n.* [Rare.] Wood-engraving.—**Ilg'no-in,** *n. Chem.* A brownish substance ($C_{17}H_{24}O_6$), obtained from the wood of the bay tree.—**Ilg'no-lite,** —**lig'none,** *n.* A modification of lignin having characteristic reactions.—**Ilg'nose,** *n.* **1.** A constituent of lignin. **2.** A brown explosive. See GUN-COTTON.—**Ilg-nos'i-ty,** *n.* The state or condition of being ligneous or woody.—**Ilg'no-sul'phite,** *n.* A fluid employed for inhalation in throat and lung-troubles. It is obtained by treating cellulose when treated with calcium bisulfate in solution the latter dissolving lignin, etc. **Ilg'no-sul'phite.**

Ilg'nous, l lig'nus; 2 lig'nəs, *a. Bot.* Ligneous. **Ilg'nose;** **Ilg'nous.**

Ilg'num', l lig'num; 2 lig'nəm, *n.* The hard, durable substance of an exogeneous plant, as distinguished from parenchymatous tissue; wood. [L., < *legere*, gather.]—**Ilg'num-vi'tæ,** *n.* Lignum-vitæ.—**Ilg'num-ı-rhod'ium,** *n.* Jamaica rosewood. **2.** Canary rosewood.

Ig'num', *n.* [Austral.] Any of the woody-stemmed plants of the genus *Polygonum*, having very troublesome woods.

Ilg'num-vi'tæ, l lig'num-vai'ti; 2 lig'nəm-vī'tē, *n.* **1.** A small tropical American tree (*Guaiacum officinale*), or its greenish-brown, hard, heavy wood. This latter is used for mallets, bearings, pestles, lignotile, lampe-balls etc. **2.** Any one of various other trees yielding a similar wood; as, the *lignum-vitæ* of New South Wales (*Eucalyptus polyanthema*), or the *lignum-vitæ* of New Zealand (*Pittosporum tenuifolium*), the myrtle-like tree (*Myrtaceæ*). **3.** Same as WHITE MYRTLE (1). [< L. *lignum*, wood + *vita*, life, < *vivo*, live.]

Ll'gny, l l'ı-nyi; 2 l'ı'nyī, *n.* A village in Namur province, Belgium. Prince Napoleon defeated Blücher, June 16, 1815.

Ll'gny'-en-Bar"rois', l lı'nyī'-an-bar'rwā'; 2 lı'nyī'-ən-bā'rwā', *n.* A manufacturing and commercial town in Meuse department, France.

Ig-so', l lı'gō'; 2 lı-gō', *vt.* [-I.] To wash; bathe: Tagalog.

Lig'on, l lig'on; 2 lig'on, **Richard.** An English traveler in the 17th century; *True and Exact History of Barbadoes.*

Lig'o-nier', l lig'o-nir'; 2 lig'o-nēr', *n.* **1. John, Earl** (1/ı7 1680–4/1770), a British general who was born in France; fought in Marlborough's campaigns. **2.** A city in Noble county, Ind. **3.** A township in Westmoreland county, Pa.

Ll-go'ri-o, l ll-gō'ri-ō; 2 ll-gō'ri-ō, **Piro** (1530?–1580?). An Italian painter, architect, and antiquarian.

Ll-gu'rēs, *n.* Same as LIGURIANS.

Ll-gur'zi, l ll-gur'zi; 2 ll-gūr'zi, **Jacopo** (1543–1627). An Italian historical painter who worked in fresco and oil.

Ig'ro-in, l lig'ro-in; 2 lig'ro-in, *n.* A distillate of petroleum, lighter than kerosene, used as a solvent, to enrich illuminating-gas, and sometimes as an illuminant in special lamps. **Ilg'ro-ine.**

Ig'sam, l lig'sam; 2 lig'səm, *n.* Same as LIGAN.

Ilg'u-la, l lig'yu-lə; 2 lig'yu-la, *n.* [-æ, l -ı; 2 lē, *pl.*] **1.** A tongue-like part or organ. (1) *Entom.* The distal primary sclerite of the labium, usually subdivided into glossa and paraglossæ. In bees it is greatly developed and functions as a tongue. (2) *Helminth.* A tongue-like lobe of the parapodia of certain annelids. (3) *Anat.* The thickened white edge of the wedge-shaped fold of the fourth cerebral ventricle. **2.** *Bot.* Ligule. **3.** [L-] *Helminth.* A genus typical of *Ligulidæ*. [< L. *lingula*, *lingula*, dim. of *lingua*, tongue.]—**Ilg'u-lar,** *a.* Of, pertaining to, or resembling a ligula; composed of ligulæ.—**Ilg'u-lold,** *a.*

Ilg'u-late, l lig'yu-lēt; 2 lig'yu-lāt, *a.* **1.** Strap-shaped, as the rays of certain heads of flowers in the aster family (*Asteraceæ*). **2.** Having a ligula, as a grass-leaf or a flower of the aster family. **Ilg'u-let'ed.**

Ilg'ule, l lig'yul; 2 lig'yul, *n. Bot.* **1.** A thin or scarious appendage at the summit of a sheathing petiole in grasses. **2.** A strap-shaped corolla of certain flowers in the aster family. **3.** An appendage at the base of certain petals. **4.** In *Selaginellaceæ*, a scale-like structure on the upper side of the leaf near its base. [< L. LINGULA.]

Ligule (*l*) of a Grass.

Ll-gu'li-dæ, l ll-giu'li-dī; 2 ll-gū'li-dē, *n. pl. Helminth.* A family of tapeworms with the body not segmented and without suckers. [< LIGULA.]—**Ilg'u-lid,** *n.*—**Ilg'u-loid,** *a.*

Llg"u-li-flo'ræ, l lig'yu-li-flō'ri; 2 lig'yu-li-flō'rē, *n. pl. Bot.* Same as CICHORIACEÆ. [< L. *ligula*, strap, + *flos*, flower.]

Ilg"u-li-flo'rous, l lig'yu-li-flō'rus; 2 lig'yu-li-flō'rəs, *a. Bot.* Having ligulate florets; ligulate-flowered: applied to a division of the aster family (*Asteraceæ*) including the dandelion, hawkweed, succory, etc., now often called the *Cichoriaceæ*. [< L. *ligula* (see LIGULA) + *flos* (*flor-*), flower.] **Ilg'u-late-flow"ered.**

Ilg'u-li-form, l lig'yu-li-fôrm, *a. Zool.* Having the form of a strap. [< LIGULA + -FORM.]

Ilg'u-lin, l lig'yu-lin; 2 lig'yu-lin, *n. Chem.* A red coloring-material yielded by the fruit of several kinds of privets. [< LIGULA.]

Ll'gu-o'ri, l ll'gu-ō'ri; 2 ll'gu-ō'ri, **St. Alfonso Maria de** (ē/ı1696–4/1787). An Italian priest and theologian. See LIGUORIST; REDEMPTORIST.

Ll-gur'rian, l ll-gwō'rian; 2 ll-gwō'ri-ən, *n. Ch. Hist.* **1.** A follower of St. Alfonso de Liguori's doctrines in moral theology: a probabilist. **2.** Same as REDEMPTORIST. **Liguorist.**

Ilg'ure, l lig'yur; 2 lig'yur, *n. Script.* One of the twelve precious stones in the high priest's breastplate: identified by the translators of the Septuagint with *ligyrion* (ligurium), Exxviii, 19. [< LL. *ligurius*, < Gr. *lynkourion*, a gem, < *lynx*, lynx, + *ouron*, urine.]

Ll-gu'ri-a, l ll-gu'ri-ə; 2 ll-gū'ri-ə, *n.* **1.** A district in ancient Italy; between the Po river and the Gulf of Genoa; capital, Genoa. **2.** A former department of N. W. Italy; now Genoa and Porto Maurizio provinces; 2,038 sq. m.

Ll-gu'ri-an, l ll-gu'ri-an; 2 ll-gū'ri-ən, *a.* Of or pertaining to Liguria.—**Ligurian Republic,** the republic of Genoa, created by Bonaparte in 1797; annexed to the French empire, 1805; then to Sardinia, by the treaty of 1815.—**L. sea,** the Gulf of Genoa.—**Li-gu'ri-an-ize,** *vt.* To Italianize, as bees.

Ll-gu'ri-an, *n.* **1.** A member of an ancient race distinct from the Celts, Iberians, and Italians, and perhaps a pre-Aryan race allied to the Sicanians. The Ligurians were a powerful people, whose chief industry was cattle-raising. They were the mercenaries in the Carthaginian armies and later became engaged in war with the Romans; but it was many years after the ending of thesecond Punic war before they were finally defeated. **2.** A native of the former department of Liguria, Italy. **3.** An Italian bee.

Ilg'u-rite, l lig'yu-rait; 2 lig'yu-rīt, *n. Mineral.* An apple-green variety of titanite. [< L. *Liguria*, a district of Italy.]

Ilg'ur-ition, l lig'yur-ish'ən; 2 lig'ur-ish'ən, *n.* [Rare.] The act of licking; lickerish gusto; relishing.

Ll-gus'ti-cum, l ll-gus'ti-kum; 2 ll-gus'ti-cəm, *n. Bot.* A genus of herbs of the family *Apiaceæ*, of the north temperate zone, with large aromatic roots, ternately compound leaves, and white flowers in many-rayed umbels. *L. scoticum* is the sea-lovage. [NL., < *Ligusticus*, a Ligurian, < *Ligus*, a Ligurian.]

Lime'house, *n.* A shipping district of London.

li'men†, 1 lī'men; 2 lī'mĕn, *n.* **1.** *Anat.* The narrow convolution connecting the island of Reil with the base of the brain. **2.** *Psychophys.* (1) The point at which the least amount of a given stimulus, or the least difference between two stimuli, becomes just perceptible, and below which there is no perceptible conscious effect. (2) The imaginary line between the non-appreciable and the barely appreciable consciousness of the sensory organism. The point where a stimulus begins to be felt is called **limen conscientiæ**, or *threshold of consciousness*; the point where the difference between two stimuli begins to be appreciated is the **l. discriminationis** or *threshold of discrimination*. The word was introduced into psychology by Herbart, and its meaning extended by Fechner. In English psychology the use of *threshold* is gradually superseding that of *limen*. [L., still.]—**difference limen**, the increment of stimulus which is just sufficient to make a noticeable difference in the resulting sensation. —**l. nasi**, a curved prominence within the nose, between the vestibule and the nasal fossa, caused by the projection of the lower border of the lateral cartilage.—**limiting l.**, the upper or lower limit of the stimulus which will produce a just noticeable sensation, or just noticeable difference in the sensation.—**mixture l.**, the limen as modified by a mixture of qualitative changes in a stimulus or changes in the stimuli or by adding other stimuli.

li'men†, *n.* Same as LIME. **ly'mere**†.

Li-men'e-an, 1 lī-men'ɪ-ən; 2 lī-mĕn'e-an. **I.** *a.* Pertaining to Lima, Peru, or its inhabitants. **II.** *n.* A native or inhabitant of Lima.

lim'er-ick, 1 lim'ər-ik; 2 lim'er-ik, *n.* [cap.] A nonsense verse of 5 anapestic lines, of which the first, second, and fifth lines are three-stress and rime and the third and fourth are two-stress and rime; as,

There was an old man of Tobago,
Who lived on rice, gruel, and sago
Till much to his bliss
His physician said this,
To a leg, Sir, of mutton you may go.

Gould's Treasury of Humor and Nursery Rhymes.

Limericks were usually extemporary compositions produced at convivial parties in Ireland by each individual in turn, while the company beat time to the singing of a tune in which were the words "*Will you come up to Limerick*"; from this it is supposed the name is derived. It is sometimes written with a capital initial letter.

lim'er-ick, *a.* Foolish.

Lim'er-ick, *n.* **1. Earl of**, Thomas Dongan: British Administrator: at one time Governor of New York; gave New York city its charter. **2.** A county in the province of Munster, Ireland; 1,064 sq. m. **3.** Its capital, a seaport at head of the Shannon estuary.—**Limerick lace**, see LACE.

lim'er-ick-yte†.

li'mes, 1 lī'mēz; 2 lī'mēz, *n.* [LIM'I-TES, 1 lim'ɪ-tēz; 2 lim'ĭ-tēz, *pl.*] **1.** *Roman Antiq.* A boundary-road. **2.** *Anat.* One of the two tracts (limes alba and limes cinerea) at the attachment of the olfactory lobe. [L., cross-path, limit.]

lime'stone", 1 laim'stōn"; 2 lim'stōn", *n.* A rock composed wholly or in part of calcium carbonate, sometimes containing magnesium carbonate, it is **dolomitic** or **magnesian**; when clayey, **argillaceous**; when sandy or quartzose, **siliceous**. Crystalline limestone is called *marble*.

Limestone includes a great variety of stones. Altho there are no chemical differences, it is customary to call those limestones possessing especial value in fine building or decorative work *marbles*, and the more ordinary dull-colored non-crystalline and oolitic varieties, suitable only for building and lime-burning, *limestones*. On structural grounds certain varieties are designated as *travertine* and *oolites*. Others are known commercially, from their sources, as *Bath stone*, *Bedford oolite*, *Caen stone*, etc.

Limestone limpets are creatures float in the water while they live, and at their death give their skeletons to the sediments of the sea-floor; in which way massive *limestones*, such as the chalk deposits of England, have been produced.
N. S. SHALER *Aspects of Earth, Caverns* p. 102. [ɛ. 1889.]

Limestones are named (1) from the formation in which they chiefly occur; as, **Bala limestone** (Eng.,) **Birdseye l.** (Am.), **Black River l.** (Am.), **carboniferous l.**, called also *Mountain l.* (Eng. and Am.), **Chazy l.** (Am.), **Chouteau l.** (Am.) **Helderberg l.** (Am.), **Keokuk l.** (Am.), **Niagara l.** (Am.), **Onondaga l.** (Am.), **St. Louis l.** (A. .), **Trenton l.** (Am. see chart of GEOLOGY). (2) from some locality; as, **Fontainebleau l.** (French), **Greenwater l.** (Am.), **Solenhofen l.** (Bavarian: compare LITHOGRAPHIC STONE); (3) from a characteristic fossil contained in them; as, **delthyris-l., nummulitic l.**, **nullofial l.** (containing fossils of the genus *Orbitoides*), **shell-l.** (compare COQUINA); **tentaculite-l.** (Am.: containing tentaculites); or (4) from their characteristic quality; as, **fetid l.** (emitting a fetid odor when struck with a hammer due to the pressure of decomposable sul..ds or organic matter), **granular l.** (having a granular structure), **hydraulic l.** (containing clay, cement, or more of silica and considerable alumina; when burned, hydraulic lime is produced from which hydraulic cement is made), **rotten l.** (friable), or **slink** (U. S.), a bowl-shaped hole in limestone opening into a system underground.

Lime's to.ac, *n.* **1.** A county in northern Alabama; 600 sq. m., county-seat, Athens. **2.** A county in central Texas; 987 sq. m.; county-seat, Groesbeck.

lime' ztwig", *n.* **vial, l.-water.** See under LIME1, *n.*

lime'y, *i. a.* Lim. Ly. *n.* (U. S.) An English sailor or soldier.

Limnimith.* A section of *Oligochæta* having peculiar looped canals and generative organs without efferent ducts, including fresh-water worms. < L. *limus*, mud, + *colo*, dwell.]

li-mic'o-line, *l.* loi-mik'o-lin; 2 li-mik'o-lin. *a.* **1.** Inhab-

li-mic'o-lin5, *l* thing the shore.
2. Of or pertaining to the *Limicolæ.* **li. n.** One of the *Limicolæ.*

li-mic'o-tous, *l* loi-mik'o-tus; 2 li-mik'o-tus. *a.* Limicoline.

Lim'i-de, *l* lim'i-dē; 2 lim'i-dē, *n. pl. Conch.* A family of pectiniform bysstferous foot and a subequivalve oblique shell, with auriculated hinge and generally radiating ribs.

Types of Limicoline Feet.

1. Purple sandpiper (*Tringa maritima*). 2. Sanderling (*Calidris arenaria*). 3. Jacana (*Jacana gymnostoma*).

lim'i-nal, *l* lim'i-nal; 2 lim'i-nal, *a.* **1.** Relating to the threshold or entrance; beginning or first stage or earliest stage. **2.** *Psychophys.* Pertaining to the stimulus limen or difference limen. [< L. *limen (limin-)*, threshold.]

lim'i-nary, *l* lim'i-nā-ry; 2 lim'i-nā-ry, *a.* [Rare.] Preparatory; preliminary; prefatory. [quality of being limy.

lim'i-ness, *l* lim'i-nes; 2 lim'i-nēs *n* The condition or

lim'ing, *l* lim'ing; 2 lim'ing, *n.* The solution of lime in water used in bleaching.— **lim'ing-box',** *n.* A box for holding a solution of lime to be used in the process of bleaching cotton cloth.— **l. machine,** *n. Bleaching.* A machine in which cotton cloth is washed in a solution of lime.

lim'it, *l* lim'it; 2 lim'it, *v* **l. t.** **1.** To set a bound or bounds to; keep in bounds; confine; restrict; as, to *limit* a workday to eight hours; to *limit* to assign; specify.

II†. *v.* To exercise functions, as begging, within certain limits, as, a *limiting* friar. See LIMITER, 2. [< F *limiter*, < L. *limito*, bound, < *limes*, cross-path.]

Shut, bound, check, circumscribe, confine, define, hinder, hold in check, impede, keep in check, repress, restrain, restrict. See CIRCUMSCRIBE.— **lim'it-a-bl(e-ness?,** *n.*

lim'it-a-bl(e, *l* lim'it-a-bl; 2 lim'it-ā-bl(ē, *a.* That may be limited.— **lim'it-a-bl(e-ness?,** *n.*

lim'it-al, *l* lim'it-al; 2 lim'it-al, *a.* Of the nature of limits; a line, point, or boundary beyond which whatever is bounded ceases to extend, avail, operate, etc.; an end; edge: used of material and immaterial things; as, the *limits* of the city.

What are we that we should presume to set a definite mercy of the Lord and Giver of Life, unto whom all life returns?

DEAN M. CRAIK *John Halifax* p. 456. [a 1859.]

2. That which is bounded, or bounds, as space or time; a district· period· as, the prison *limits.* **3.** That which impedes or hinders; a restraint; check, in a general sense, any restriction or limitation, naturally or arbitrarily imposed or agreed upon, in any situation or transaction.

Every power upon which no *limits* are imposed soon becomes tyrannical. DUNCKLEY in *Contemporary Review*, Dec., 1891, p. 797.

4. *Math.* (1) A definite value which a variable value, varying quantity is conceived or proved to approach, so that the difference between the two quantities may become less than any assignable quantity, without actually vanishing, a fixed point which a varying point may approach indefinitely without actually reaching it. (2) One of two extreme values between which a quantity must be contained. **5.** *Psychophys.* (1) The boundaries, on either side of the threshold, of a sense-organ produces no sensation. (2) The boundaries of a sensation series or continuum. Compare LIMEN, *n.* **6.** In certain games, as of cards, the largest amount which may be wagered at a time; used with the definite article, especially in poker. **7.** *Commerce.* The price fixed for making or closing a purchase or sale. **8.** [Canada.] A division of a lumber tract. **9.** *Logic.* A determining feature; a specific difference. **10.** [Colloc., U. S.] The extreme point of forbearance or endurance: used in a humorous or a derogatory sense: with *the*; as, "That's *the limit!*" **II†.** A definite term or attribute. 12†. A limb [< F. *limite*, < L. *limes (limit-)*, cross-path.] SYN.: see BOUNDARY, END, MARGIN.

— **elastic limit** (*Mech.*), that point at which a body under stress will not return to its form and size after the stress is removed, or the force required to distort it beyond this point.— **lim'it-gage",** *n.* A gage for determining within fixed limits the correctness of pieces of machinery as to standard size.— **l.-line,** *n.* The shape which a circle having a limitless radius is inclined to assume as it increases in the plane of Lobachieski.— **l. man,** *n. Sport.* A scratch-man.— **l.-point,** *n. Math.* Any point within or without an assemblage, in whose neighborhood one point belonging to the assemblage exists.— **limits of accommodation,** see RANGE OF ACCOMMODATION, under RANGE.— **limits of integration** (*Math.*), the maximum and minimum values assumed by a variable in its integration.— **l. surface,** *n* In non-Euclidean geometry, the surface of a sphere with an infinite radius, or expanding to such a radius: a term used by Bolyai and Lobaschefski. — **l. system,** in the manufacturing of interchangeable parts, the system of making such parts to specific sizes having very minute differences, the limits dependent on the high and low gages employed.— **method or doctrine of limits,** an indirect method of comparing or evaluating quantities by the following form of reasoning. It is maintained that two quantities are equal. If you deny it, assign what value you please to their difference, and it will be shown that their difference, if it exists at all, is less than this value. This proves the equality.— **three-mile l.,** a distance of three geographic miles from the shore-line seaward, allowed by international law for territorial jurisdiction.— **twelve-mile l.,** a distance of twelve geographic miles seaward from the shore-line of the United States, within which vessels may be stopped for search and seizure of ships suspected of violation of the laws for limit.

lim'it-al, *l* lim'it-al; 2 lim'it-al, *a.* Relating to a boundary or limit. [< L. *limitaris*, < *limes*, boundary.]

lim'i-ta-ry, *l* lim'i-tē-ri; 2 lim'i-tā-ry, *a.* **1.** Forming or marking a limit or boundary; limiting; as, *limitary* virtue. **2.** Confined within or restricted by limits; limited.

The military . . . a vulgar act, a mechanic art, a very limitary art. DE QUINCEY *Literary Reminiscences, Charles Lamb* in vol. i, p. 95. [*v. a* 1854.]

8. [Rare.] To draw; paint.

11. *t.* [Rare, U. S.] **1.** To use a fish-line; as, the squeteague is taken by both *lining* and seining. **2.** To form in line or in position for playing, as in football, hockey, basket-ball, etc.

After an intermission of ten minutes the [football] team *lined* up again. *New-York Tribune* Nov. 27, 1891, p. 2, col. 2.

[< F. *ligner*, < L. *lineo*, < *linea*, line, < *linum*, flax.] — **to line bees,** to follow wild bees to their nests by watching their line of flight. — **to line out,** in *Music*, to adjust so as to operate easily: also, **2.** Same as LINE, *v.*, II, 2.

line[3], *vt.* [LINED; LINING.] **1.** To put a covering, usually of a lighter and different material, on the inside surface of; as, to *line* a pot with pine; to *line* a garment with silk. **2.** To cover or fill the inside of; stuff; wad; as, to *line* a house with pictures, or a purse with money.

The justice, In fair round belly, with good capon *lin'd*.
SHAKESPEARE *As You Like It* act ii, sc. 7.

3. To marshal or arrange persons or things along; as, the river-bank, or the street, was *lined* with people; the troops were *lined* up. **4.** To unite, join, or attach together; to apply a molding to (the top of) a piece of furniture. **6.** *Tech.* To test with or cut to a line. **7.** In bookbinding, to reenforce the back of folded sections of (a book) with cloth-paper. **8.** *Baseball.* To hit or throw (a ball) so that it travels fast and very close to the ground. **9**†. To pad. **10**†. To fortify or reenforce. [Prob. orig. 'cover with linen,' < LINE[2], *n.*, linen.]

lined gold, gold-leaf used to line the inside of the **line one's jacket,** to fill one's stomach with food or drink. — **to line out.** **1.** *Mech.* To indicate by lines on a piece of work the extent to which it must be cut down. **2.** Same as LINE, *v.*, II, 2: also, **to line off.** **3.** *Forestry.* To transplant seedlings from the seedbed to rows in the forest nursery. GIFFORD PINCHOT *Terms Used in Forestry, U. S. Dept. of Agr., Bulletin No. 6*, [no. yr.], p. 15.

line[4], *n.* **1.** A string or cord; a slender rope; a cord, wire, or the like used for some specific purpose; as, a carpenter's *line* for marking; a clothes-*line*; fish-*line*.

It is instructive to see that our word *line* still shows traces of such an early practical meaning: *line* is linen thread, and straight is the participle of the old verb to stretch.
E. B. TYLOR *Anthropology* p. 319. [a. 1881.]

Line is often used by English fishermen to indicate the depth of water where their industry is carried on, as in the expression great-*line* fishing, *inshore line* fishing.

2. A mark drawn by a pen, pencil, or graving-tool, to indicate direction or form; stroke; as, a shaded *line*.

The great freedom and force of the etched *line*, its immense power of firm and rapid modulation, are exactly the qualities in which mezzotint is most deficient.
HAMERTON *Etching and Etchers* 3d ed., p. 265. [a. 1868.]

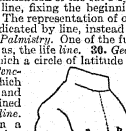
3. Any slender mark; a streak; as, a red *line*; *lines* on the surface of, or in, stratified rock. **4.** Shape of contour; edge of a figure; outline; also, a lineament, or a crease or wrinkle; as, the *lines* of a ship; *lines* of care; to tell fortunes by the palm of the hand. **5.** A place of separation; dividing edge; limit; as, a boundary-*line*. **6.** Hence, a limit in classification; a bound in thought or conduct; as, we draw the *line* there. **7.** A course in which anything proceeds or situation in which it moves; route; as, the *line* of march; the *line* of a mountain range; a *line* of travel. **8.** A course of thought or action; a sequence of acts or of ideas; as, a *line* of evidence. **9.** A series of objects; row, especially a straight row; as, a *line* of trees; bottles standing all in a *line*. **10.** A row of written or printed words. (1) One bounded by the margins of a page or column. Hence, (2) a short letter; a note; as, drop me a *line*. [Eng.] Verse or prose given to a schoolboy to learn or to copy, as a punishment. (3) A metrical verse; by extension, a verse longer than the printed line, but with the rhyming tendency and without the initial capital. (3) *pl.* (*a*) The words of a play or of an actor's part. (*b*) Same as MARRIAGE LINES.

11. Kinship in direct descent, or a series, as of persons, thus related; as, the royal *line* of England; succession in the male *line*. **12.** (1) A transportation system operating in a route under one management, as a series of public conveyances, carriages, or vessels; as, a stage-*line*; a steamship-*line*; a railway-*line*. The *Lady Line*. (2) The roadbed of a railroad, whether applied to a single track thereon; as, the up *line*; the down *line*; or to the entire road as forming one part of a system; as, the main *line*; the branch *line*; the long *line*. (3) The system of wires and poles comprising a telegraph or telephone connection between two points; as, the Western Union *lines* were all down. **13.** *Com.* (1) A branch of mercantile business; as, a man in the hardware *line*. (2) An order received by a traveling agent for goods, or the goods so ordered. (3) A particular class or stock of goods; as, a heavy *line* of ribbons. **14.** *Mil. & Naval.* (1) A row of soldiers drawn up in an extended front, as when deployed for battle.

> Why, that's the day we broke their *line*!
> Said the old Spotsylvanian.
> BRET HARTE *The Old Mexico Explains* st. 3.

(2) A trench or rampart or a row of fortifications; as, a first *line* of defense. (3) The aggregation of combatant troops including officers as distinct from the various departments constituting the staff. Compare STAFF, 4. Specif., in the United States, the aggregation of officers in line to succeed to a command, and who automatically assume command in order of seniority when in action, even in the presence of a superior officer not in line.

He retired with the rank and pay of an admiral but not as an admiral of the *line*. *New York Times* Jan. 13, '11, p. 1, col. 2.



15. *Mach.* The adjustment of a machine or its parts in working order. **16.** *Math.* (1) That which is conceived to have length without any other dimension, as the boundary of a surface, or the trace of a moving point. (2) In higher geometry, a curve of the first order; a right line, FAY, or axis. **17.** *Naut.* The equator: with the definite article. — **the equinoctial line**[1].

The naked Negro, panting at *the line*. GOLDSMITH *Traveller* l. 69.

18. *Insur.* The limit or amount a company will write on a risk. **19.** *pl.* [U. S.] The reins of a harness. **20.** A measure of length. — **Gunter's line,** a scale of equal parts. A cord for measuring land. **Fr.** xvi, 6. (2) Hence, rule; direction. **22.** *Mus.* One of the parallel horizontal strokes that form the staff. **23.** *Phys. Sci.* (1) A curve, as on a chart's surface or on a diagram, connecting all points having a common property; as, the aclinic *line*; an adiabatic *line*. (2) In spectroscopy, a narrow region in a spectrum, of high absorption or of great emissive power, appearing to the eye as a fine transverse black or shining stripe: often resolved into a group of such strokes by higher dispersion; in the solar spectrum these are known collectively as *Fraunhofer's lines*.

The chief lines observable with moderate dispersion in the solar spectrum, now known to be very complex groups, are named from the letters of the alphabet; others from the substances whose vapor produces them; others from their position according to some arbitrary scale of wave-length; as, the *G* line; the green thallium *line*; *line* 1,574 K. (Kirchhoff's scale). See SPECTRUM.

24. A line of magnetic force: a contraction. **24.** The plan or outline of a building. **25.** A certain method employed in a work of any kind; as, he departed from the *lines* of his earlier novels. **26.** A ray of light resulting from a reflection or refraction of crystalline form. **27.** *Yachting.* An imaginary line, fixing the beginning or end of a course. **28.** *Art.* The representation of objects, action, or decoration indicated by line, instead of by shading or coloring. **29.** *Needlework.* (1) A narrows in the palm of the hand; as, the life *line*. **30.** *Geog.* A marking on a map with which a circle of latitude or longitude is indicated. **31.** *Fencing.* (1) The silhouette of which a fencer's right arm, sword, and feet should always be maintained when engaged; as, he is in his *line*.

Lines in Fencing.

a, sixte and tierce; *b*, quarte and quinte; *c*, octave and seconde; *d*, half circle and prime; *e*, *a*, *b*, high lines; *c*, *d*, low lines.

(2) *pl.* [cf. F. *tour de ligne*.] **— active line,** an imaginary line situated near the equator, where the compass-needle does not dip. — **added l.** (*Mus.*), a leger line. — **alveolonasal l.** (and all other craniometrical lines), see CRANIOMETRY. — **Ballargh's line** (*Anat.*), two light lines of bands in the cerebral cortex, due to an increase in the felt-work of the lateral processes of the nerve-cells. **Baillarger's layer** or **basal lines,** same as INTERNAL STRIATURE. — **Blackiston's l.,** an imaginary line passing between the islands of Honshu and Hokushu, Japan, and marking the northern limit of the natural range of the Japanese deer. **Bleek l.** (*Anat. Ethnog.*), a line of armed men who, in the black war of 1830, attempted, under the governor's orders, to drive the Tasmanian aborigines into a peninsula. — **bloodline**[2], *n.* The transmissible characteristic in a plant or animal. — **bottom l.** or **bottom set l.,** a fish-line anchored at the ends and bearing a number of short lines furnished with hooks. — **breaking l.,** see STRIATURE. — **Broca's l.,** see BROCA'S STRIATURE. — **by l.** **1.** According to set or mechanical rules. **2.** [Rare.] By lineal descent. — **center l.** **1.** A central vertical longitudinal section of a vessel, from stem to stern-post. **2.** [Rare.] By lineal descent. — **center l.** **1.** A central vertical line bounding equal areas on the right and left hand. — **dimension lines,** lines drawn lightly in colored ink on a mechanical drawing to indicate points and lines placed a certain distance apart as expressed by a given dimension. — **Douglas's l.,** see DOUGLAS'S FOLD. — **dressed l.,** flax combed and prepared. — **Durham l.** (*Cattle*), a line of gaseous spectrum which is brightened more than other lines when the spectrum is produced by a spark-discharge instead of an arc. — **Ehlers's l.,** same as EULER'S STRAIGHT. — **Farre's white l.** (*Anat.*), a long line used in describing and for catching large fish. — **hard lines** [Colloq.], a difficult or distressing condition. — **helispherical l.,** see LOXODROMIC LINE. — **Hogarth l.** (*Painting*), the line of beauty. — **hyperl.,** see ZONE. The back edge, where the hinge of a bivalve-shell is located. — **Hogarth's l.** (*Engrav.*), same as LINE OF BEAUTY. — **Huguenin l.** (*Anat.*), the long line of the ilium on the pubis and partly on the ilium which marks the brim of the true pelvis. — **indented l.** (*Fort.*), a serrated line forming several angles in such a way that one side of the fort is defended by another. — **initial l.,** see INITIAL, *n.*, 1. — **land-l.** With edge exactly to edge: said of a slide-valve and a port. — **l.-bait,** *n.* *Angling.* Bait attached to a hand-line. — **l.-breeding,** *n.* Breeding-in-and-breeding. So gunter IN, *adv.* — **l.-complex,** *n.* The collection of straight lines whose coordinates satisfy an equation of given form. — **l.-conch,** *n.* A large marine gastropod (*Fasciolaria distans*) of Florida and the West Indies, marked by dark revolving lines. — **l.-cutting,** *n.* *Elec.* The cutting of the lines of electric flux by a magnetic substance or of magnetic flux by electric conductors. The fundamental process which lies at the foundation of the dynamic generation of magnetomotive force and electromotive force. — **l.-displacement,** *n.* *Astron.* The displacement of the lines in the spectrum of a star due to motion in the line of sight. Similar displacement may be due to pressure in the atmosphere of the star, but in this case it does not affect all the lines of the spectrum alike: so called in spectroscopic work. — **l.-drawing,** *n.* A drawing made with a pen, pencil, or crayon in such a manner that it can be reproduced only by the *line process*. — **l.-drive,** *n.* See DRIVE 1, *n.*, 4. — **l.-engraving,** *n.* The reproduction of designs on copper or steel by incised lines. The drawing is traced and transferred to a plate and cut in with a dry-point; when strengthened with the graver, the plate is ready to be printed from. **2.** A print so produced. — **l.-equation,** *n.* *Math.* An equation forming a connection between line-coordinates. — **l.-filling,** *n.* A flourish or device used in writing to fill up an incomplete line. — **l. firing,** **1.** *Mil.* Firing in a volley. **2.** *Vet. Surg.* A treatment for chronic inflammations in which parallel lines are burnt in the skin over the inflamed part. — **l.-fish,** *n.* A fish that is taken with the line: opposed to *net-fish*. — **l.-fisherman,** *n.* — **l.-fishing,** *n.* **1.** *Mining.* A brass or metal device for preserving accurate alignment of drill-holes. — **l.-former,** *n.* *Print.* A brass or metal device for preserving accurate alignment of drill-holes. — **l.-guard,** *n.* A device used to prevent the uncoiling of a fishing-line. — **l.-house,** *n.* A saloon or tavern in which spirituous liquors are sold. — **l.-hunter,** *n.* A man or hound who pursues game only by the scent. — **l.-hunting,** *n.* — **l.-integral,** *n.* *Math.* The integral, taken along a line, of any differential that has a continuously varying value along that line. — **l.-knife,** *n.* A knife with which the fish caught on a line is cut in case of fouling. — **l.-maker,** *n.* One who works at laying a railroad-line. — **l.-making,** *n.* — **l. of accommodation** (*Optics*), that portion of the curve through which the same degree of accommodation is practically sufficient. — **l. of Apollo, l. of fortune, l. of the sun,** see illus. under PLANETARY. — **l. of apsides,** (*Astron.*), the major axis of the orbit which joins the apsides. — **l. of a vector** (*Math.*), a line having at every point the direction of a given vector at that point. — **l. of battle.** **1.** The order of troops extended in a battle-front. **2.** The disposition of the ships of a fleet for battle, either ahead or abeam of each other. — **l. of battle ship,** a vessel of war of such military value as to admit her to a place in the line of battle in a fleet action. In the English navy, a double-decker of 74 to 80 guns, sometimes a three-decker of 90 to 120 guns, nothing below a 60-gun ship being admitted to the line of battle; now a first-class vessel of 8,000 tons or over for 2d class. — **l. of beauty,** a curve regarded as inherently beautiful and an element in graceful forms, usually the curve of double flexure. — **l. of bisection,** in *Mech.* A line joining the central parts of mechanism, as the axles of two wheels. **2.** A line graphically indicating the point at which an engine is on a dead center. — **l. of chords** (*Math.*), a scale on a sector used for measuring angles by means of a diagonal line on each of the two legs of the sector divided equally into sixty parts and marked C. — **l. of collimation** (*Astron.*), the line of sight in a telescope, through the center of the object-glass and the intersection of the mean of the transit-threads. — **l. of columns** (*Mil.*), parallel columns of troops fronted in a straight line. — **l. of communication,** the line by which an army in the field maintains communication and relations with its base. — **l. of curvature,** a line drawn on a surface so that consecutive normals passing through it intersect each other. — **l. of Demeaution or Partition** (*Hist.*), the visionary line north and south one hundred leagues west of the Azores, designated by the papal bull of Alexander VI., May 5, 1493, which assigned to Portugal all lands discovered to the east of such line, and to Spain all lands discovered to the west of it. The treaty of Tordesillas entered into between these countries in 1494 changed the line to 370 leagues farther to the west. — **l. of departure** (*Gun.*), the direct line taken by a missile on its projection from a firearm. — **l. of dip** (*Geol.*), the direction of dip of a stratum or structure. — **l. of direction,** in linear perspective, an imaginary line connecting a point on an object with the retina, through the optical center. — **l. of distance,** in perspective, the straight line joining the principal point of the plane and the eye. — **l. of fire,** see COMMISSIONED OFFICERS, under OFFICER. — **l. of fire,** the line of departure. — **l. of flotation,** the line of the water-line intersection of a vessel's hull with the water's surface. — **l. of force.** **1.** The straight line in which a force acts. **2.** A curve in a field of force so drawn that at every point it has the direction of the resultant force; specif., a line of magnetic force. See MAGNETIC FORCE. — **l. of fortune, heart, life, liars, Mercury,** see illus. under PLANETARY. — **l. of fracture** (*Mech.*), the line along which material is likeliest to fracture. — **l. of growth** (*Zool.*), one of the innumerable lines on mollusk-shells which indicate the successive stages of construction; the center-*line* of two parallel shafts. — **conjugate lines on a surface** (*Geom.*), lines which at any point have identical directions with those of two conjugate diameters at the point. — **Cooper lines** (*Metal.*), lines on sculpted cracks which occur on the surface of iron during a test, and which indicate the location of the maximum strain. — **cutting-down l.,** a line of sheer-poles bended by the upper strakes of the keelson and the upper surface of the floor-throats amidship. — **dimension lines,** lines drawn lightly in colored ink on a mechanical drawing to indicate points and lines placed a certain distance apart as expressed by a given dimension. — **Douglas's l.,** see DOUGLAS'S FOLD. — **dressed l.,** flax combed and prepared. — **Durham l.** (*Cattle*), a line of gaseous spectrum which is brightened more than other lines when the spectrum is produced by a spark-discharge instead of an arc. — **Ehlers's l.,** same as EULER'S STRAIGHT. — **Farre's white l.** (*Anat.*), a long line used in describing and for catching large fish. — **hard lines** [Colloq.], a difficult or distressing condition. — **helispherical l.,** see LOXODROMIC LINE. — **hyperl.** (*Geom.*), a line of deep-sea fishing. — **hyperl.** *Zool.* The back edge, where the hinge of a bivalve-shell is located. — **Hogarth's l.** (*Engrav.*), same as LINE OF BEAUTY. — **Huguenin l.** (*Anat.*), the long line of the ilium on the pubis and partly on the ilium which marks the brim of the true pelvis. — **indented l.** (*Fort.*), a serrated line forming several angles in such a way that one side of the fort is defended by another. — **initial l.,** see INITIAL, *n.*, 1. — **land-l.** With edge exactly to edge: said of a slide-valve and a port. — **l.-bait,** *n.* *Angling.* Bait attached to a hand-line. — **l.-breeding,** *n.* Breeding-in-and-breeding. So gunter IN, *adv.* — **l.-complex,** *n.* The collection of straight lines whose coordinates satisfy an equation of given form. — **l.-conch,** *n.* A large marine gastropod (*Fasciolaria distans*) of Florida and the West Indies, marked by dark revolving lines. — **l.-cutting,** *n.* *Elec.* The cutting of the lines of electric flux by a magnetic substance or of magnetic flux by electric conductors. The fundamental process which lies at the foundation of the dynamic generation of magnetomotive force and electromotive force. — **l.-displacement,** *n.* *Astron.* The displacement of the lines in the spectrum of a star due to motion in the line of sight. Similar displacement may be due to pressure in the atmosphere of the star, but in this case it does not affect all the lines of the spectrum alike: so called in spectroscopic work. — **l.-drawing,** *n.* A drawing made with a pen, pencil, or crayon in such a manner that it can be reproduced only by the *line process*. — **l.-drive,** *n.* See DRIVE 1, *n.*, 4. — **l.-engraving,** *n.* The reproduction of designs on copper or steel by incised lines. The drawing is traced and transferred to a plate and cut in with a dry-point; when strengthened with the graver, the plate is ready to be printed from. **2.** A print so produced. — **l. equation,** *n.* *Math.* An equation forming a connection between line-coordinates. — **l.-filling,** *n.* A flourish or device used in writing to fill up an incomplete line. — **l. firing,** **1.** *Mil.* Firing in a volley. **2.** *Vet. Surg.* A treatment for chronic inflammations in which parallel lines are burnt in the skin over the inflamed part. — **l.-fish,** *n.* A fish that is taken with the line: opposed to *net-fish*. — **l.-fisherman,** *n.* — **l.-fishing,** *n.* **1.** *Mining.* A brass or metal device for preserving accurate alignment of drill-holes. — **l.-former,** *n.* *Print.* A brass or metal device for preserving accurate alignment of drill-holes. — **l.-guard,** *n.* A device used to prevent the uncoiling of a fishing-line. — **l.-house,** *n.* A saloon or tavern in which spirituous liquors are sold. — **l.-hunter,** *n.* A man or hound who pursues game only by the scent. — **l.-hunting,** *n.* — **l.-integral,** *n.* *Math.* The integral, taken along a line, of any differential that has a continuously varying value along that line. — **l.-knife,** *n.* A knife with which the fish caught on a line is cut in case of fouling. — **l.-maker,** *n.* One who works at laying a railroad-line. — **l.-making,** *n.* — **l. of accommodation** (*Optics*), that portion of the curve through which the same degree of accommodation is practically sufficient. — **l. of Apollo, l. of fortune, l. of the sun,** see illus. under PLANETARY. — **l. of apsides,** (*Astron.*), the major axis of the orbit which joins the apsides. — **l. of a vector** (*Math.*), a line having at every point the direction of a given vector at that point. — **l. of battle.** **1.** The order of troops extended in a battle-front. **2.** The disposition of the ships of a fleet for battle, either ahead or abeam of each other. — **l. of battle ship,** a vessel of war of such military value as to admit her to a place in the line of battle in a fleet action. See MAGNETIC FORCE. — **l. of fortune, heart, life, liars, Mercury,** see illus. under PLANETARY. — **l. of fracture** (*Mech.*), the line along which material is likeliest to fracture. — **l. of growth** (*Zool.*), one of the innumerable lines on mollusk-shells which indicate the successive stages of construction; the center-*line* of two parallel shafts. — **conjugate lines on a surface** (*Geom.*), lines which at any point have identical directions with those of two conjugate diameters at the point. — **Cooper lines** (*Metal.*), lines on sculpted cracks which occur on the surface of iron during a test, and which indicate the location of the maximum strain. — **cutting-down l.,** a line of sheer-poles bended by the upper strakes of the keelson and the upper surface of the floor-throats amidship. — **dimension lines,** lines drawn lightly in colored ink on a mechanical drawing to indicate points and lines placed a certain distance apart as expressed by a given dimension. — **Douglas's l.,** see DOUGLAS'S FOLD. — **dressed l.,** flax combed and prepared. — **Durham l.** (*Cattle*), a line of

out, *n. Football.* The formation into line of the players at the beginning of and during a game.— **l. spin,** *n.* In brick-laying, the pin to which the measure attaches his guiding cords when aligning his work.— **l. pusher,** *n. Print.* The device in a monotype machine which expels each line of type as it is completed from the type-channel into the galley.— **l. rocket,** *n.* A rocket-case made to run along a line instead of taking a vertical flight.— **l. scale,** *n. Print.* A measure used, as by a compositor, to show how many of the words or syllables will go into one line or into a square inch of space.— **l. series,** *n. Math.* A single system of lines.— **l. shaft,** *n. Mach.* The long shaft in a factory which furnishes power to the different machines, generally driven by a belt.— **l. solids,** **l. s.**— **l. singularity,** *n. Math.* A singularity characterizing a curve considered as an envelop.— **lines of isoamplitude,** isograms of range or amplitude.— **l. store,** a store on the boundary-line between Maine and New Brunswick in which liquor is sold.— **l. storm,** *n.* An equinoctial storm.— **l. switch,** *n. Elec.* A switch that opens and closes a line-circuit.— **l. trotter,** *n.* A trotting horse whose limbs and fore feet move in the same line.— **l. up,** *n.* **1.** The formation of the players in any team game such as football, hockey, basketball, etc., when drawn up in a straight line for scrimmage, the team itself. **2.** [Colloq.] An array of people united by some aim, hostile or peaceable.— **l. weaver,** *n.* A rettelarian spider.— **l. wire,** *n.* A telegraphic wire connecting stations.— **l.-work,** *n.* Linear engraving or drawing.— **loaded l.** (*Elec.*), the line of a telephone or cable when the distributions of inductance and capacity are counteracted for the purpose of obtaining a clear transmission of speech.— **Lüders' line** (*Metal.*), a line or mark occurring in the surface of metal, or other toughened substance, which has been subjected to a strain greater than the limits of elasticity: so called from the discoverer, Lüders, of Magdeburg, in 1859.— **marriage lines** [Colloq.], a marriage certificate.— **Mason and Dixon's l.,** the southern boundary of Pennsylvania, the northern limit of slavery, roughly separating the North from the South: so called from the English astronomers Charles Mason and Jeremiah Dixon who surveyed it in 1763–1767.— **multistation l.,** a party-line.— **nebular l.** (*Astron.*), one of the bright lines observed in the spectra of nebulæ.— **oblique lines,** geometrical lines that, connecting or conveyed to connect with each other, form oblique angles.— **one-way l.** (*Teleph.*), a trunk-line designed to transmit messages only in one direction.— **on the l.,** the position of a railway, or a station which is hung about on a level with the eye; specif., the place special merit.— **out of one's l.,** not in accordance with one's taste, capacity, training, etc.; [Colloq.] eccentric.— **parallel lines,** A line drawn on the penthouse and floor of the court, halfway between the half-court line and the main wall, perpendicular to the winning-gallery line.— **round l.,** a three-stranded right-handed small rope, generally of condemned rope, canvas, and the like.— **singular l.** (*Math.*), a line at every point of which a function ceases to exist.— **steam-l.,** *n.* A curve of pressures corresponding to simultaneous volumes at which a liquid and its vapor are in equilibrium and touch without change of proportion.— **telluric l.** (*Astron.*), a line in a spectrum produced by absorption in the earth's atmosphere.— **the l.** **1.** *Art.* In exhibitions of paintings, the level where pictures can best be seen, about even with the eyes of the beholders. **2.** *Mil.* See LINE, *n.*, 17. **3.** *Mil.* See def. 14, above. **4.** The part of a navy intended to engage the enemy, as in line of battle.— **tonal l.,** *n. Psychol.* A line which figuratively represents the continuous succession of sensations of tone between the highest and lowest audible tones.— **to ride the l.** **1.** [U. S.] To make the circuit of a cattle-drift to round up stray cattle. **2.** *Hunting.* To preserve a straight course in the field.— **winning-gallery l.,** in court-tennis, the last line drawn on the floor of the court on the hazard side perpendicular to the half-court line and ending at the winning-gallery.

line-a-l (lin'e-a- 2 lin'e-a, pl.) and *a.* = *Zool.* A line or band. [L.; see LINEAL, *a.*]— **linea alba,** the white median seam of fascia extending from the pubic bone to the sternum.— **l. aspera,** a rough longitudinal ridge for the attachment of muscles on the posterior surface of the femur.— **l. semilunares,** curved lines on the surface of the abdomen which mark the outer edges of the two rectil muscles.— **lineæ transversæ,** transverse lines crossing the tendinous intersections.

Lin'e-æ, 1 lin'e-ē; 2 lin'e-ē, *n. pl. Bot.* Same as LINACEÆ.

line-age, 4 lin'e-āj; 2 lin'e-ag, *n.* Ancestral line of consanguinity; pedigree; also, family. [< F. *lignage*, < *ligne*, < L. *linea*; see LINE, *n.*] Syn.: see BIRTH.

Not far from seventy ministers in the American church can trace their *lineage* to the elder Edwards.

G. SPRING *Power of the Pulpit* p. 331. [L. & SCR. 1848.]

lin'e-al, 1 lin'i-al; 2 lin'e-al, *a.* **1.** Of the nature of an ancestral line or lineage; ascending or descending in a direct line: distinguished from *collateral.* **2.** Made with lines; as, *lineal* designs. **3.** Same as LINEAR, 4†. Pertaining to a family line; hereditary. 5†. Allied by direct descent. [< L. *linealis*, < *linea*; see LINE¹, *n.*]— **lineal descent** [U. S.], rank according to ranking seniority.— **l. rank** [U. S.], rank graded according to the canons of military and naval etiquette and precedence.— **lin'e-al-ly,** *a.* [Rare.] In a lineal line.

lin'e-a-ment, 1 lin'i-a-ment *or* -ment; 2 lin'e-a-mẽnt, *n.* **1.** A characteristic line or mark, especially of a person's face; a feature. **2.** Outline; contour; specif., in topography, a rectilinear geological feature produced by faulting. [< F. *linéament*, < L. *lineamentum*, < *linea*; see LINE¹, *n.*]— **lin'e-a-men-ta'tion,** *n.* The formation of lineaments.

lin'e-a-ter, 1 lin'i-am-i-tar; 2 lin'e-ăm'e-ter, *n.* An instrument for measuring lines.

lin'e-ar, 1 lin'i-ar; 2 lin'e-ar, *a.* **1.** Pertaining to or of the nature of a line; composed of lines. **2.** Involving measurement in one direction.

The coefficient of *linear* expansion is the elongation of the unit of length of a body when its temperature rises from zero to 1 degree. GANOT *Physics* p. 697. [< L. *linearis*, < *linea*; see LINE¹, *n.*] lw. v. 1896.]

3. *Alg.* Involving a quantity to the first power only; pertaining to quantities of the first degree; as, a *linear* equation. See phrases. **4.** *Bot. & Zool.* Very narrow and elongate; as, a *linear* leaf. **5.** *Pros.* Relating to or consisting of verses of like rhythm and length; stichic. [< L. *linearis*, < *linea*; see LINE¹, *n.*]— **lin'e-a-ryt.**

— **lin'e-ar-a-cute',** *a. Bot.* Linear with an acute apex, as certain leaves.— **l. algebra,** algebra, part of whose expressions is equal to an expression linear in certain units.— **l. capacity** (*Elec.*), the distributed electrostatic capacity per unit length of a pair of uninsulated conductors such as the pairs of wires in an electric cable or transmission line.— **l. complex** (*Math.*), a complex of lines in space consisting of the lines through one point in each plane and only those in one plane through each point.— **l. differential equation,** an equation formed by equating a linear function of the dependent variable and its derivatives to zero or to a function of the dependent variable only.— **l. ensates,** *a. Bot.* Narrowly sword-shaped.— **l. lanceolate,** *a. Bot.* Between linear and lanceolate; lanceolate below or in the middle, and narrowly tapering above; slender, or narrow lanceolate.— **l. measure,** measure by length alone; long measure.— **l. numbers** (*Math.*), numbers that refer to length only.— **l. oblong,** *a. Bot.* Between linear and oblong; very narrowly oblong.— **l. problem** (*Geom.*), a problem possible of solution by the use of right lines.— **l. segment** (*Math.*), the portion of the totality of values of a variable that falls between two prescribed values.— **l. substitution,** *Math.* a substitution for each of a group of variables of a linear homogeneous function of the same number of other variables. **2.** The transformation of the plane of a complex number by appropriate substitution.— **l. transformation** (*Alg.*), a transformation of variables, the replacement in each case being by a function of the first degree.— **lin'e-ar'i-ty,** *n.* — **lin'e-ar-ize,** *v. t.* To represent in linear form; change into a linear figure.— **lin'e-ar-ly,** *adv.*

lin'e-ate, 1 lin'i-ēt; 2 lin'e-ēt, *a.* Marked with lines, especially with fine longitudinal lines, as a leaf. [< L. *lineatus*, pp. of *lineo*; see LINE¹, *v.*] **lin'e-at'ed**‡.

lin'e-a'tion, 1 lin'i-ē'shon; 2 lin'e-ē'shon, *n.* **1.** A drawing of lines; delineation. **2.** A marking consisting of a line or lines; a contour, or outline. **3.** The division of a surface into lines. **4**†. Measuration.

lin'e-a-ture, 1 lin'i-a-chur *or* -tūr; 2 lin'e-a-chur *or* -tūr, *n.* A screen used in photoengraving. [< L. *linea*, line; see LINE¹, *n.*]

line'-conch', **l. engraving,** **l.-fish,** etc. See LINE¹, *n.*

lined, 1 laind; 2 līnd, *a.* **1.** Having lines; specif., (*Her.*), having a line fastened to the collar of an animal. **2.** Having a lining.

Li-ne'i-æ, 1 li-ni'i-ē; 2 li-ne'i-dē, *n. pl. Helminth.* A family of schizonemertine worms with a long depressed body and lateral nerves. **Lin'e-us,** *n.* (g. g.) [< L. *linea*; see LINE¹, *n.*] **lin'e-id,** *n.*— **lin'e-oid,** *a.*

lin'e-i-form, 1 lin'i-i-form; 2 lin'e-i-fōrm, *a.* **1.** Linear in form. **2.** Made up of lines.

line'let, 1 lain'let; 2 līn'let, *n.* [Rare.] A short or a faint line.

line'man, 1 lain'man; 2 līn'măn, *n.* [=MEN, *pl.*] **1.** *Surv.* A man who carries the tape-line or chain. **2.** A man employed in the care of a railway, telegraph, or telephone, especially in making repairs. **3.** One who fishes with hook and line.

li'nen, 1 lin'en; 2 līn'ĕn, *a.* **1.** Made of the textile fiber of flax; as, *linen* cloth. **2**†. White as linen; pale. [< AS. *linen*, < *lin*, < L. *linum*, flax.]

lin'en, *n.* **1.** A fabric woven from the fibers of flax. There are many varieties of linen, such as *cambric*, *damask*, *lawn*, *sheeting*, *tow*, etc.

The official dress of a priest . . . was of white *linen.*

Bot.* Having the shape of a tongue; linguiform; ligulate.—**lĭn'gu-lif'er-ous,** *a.* Containing linguliæ; as, *linguliferous* rocks.

Lingulid (*Glottidia pyramidata*).

lĭn'gu-loid'a, 1 lĭŋ'gu-loid'ə; 2 lĭŋ'gū-loid'ə, *n. Conch.* An extinct genus of lyopomatous brachiopods found in the Lower Cambrian, closely related to the genus *Lingula.* [< L. *lingula,* dim. of *lingua,* tongue.]

lĭn-gu'li-dæ, 1 lĭŋ-gū'li-dē; 2 lĭŋ-gū'li-dē, *n. pl. Conch.* A family of lyopomatous brachiopods, especially those with an oblong or ovoid horny shell, a peduncle between the valves, and fleshy spiral colls directed upward. [< LINGULA.]

lĭn"gu-la-te-ra'i.—lĭn'gu-lid, *n.*—**lĭn'gu-loid,** *a.* & *n.*

lĭng'wort'‡, *n.* The white hellebore.

lĭng'y, 1 lĭŋ'i; 2 lĭŋg'y, *a.* Covered with ling or heather.

lĭn'gy, 1 lĭn'ji; 2 lĭn'gy, *a.* [Prov. Eng.] **1.** Limber; flexible; tall. **2.** Able to bear fatigue; active; strong. **3.** Idle; loitering.

lĭn'guo-ta'sal, *a.* & *n.* Same as LINGUANASAL.

lĭn"guo-pal'a-tal, 1 lĭŋ'gwo-pal'ə-təl; 2 lĭŋ'gwo-pāl'a-tal, *a.* Articulated between tongue and palate, as *y* in *year.*

lĭng'wort'‡, *n.* The white hellebore.

lĭn'gy, 1 lĭŋ'i; 2 lĭŋg'y, *a.* Covered with ling or heather.

lĭn'gy, 1 lĭn'ji; 2 lĭn'gy, *a.* [Prov. Eng.] **1.** Limber; flexible; tall. **2.** Able to bear fatigue; active; strong. **3.** Idle; loitering.

lĭn'hay, 1 lĭn'hē; 2 lĭn'hā, *n.* [Eng.] A farmyard shed. **lĭn'ny†.**

lĭ'nic, 1 lī'nik; 2 lī'nik, *n. Math.* A twelfth part of the German zoll or inch, a line. See MEASURE and note 230. [G., < L. *linea,* line.]

li-nig'er-ous, 1 li-nij'ər-əs; 2 li-nij'ər-əs, *a.* Bearing flax; producing linen. [< L. *linger, < linum,* flax, + *gero,* bear.]

lĭnim., *abbr. Linimentum* (liniment).

lĭn'i-ment, 1 lĭn'i-mənt or -ment; 2 lĭn'i-ment, *n. Med.* A liquid, sometimes oily, preparation for rubbing on the skin in cases of bruises, inflammation, etc. [F., < LL. *linimentum, < lino,* smear.]—**lĭne liniment,** same as CARRON-OIL.

lĭn'i-ment-um, 1 lĭn'i-men-təm; 2 lĭn'i-men'təm, *n.* [L.] *Pharm.* Liniment.

lĭ'nin, 1 lai'nin; 2 lī'nin, *n.* **1.** A white, bitter, crystallizable compound found in the purging-flax (*Linum catharticum*). **2.** Same as LINOSE.

lĭ'nine‡. **2.** *Biol.* A fiber of the nuclear reticulum that has little affinity for dyes; an achromatic thread of the nucleus; contrasted with *chromatin.* [< L. *linum,* flax.]

lĭn'ing', 1 lain'iŋ; 2 lī'niŋ, *n.* **1.** The act of one who lines, or the process of providing or fitting a lining. **2.** A covering of the inner surface of a thing, especially when of a different material; also, material suitable for such use; as, I bought some *lining* for a skirt. Specif.: (1) Inside boarding, as distinguished from sheathing or outside casing. (2) *Naut.* (*a*) A piece of canvas to strengthen a sail at a place exposed to special strain. (*b*) Planking to protect the side of a ship from injury; as, an anchor-*lining.* (3) A protecting coating on the bodies of puddling-furnaces or on the interiors of blast-furnaces; fettage. (4) Fuel-dust or clay on the sides of a canal or dam to keep in the water. **3.** A lagging or non-conducting jacket of a steam-engine. **4.** Figuratively, capital; as, money is the *lining* of a pocket or a purse. **5.** The process of cementing two pieces of marble together so as to polish two or four sides as if in one piece. **6.** [Prov. Eng.] Underwear; specif., flannel underwear. **7.** *Metal.* That variety of Babbitt metal which contains about 90 per cent. of tin.—**a'pron-lin"ing,** *n.* In joinery, the board covering the apron-piece of a staircase.—**lin'ing-brush',** *n.* A brush used in decorative work, or in metal work as a part of stage make-up.—**l.-felt,** *n.* Felt used for deadening sound between boards, or as a non-conductor for steam-pipes.—**l.-nail,** *n.* A small wrought-headed nail; a tacking-nail.—**l.-paper,** *n.* Paper suitable for lining, as for the inside of a book-cover, or for use between the weather-boarding and the studding of a frame building.—**l.-ship,** *n.* A thin or outer strip inside a freight-car to protect it from injury.

lĭn'ings, *n.* [Scot.] **1.** The act of measuring, as boundaries, with a line. **2.** A building permit granted by a dean of gild. **3.** The act of marking and arranging lines on a surface. The giving out of a hymn by the precentor line by line.

lining out. **5.** Fishing by means of a line.—**cross'-lin"ings,** *n. pl.* Lines for the purpose of dragging between two boats a line to which flies are attached.

lĭn'i-no-plast, 1 lĭn'i-no-plast; 2 lĭn'i-no-plast, *n. Biol.* A nucleolus. [< LINOSE, + -PLAST, form.]

lĭ'nis, 1 lī'nis; 2 lī'nis', *a. pl.* [F. l.] Cleanly; clean.

li-nit'ion, 1 li-nish'ən; 2 li-nish'ən, *n.* The process of anointing with liniment.

li-nit'is, 1 li-nai'tis or -nī'tis; 2 li-nī'tis or -nī'tis, *n. Pathol.* Inflammation of the areolar tissue surrounding the blood-vessels in the wall of the stomach. [< L. *linum,* flax.]

lĭnk', 1 lĭŋk; 2 lĭnk, *n.* **1.** *Mech.* A To-L as one link of a chain to another; interlock; as, to *link* arms. **2.** To connect by or as by a link; unite by some bond; couple.

Faith is the telegraphic wire which *links* earth and heaven.
HOLLAND *Mistress of Manse p.* 179. [c. *a. d.* 1897.]

II. *i.* To be or become connected; unite in marriage.—**linked regiments** (*Mil.*), two regiments or battalions of the regular British army stationed in the same military district, one doing home service while the other is abroad.—**linked vein** (*Geol.*), an ore-vein which by cross-sissures passes from one parallel fissure-vein to another.—**to link in** [Prov. Eng.], to cajole; entice.—**to l. up** (*Mach.*), to raise the links in an engine so that the valve gives a shorter cut-off.

lĭnk', *n.* [North. Eng. & Scot.] To shine; burn.

lĭnk', *vi.* [North. Eng. & Scot.] To do anything briskly or quickly; trip along.

lĭnk', *n.* **1.** One of the rings or loops of which a chain is made; anything doubled or closed together like such a link; hence, something which connects separate things; a bond; a tie. **2.** A single constituent part of a continuous series; as a causal or logical sequence; as, a *link* in a chain of evidence.

The present state of knowledge furnishes us with no *link* between the living and lifeless matter.
HUXLEY *Anat. Invert. intro., p.* 9. [A. 1888.]

3. [Colloq.] A section of a chain of sausage. **4.** *Mech.* (1) A connecting-bar with a bearing in each end. (2) A suspended slotted bar, on its eccentric-rod, in steam-engine valve-gear, that receives motion from the eccentric-rods and transmits it through a sliding block to the rocker-arm that drives a slide-valve. **5.** *Surv.* A length of 7.92 inches, used in land-surveying, being the 1/100 part of Gunter's chain. **6.** *Angling.* A segment of a hair-line. [< AS. *hlence,* link.]

—**grab'-link',** *n.* Same as SLIP-GRAB.—**link'-belt",** *n.* Same as CHAIN-BELT. **1.**—**l.-block,** *n.* Same as *link-engine.* The block sliding in or on a link, actuated thereby, and giving motion to the valve-stem, either directly or through other members of the valve-gear.—**l.-motion,** *n.* A device by which a shifting link is suspended.—**l.-lever,** *n.* A lever, and particularly the reversing-lever, controlling the link-motion valve-gear of a steam-engine.—**l.-pin,** *n.* A vertical pin engaging with the link-motion valve-gear.—**l.-plate,** *n.* A plate having the staple of a lock attached to it, used for fastening upon a link.—**l.-polygon,** *n. Mech.* Another name for polygon.—**l.-saddle,** *n.* The plate at the side of the link to which is attached the link-hanger on an engine or locomotive having the Stephenson valve-gear.—**l.-slot,** *n.* The slot in the curved member of a Stephenson link-motion.—**l.-slotter,** *n.* A machine for slotting out steam-engine links.—**l.-staff,** *n. Surv.* A staff marked with a scale of feet or links: used as a sighting-point when held vertically over a given place, also as a rough measure for short distances.—**link'work",** *n.* **1.** *Pure Mech.* An assemblage of connecting pieces for transmitting stress or motion. **2.** A fabric consisting of links joined together; a chain. **3.** *Geom* A linkage.—**l.-working,** *n. Naut.* The operation of winding a chain into the spiral depressions of a rope so as to fill them up.—**open l.,** a link having one side open, its ends lapping but not in contact; an open ring.—**Stephenson l.,** a link connected to the two eccentric-rods of an engine so arranged that either rod can be connected to the valve-gear for the purpose of reversing.

lĭnk', *n.* **1.** A torch of tow and pitch.

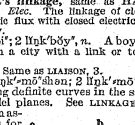
Meanwhile the fog and darkness thickened so, that people ran about with flaring *links,* proffering their services to go before horses in carriages, and conduct them on their way. DICKENS *Christmas Stories, Christmas Carol* stave 1, *p.* 32. [c. *a.* 1886.]

2. A link-boy. [Cor. of *lint,* < D. *lont,* match.]

lĭnk'2, *n.* Same as LINKS.

link'age, 1 lĭnk'ij; 2 lĭnk'aj, *n.* **1.** The act of linking, or the state of being linked. **2.** A series or system of links; especially, a number of pieces so fastened together as to turn about one another. When the motion is completely defined, the linkage is said to be **complete;** according to the degrees of freedom which they have, it is **primary linkage, secondary l.,** etc.; and according as it takes place in a plane or in space it is known as **plane l.** or **solid l.** If the planes of rotation are parallel, the linkage is *plane;* if not, *solid.*

3. *Chem.* The system of combination in which atoms or radicals exist in a molecule or compound. **4.** *Elec.* A relation between a magnetic line of force and the conductive coil that forms its vehicle. The sum of linkages is obtained as a product of the flow of magnetism by the number of coils in the conductor.



5. *Geom.* An imaginary assemblage of points and lines in space representing the envelop of a system of curves or surfaces.—**Hart's linkage,** same as HART'S CELL.—**line'-link'age,** *n. Elec.* The linkage of closed lines of magnetic or electric flux with closed electric or magnetic circuits respectively.

link'boy", 1 lĭnk'boi'; 2 lĭnk'bōy", *n.* A boy or man who lights passengers in a city with a link or torch. **link‡; link'man‡.**

link'ing, *n. Phon.* Same as HIATUS, 3.

link'work", 1 lĭnk'wûrk"; 2 lĭnk'wûrk"shən, *n.* **1.** A linkage describing definite curves in the same plane or in parallel planes. See LINKAGE, 2.

2. *Steam-engin.* An assemblage of parts for operating the valves of locomotive and similar engines, its essential feature being a slotted bar, usually curved, which is driven by one or two eccentrics, communicating its motion to a sliding block, the

Locomotive Link-motion.

a, valve-stem; *b,* radius-rod (slid-position of which in the ing block in midposition); *c,* link; *d,* slot of either arm of the eccentric-rod; *e,* eccentric; *f,* amount of valve-travel, cross-head; *g,* piston-rod; *h,* combination-lever; *i,* link-hanger; *j,* suspension-link; *k,* and the direction of the bell-crank; *l,* link-setting; *l,* reach-rod; *m,* link-support.

The principal link-motions are **Allan's link-motion,** a reversing gear which is changed by shifting the link and the radius-rod; **Gooch's l.,** in which the link is suspended and the block is connected with the valve-rod by a hinged connecting-rod; **Stephenson's l.,** in which the link is curved outwardly from its eccentrics.

lĭn"ko-lo'lo, 1 lĭŋ'ko-lō'lo; 2 lĭŋ'ko-lō'lo, *n.* A black African openbill stork (*Anastomus lamelligerus*).

lĭn'ke-ping, 1 lĭn'ch-piŋ; 2 lĭn'ch-piŋ, *n.* A town; capital of Östergötland province, S. Sweden; 108 m. S. W. of Stockholm.

lĭnks, 1 lĭŋks; 2 lĭŋks, *n. pl.* **1.** A flat or undulating stretch of sandy soil, more or less covered with grass or heather; the windings of a river or its banks. **2.** Grounds laid out for the game of *golf:* used also as a singular. [< AS. *hlinc,* ridge of land.]—**links goose,** a sheldrake.

lĭn'ks'ville, 1 lĭn'ch'vil, 2 lĭn'ch'vil, *n.* Same as LINCHVILLE.

lĭnk'y, 1 lĭŋk'i; 2 lĭŋk'y, *a.* Having the nature or appearance of links.

Lĭn'ley, 1 lĭn'li; 2 lĭn'ly, **Thomas** (1732–8/21795). An English musical composer and conductor; at one time joint proprietor with his son-in-law, Richard B. Sheridan, of Drury Lane theater; *The Carnival of Venice.*

Lĭn'ith'gow, 1 lĭn-lith'gō; 2 lĭn-lith'gō, *n.* **1. Marquis of** (9/11860–1/21908), John Adrian Louis Hope, first governor-general of the Australian Commonwealth, 1900–1902. **2.** A royal and municipal burgh and county town, Linlithgowshire, Scotland, scene of the murder of the regent Murray, 1570.

Lĭn'lith'gow-shire, 1 lĭn-lith'gō-shir, *n.* A county in S. E. Scotland; 120 sq. m.; the smallest county in the British Isles.

Lĭnn, *n.* Same as LIN.

Lĭnn, 1 lĭn; 2 lĭn, *n.* **1. John Blair** (3/11777–8/21804), an American divine, poet, and miscellaneous writer; *The Powers of Genius,* etc. **2.** An agricultural and grazing county in E. Iowa; 620 sq. m.; county-seat, Marion. **3.** An agricultural and grazing county in E. Kansas, 637 sq. m.; county-seat, Mound City. **4.** An agricultural and grazing county in N. Missouri; 630 sq. m.; county-seat, Linneus. **5.** An agricultural county in W. Oregon; 2,311 sq. m.; county-seat, Albany.

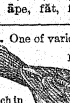
Lĭnn., *abbr.* Linnæus; Linnean.

Lĭn-næ'a, 1 li-nī'ə; 2 li-nē'ə, *n. Bot.* A monotypic genus of trailing and creeping evergreen plants of the honeysuckle family (*Caprifoliaceæ*), the only species being *L. borealis,* the twinflower. [< *Linnæus,* Swedish botanist.]

Lĭn-næ'ite, 1 li-nī'ait; 2 li-nē'īt, *n. Mineral.* A metallic, pale, steel-gray cobalt sulfid (CoS_2) in which part of the cobalt is replaced by iron and nickel, crystallizing in the isometric system. [< *Linnæus,* Swedish botanist.]

Lĭn-næ'us, 1 li-nī'us; 2 li-nē'ūs, *n.* [L.] (9/11707–1/16 1778.) A Swedish botanist, zoologist, and professor, who devised systems of classification for animals and plants; he greatly improved the science of botany; *Philosophia botanica.*—**Carl von Lĭnné‡.**

lĭn'nall", 1 lĭn'nēl"; 2 lĭn'nal', *n.* [Dial., Eng. or Scot.] A linchpin.



Lĭn'ne', 1 lĭn'nē'; 2 lĭn-nē', *n.* A volcanic region on the moon of small dimensions which, about 1865, became considerably reduced in size.

Lĭn-næ'an, 1 li-nī'ən; 2 li-nē'ən, *a.* Pertaining to Linnæus, or to his system of classification. Compare POST-LINNEAN; PRE-LINNEAN.

The **Linnean system** of botany, called **artificial** because, like that of Tournefort, which preceded it, it disregarded natural relationships, consisted of 24 classes based mainly on the number and disposition of the stamens, and a variable number of orders based partly on the number of styles or stigmas and partly on other characteristics. The **Linnean sexual system** of plant-classification is largely based on the sporophyls, which were thought to be the sexual organs. **Lĭn-næ'an.**—**Lĭn-næ'an-ism,** *n.* The teachings and practise of Linnæus, or of his followers. **Lĭn'ne-ism‡.**

Lĭn'nell, 1 lĭn'el; 2 lĭn'el, **John** (1792–1/21882). An English landscape- and portrait-painter.

lin'net, 1 lin'et; 2 lin'ĕt, *n.* **1.** One of various fringilloid singing birds of *Linota*, *Acanthis*, and related genera, especially the common European or **gray linnet**, or **gorse l.** (*Linota cannabina*), the male of which in summer has the breast and crown bright crimson. The European **mountain l.** (*L. flavirostris*) and the **redpoll l.** (*Acanthis linaria*) are also species. In some parts of the western United States the house-finch is called a linnet.

Linnet 1/2.

2. An ore colored like the linnet, of lead phosphate and carbonate. [< AS. *linete*, < L. *linum*, flax.] — **green linnet**, the greenfinch.

lin'net-hole', 1 lin'et-hōl'; 2 lin'ĕt-hōl', *n.* *Glass-making.* In the side of a furnace, a hole admitting smoke and flame to the arch. Compare LUNETTE.

Lin'nhe, 1 lin'i; 2 lin'ē, **Loch.** A sea-loch in Argyllshire and Inverness-shire, W. Scotland; length, 21 m.

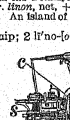
lin'ter, 1 lin'i; 2 lin'ẽr, *n.* An outhouse or shed for housing produce, tools, etc. **lin'ny†.**

li'no, 1 lī'no; 2 lī'no, *n.* Linotype; linoleum.

li'no-†, a stiff gossamer stuff.

li-nog'ra-phy, 1 lī-nog'ra-fi; 2 lī-nŏg'ra-fy, *n.* The process of producing on cloth the outlines of a picture to be filled in with pigments. [< L. *linum*, flax, + -GRAPHY.]

li-no'le-ic, 1 lī-nō'lē-ik; 2 lī-nō'lē-ĭc, *a.* *Chem.* Of, pertaining to, or obtained from linseed-oil. [< L. *linum*, flax, + *oleum*; see OIL.] — **li-no'lic**†. — **linoleic acid**, a thin, yellow, oily compound ($C_{18}H_{30}O_2$) found in various drying oils, as linseed, poppy, and hemp. It combines with bases and forms **linoleates** (salts of linoleic acid), also with glycerol to form the glyceryl linoleate (glyceryl ester of linoleic acid), to which compound is due the drying of linseed and similar oils.



li-no'le-um, 1 lī-nō'li-um; 2 lī-nō'lē-ŭm, *n.* A preparation of linseed-oil which is hardened by an oxidizing process, as by exposure to heated air, or by treatment with a sulfur chlorid, and used as a substitute for india-rubber. When mixed with ground cork and pressed upon canvas it is used as a floor-cloth or oilcloth. [< L. *linum*, flax, + *oleum*; see OIL.]

lin-om'e-ter, 1 lin-om'i-tẽr; 2 lin-ŏm'ē-tẽr, *n.* *Print.* That part of a linotype machine which records the number of ems set up. [*lin*, < L. *linum*, flax.]

lin'on, 1 lin'on; 2 lin'ŏn, *n.* Lawn: a trade word. [F., < **li-nop'ty-la**, 1 li-nop'ti-la; 2 lī-nŏp'tē-la, *n.* *Paleobot.* A genus of fossil ferns common in the Pennsylvanian (Upper Carboniferous) period. [< Gr. *linon*, net, + *ptera*, fern.]

Lin'o-ta, 1 lin'ō-ta; 2 lī-nō'tȧ, *n.* An island of Gergent province, Italy; 85 m. W. of Malta.

li'no-type, 1 lai'no-[or lin'o-]taip; 2 lī'no-[or lin'o-]tīp, *n.* **1.** A line of type cast in one piece; a type-bar or type-slug. **2.** A machine for producing stereotyped lines or bars of words, etc., as a substitute for typesetting. [< L. *linea*, LINE1, *n.*, + OF + -TYPE.] — **li'no-type, a.** *tl.* —

Linotype.

li'no-typ'er, n. **li'no-typ'ist.**

li'nous, 1 lai'nus; 2 lī'nŭs, *a.* [Rare.] Relating to or in a line.

lin-ox'in, 1 lin-ok'sin; 2 lin-ŏk'sĭn, *n.* *Chem.* An oxidized product ($C_8H_{12}O_3$) of linseed-oil, *made by spreading the oil in thin layers and exposing it to the air or other oxidizing influences.* [< LINOLEIC + OXYGEN.] — **lin'pin'**, 1 lin'pin'; 2 lin'pĭn', *n.* *Mach.* One of the pins or projections on the edge of a

Linpin.

c, channels along which the matrices descend, according to the operation of the keyboard.

lin'quen, 1 lin'kwen; 2 lĭn'kwĕn, *n.* Same as LINGUEN.

lin'quet, 1 lin'kwet; 2 lĭn'kwĕt, *n.* A tongue to form a flue: same as *n.* 1. A tongue. **2.** That portion of the reed, and a line in the direction of a sword-belt which over-cast automatically by the stereotype machine to form a vertical division between columns. [< L. *linguetta*, dim. of *lingua*, tongue.]

lin'sang, 1 lin'sang; 2 lĭn'sȧng, *n.* [E. Ind.] A civet-like carnivore, whitish or yellowish, with brown or black markings and a very long tail. *Prionodon linsang* is the common species of Borneo and Java. *Polaxa pocensis* is the African linsang.

lin'seed', 1 lin'sēd'; 2 lĭn'sēd', *n.* Flaxseed. [< AS. *linsæd*, < *lin* (see LINE2, *n.*) + *sæd*, seed.] — **lin'seed'-cake'**, *n.* The residuum from flaxseed after the oil has been expressed. — **meal**, *n.* Powdered linseed-cake. — **l.-mill**, *n.* A mill in which flaxseed is ground. — **l.-oil**, *n.* A drying-oil expressed from flaxseed: the most valuable of paint-oils.

lin'sey, 1 lin'zi; 2 lĭn'zy, *n.* *l.* *Mixtly.* (1) A particular kind of rock; hind. (2) Nearly sandstone. **2.** A fabric of linen and wool; linsey-woolsey. [< OF. *linsel*, ult. < L. *linum*, flax.]

lin'sey-wool'sey, 1 lin'zi-wul'zi; 2 lĭn'zy-wŏl'zy, *a.* **1.** Made of linen and wool mixed. **2.** Hence, made of unsuitable components; ill-assorted.

lin'sey-wool'sey, *n.* **1.** *Fabrics.* A cloth (1) with linen warp and woolen filling, or (2) with cotton-and-linen warp and woolen filling.

Modesty in *linsey-woolsey* is as sweet as in muslin.
LOUISA M. ALCOTT *A Garland for Girls* p. 101. (B. 1868.)

2. Any fabric of unsuitable mixture; any inferior material. **3.** Anything unsuitably mixed; a motley composition; medley of absurdities; balderdash; jargon; gibberish. [< LINSEY + WOOL.]

Lin'sley, 1 lin'zi; 2 lĭn'zy, **Joel Harvey** (7/8 1790–1/2 1868). An American lawyer and Congregational clergyman; president of Marietta College, Ohio.

lin'stock, 1 lin'stok; 2 lĭn'stŏk, *n.* An iron-shod pike with a crotch designed to hold a rope match for firing a gun in the old-fashioned way. [< D. *lontstok*, < *lont*, match, + *stock*, stick.] **lint'stock†.**

Lin'ton-gur, 1 lin'tun-gur; 2 lĭn'tŭn-gûr', *n.* A district in South Haidarabad state, British India; 4,907 sq. m.

lint, 1 lint; 2 lĭnt, *n.* **1.** *Surg.* The soft down of raveled or scraped linen; used in dressing wounds. **2.** The netting of a seine or similar net. **3.** A net for the hair; any net. **4.** [So. U. S.] Cotton-fiber either on the seed or after being ginned and before baling.

This year's crop, 7,500,000 bales, will furnish 3,000,000,000 pounds of *lint*, which would clothe in a cotton suit every human being on earth. H. W. GRADY *New South* p. 210. (B. n. 1890.)

5. Soft downy feathers; nap or down; fluff. **6.** [Local.] Flax. [Prob. < MHL. *lin*, flax, < AS. *līn*; see LINE3, *n.*]

lin'net† [Dial.] — **fairy lint**, the dwarf flax (*Linum catharticum*). — **lint'-bells'**, *n.* The common flax (*Linum usitatissimum*). — **l.-box**, *n.* A receptacle in a cotton-bailing press in which the lint, or ginned cotton, is packed. — **l.-doctor**, *n.* A scraper for removing fluff from fabrics that are to be printed. **1.-ductor**†. — **lint'-seed'**, *n.* Linseed. — **l.-white**, *n.* White as lint; flaxen. — **patent l.**, cotton batting-sheet l.†.

lin'tel, 1 lin'tel; 2 lĭn'tĕl, *n.* [LIN-TELED or LIN'TELLED, LIN'TELING or LIN'TEL-LING.] To provide or furnish with lintels.

lin'tel, *n.* *Arch.* **1.** The horizontal top piece of a doorway or window-opening. **2.** Any horizontal beam resting on two bold ends on vertical supports: used in the phrase *lintel construction*, to contrast masonry of this type with *arched construction*. [OF., < LL. *lintellus*, dim. of L. *limes*, boundary.] **lin'tern**†.

lin'teling, 1 lin'te-ling; 2 lĭn'tĕ-lĭng, *n.* Material used in making lintels. **lin'tel-ling**†.

lint'er, 1 lint'er; 2 lĭnt'ẽr, *n.* **1.** A machine for removing linters from cotton-seeds after they have been ginned. **2.** *pl.* The very short fibers remaining to one-quarter of an inch in length, which adhere to cottonseed after it has been passed once through a cotton-gin: they are removed from the seed by a second ginning.

lin'ter, *n.* [Dial.] Same as LEATHER-COAT.

Lin'thwaite, 1 lin'thwēt; 2 lĭn'thwāt, *n.* A parish in the West Riding of Yorkshire, England, on Colne river.

lin'tie, 1 lin'ti; 2 lĭn'tĭe, *n.* [P. l.] **1.** A thunderbolt. **2.** Lightning. [Tag.]

lin'tie, 1 lin'ti; 2 lĭn'tĭe, *n.* [Scot.] The linnet: a diminutive.

lin'tin, 1 lin'tin; 2 lĭn'tĭn, *n.* Staple of flax, hemp, etc., of inferior grade. [< LINT.]

Lin'ton, 1 lin'tun; 2 lĭn'tŭn, *n.* **1. Elizabeth Lynn** (7/8 1822–1898), an English-American novelist, wife of William James Linton (1/12 1812–8/16 1897). **2. William** (12/21812–1/21898), a wood-engraver and illustrator of artistic books, born in England, resident since 1858 in the United States. He wrote copiously on wood-engraving and several volumes of verse. **4.** A town in Greene county, Ind.

lint'white', 1 lint'hwīt; 2 lĭnt'hwīt, *n.* *Mineral.* A green variety of thomsonite. [< MHG. L. A. *Linton.*]

Lions vary greatly, especially in color and in the size of the mane; those of Gujerat formerly were supposed to be maneless. From a specimen in the New York Zoological Park.

Lion. 1/48

They are not arboreal, but commonly lie in ambush and spring upon their prey, which consists of the larger herbivores (buffaloes, giraffes, zebras, etc.) In size lions are exceeded by the largest tigers. The large head, flashing eye, copious mane, great strength, and noble appearance of the lion, have given rise to notions which have no foundation in fact, of its nobility of character and generosity of disposition, have led to its being called the "king of beasts." Frederick G. Selous, the African hunter, declares that there is little or no danger in meeting a lion or lions in the daytime. Even in parts of the country where firearms are unknown and where natives seldom or never interfere with lions, lions seem to have an instinctive fear of man. They roam abroad by night searching for prey, and when hungry are bold and daring. When they grow old, lions sometimes become man-eaters, and, having once tasted human flesh, will continue to do so till killed. But the man-eating lion of Africa is not invariably an old animal. *The Living Animals of the World* vol. ii. p. 284, pl. 30 et seq. (N. HUDSON, soc. '03.)

S. R. GARDINER *Thirty Years' War* p. 175. [c. P. P. 1893.]

SYN.: attend, hearken, hear, heed, list. To *hear* is simply to become conscious of sound, to *listen* is to make a conscious effort or endeavor to *hear.* We may *hear* without *listening,* as we may *listen* evidently without hearing. In one way we may *listen* without *hearing,* as to a distant speaker. In *listening* the ear is intent upon the sound; in *attending* the mind is intent upon the thing heard. *Harken* implies some attention to the meaning or import of the sound. To *heed* is not only to *attend,* but to remember and observe. *Harken* is nearly obsolete. Between *listen* and *hear* is a difference like that between the words look and see. *Listen* is to *hear* le-nore, neglect, scorn, slight.— Prep.: we listen *for* what we expect or desire to hear; we listen *to* what we actually do hear; listen *for* a train; listen *to* the music; listen *to* the lesson.— **to listen in** (*Radio*), to tune in a radio-receiving set so as to connect it with some particular distributing center or station; also [Colloq.] to overhear means of receiving station so as to hear messages directed to another station.— **lis'ten-ing-cam',** *n.* In a telephonic exchange system, a cam to put an operator's telephone in circuit with a subscriber who connected with another by means of a pair of cords. **lis't'en-ing-key'‡.** — **listening-gallery,** *n.* A branch gallery.— **l.-post** (*Mil.*), a position near enough the front to watch an outpost may oversee enemy activity, detect mining, etc., and guard against surprise attack.

lit'er-a-ri-ly, [lit'er-ē-ri-li; 2 lit'er-ā-ri-li, *adv.* In literary respect or manner.

lit'er-a-ry, [lit'er-ē-ri; 2 lit'er-ā-ry, *a.* **1.** Of, pertaining to, or used in literature; included in, appropriate to, or worthy of literature: as, *literary* style.

With Luther, the *literary* language of Germany became New High-German. MAX MÜLLER *Chips* vol. iii, p. 24, [c. 1874.]

2. Versed in or devoted to literature; as, a *literary* woman. [< *literature*, < L. *litera*, letter.] — **literary property**, property in literary compositions or productions; also, the exclusive right to publish such productions.

lit'er-a-ry-ism, [lit'er-ē-ri-'izm; 2 lit'er-ā-ry-'izm, *n.* The use of stock or hackneyed literary phrases, forms, etc.

lit'er-ate, [lit'er-at; 2 lit'er-at, *a.* **1.** Having a knowledge of letters; instructed; lettered: opposed to *illiterate*.

Addison's 'Cato-Marc' delighted a *literate* and learned synthetic class of readers. SPODDARD in *Scribner's Nov.*, 1878, p. 4.

2. Of or pertaining to letters; literary; of the nature of literature.

In *Orkney*, recently discovered runic inscriptions . . . preserve *literate* memorials of adventurous Northmen from the tenth to the twelfth century.
D. WILSON *Prehistoric Man* p. 308. [MACM. 1865.]

[< L. *literatus*, < *litera*, letter.]

lit'er-ate, *n.* **1.** One versed in letters; a literary person; one able to read and write. [Eng.] An educated person who has not received a university degree, especially one who has taken holy orders.

lit'er-a-tesque', [lit'er-a-tesk'; 2 lit'er-ə-'tesk', *a.* [Recent & Rare.] Fit to be set into literature; suitable for literature.

lit'er-a'ti, [lit'er-ā'ti; 2 lit'er-ā'ti, *n. pl.* [-TUS, *sing.*] [L.] Men of letters; scholars; savants: rare in the singular: applied especially to the learned classes in China.

Great was instantly received with honour by the Scotch *literati*.
EDMUND GOSSE *Thomas Gray* p. 107. [n. 1882.]

lit'er-a'tim, [lit'er-ā'tim; 2 lit'er-ā'tim, *adv.* Letter for letter literally. [LL., < L. *litera*, letter.]

lit'er-a'tion, [lit'er-ē'shon; 2 lit'er-ā'shon, *n.* The process or act of representing by letters; as, the *literation* of one of the African dialects.

lit'era-ti'ka, [lit'er-ē-tist; 2 lit'er-ā-'tist, *n.* [Rare.] A literary man. [In man of letters. [Sp.]

lit'er-a'to, [lit'er-ā'to; 2 lit'er-ā'to, *n.* One of the literati: scholar; pedant. [< It. *letterato*, < L. *litera*, letter.]

lit'er-a'tor, [lit'er-ē'tor; 2 lit'er-ā'tor, *n.* **1.** A petty schoolmaster; pedant. **2.** A literary man. **3.** [Rare.] One devoted to textual criticism. **4†.** A bibliographer; a person who pretends to learning. [L., < *litera*, letter.]

lit'er-a-ture, [lit'er-ə-shür or -chur; 2 lit'er-ə-chur or -tür, *n.* **1.** Any written or printed matter; specifically, the human mind collectively; especially, such productions as are marked by elevation, vigor, and catholicity of thought, by fitness, purity, and grace of style, and by artistic construction.

Literature, in its narrowest and strictest sense, belongs to the sphere of high art, and embodies thought that is powerful, inspiring and elevating, rather than merely knowledge-giving (excluding all merely scientific writings); catholic, or of interest to man as man (excluding writings that are merely technical, or for a class, trade, profession, or the like, only); sensitive in its tone and style (excluding all writings violating the principles of correct taste); and shaped by the creative imagination, or power of artistic construction (excluding all writings of shapeless and formless or without essential and organic unity). It may be divided into (1) **oratory**, where the representation is for the sake of the effect on another mind; (2) **philosophical discourse**, where it is for the sake of the theme itself; and (3) **poetry**, where it is embodied in beautiful form, mainly for the sake of the form. See these words.

By *literature* I mean those great works . . . that rise above professional or commonplace uses, and take possession of the mind of a whole nation or a whole age.
DEAN STANLEY *Thoughts on Literature* cexxxix, p. 274. [D. n. d.]

2. The portion of such writings that pertains to any particular epoch, country, subject, or branch of learning; as, ancient *literature*; the *literature* of chemistry.

The *literature* of any age is but the voice of its prevalent tendencies. W. M. PUNSHON *Lectures and Sermons, Bungay* p. 123.

3. In a restricted sense, the portion of literary productions that excludes the positive sciences; belles-lettres.

4. The act or occupation of a literary person; literary work. **5.** Acquaintance with letters or books; learning.

It is only by reason of the opposition of letters in the function of signs to sounds as heard that the literary knowledge of books is called *literature*' and that a man versed in it is called . . . a man of letters. RUSKIN *Sesame* p. 20. [w. & s. 1867.]

6. *Mus.* The total number of compositions for a particular instrument or combination of instruments: as, the *literature* of the violin. **7.** [Colloq.] Any printed matter used or distributed for advertising or political purposes, etc.; as, campaign *literature*. [Off., < L. *literatura*, < *litera*, letter.] **Belles-lettres**, Syn.: belles-lettres, books, literary productions, publications, writings. *Literature* is collective, referring to all that has been published in some land or age, or in some department of human knowledge; as, the *literature* of Greece; the *literature* of the Augustan age; the *literature* of politics or of art. *Literature*, used absolutely, denotes what has been called "polite *literature*" or *belles-lettres*, *i. e.*, the works collectively that embody taste, feeling, loftiness of thought, and purity and beauty of style, as poetry, history, fiction, and dramatic compositions, including also much of philosophical writing, as the *Republic* of Plato, and oratorical productions, as the orations of Demosthenes. In the broad sense we can speak of the *literature* of science; In the narrower sense, we speak of *literature* and science as distinct departments of knowledge. *Literature* is also used to signify literary pursuits or occupations; as, to devote one's life to *literature*. Compare KNOWLEDGE.

— **comparative literature**, the study of the literatures of several peoples as to the relations that they bear one to another with reference to their similarity or dissimilarity of *style* or *thought* at the same or different periods of time.

— **light l.**, literature that requires little mental exertion to understand, and is produced chiefly for amusement: almost usually to fiction.— **polite l.**, belles-lettres.— **lit'er-a-tured**, *a.* Having knowledge of literature.

lit'er-a'tus, [lit'er-ē'tus; 2 lit'er-ā'tus, *n.* See LITERATI. **li-ter'nus**, [li-ter'nus; 2 li-'tər'nus, *n.* An ancient town in Campania, Italy. **Li'ter-non'** [Gr.].

lit'er-ose, *a.* [Rare.] Manifesting or affecting literary character or style.— **lit'er-os'i-ty**, *n.*

lit'es, [lit'ēz; 2 lit'ēz, *n.* Plural of LIS.

lith, *n.* [Prov. Eng.] A limb: joint; segment; part: frequently used in the phrase **lith and limb**.

lith-. See LITHO-.

-lith. See -LITE.

Lith., *abbr.* Lithuanian.

lith., *abbr.* Lithograph; lithography.

lith'a-gog(ue), [lith'ə-gog; 2 lith'a-gōg, *a.* Used for or efficacious in removing stone from the bladder or kidneys. [< Gr. *lithos*, stone + *agōgos*, < *agō*, carry away.]

lith'a-gog(ue), *n.* *Med.* **1.** A medicine efficacious in expelling calculi. **2.** Forceps used in lithotomy.

Li'thange', *n.* Same as LITANG.

lith'an-ate, [lith'ən-āt; 2 lith'ən-'āt, *n.* *Elec.* A hard lead peroxid used as an electrode in storage batteries. [< LITH- + (perhaps) ANODE.]

lith'an-thrac'ite, [lith'ən-thras'īt; 2 lith'ən-thrak'īt, *n.* Of or pertaining to anthracite; resembling anthracite. [< Gr. *lithos*, stone, + *anthrax*, coal.]

lith'an-thrax, [lith'ən-thraks; 2 lith'ən-'thraks, *n.* Stone coal: distinguished from *xylanthrax*. [< LITH- + Gr. *anthrax*, coal.]

lith'arge, [lith'ärj; 2 lith'ärj, *n.* Lead monoxid (PbO) made by heating metallic lead moderately in a current of air. It is yellowish, and is used as a pigment in the making of lead-compounds and of flint glass, and for glazing pottery. [F., < L. *lithargyrus*, < Gr. *litharguros*, < *lithos*, stone, + *argyros*, silver.] **lith'ar-gi'ē**; **lith'ar'gy**.

lith'ate, *a.* [Rare.] Of, or of the nature of, lithic acid.

lith'ate, [lith'ēt; 2 lith'āt, *n.* A salt of lithic or uric acid. [< LITHIC.] **lith'i-ate'**.— **li-that'ic**, *a.*

lithe, *a.* [Lithe, *vt.* To listen to; give heed to; hearken. **lythe**†.

lithe, *a.* [Lithe, *vt.* To listen to; give heed to; hearken. **lythe**†.

lithe, *a.* [LITHE'ER; 2 LITHE'EST.] Bending easily or gracefully; slender and willowy; supple; limber.

Sohrab sprang aside *Lithe* as the glancing snake.
MATTHEW ARNOLD *Sohrab and Rustum* l. 418.

[< AS. *lithe*, soft.]— **lithe'ly**, *adv.*— **lithe'ness**, *n.*

lith-ec'ta-sy, [lith-ek'tə-si; 2 lith-ek'tə-sy, *n.* *Surg.* The operation of extracting stone from the bladder by dilating the urethra, cutting into the prostate gland, or using the urethra. [< LITH- + Gr. *ektasis*; see ECTASIS.]

lith-ec'to-my, [lith-ek'tə-mi; 2 lith-ek'tə-my, *n.* Lithotomy. [< LITH- + Gr. *ek*, out, + -TOMY.]

lith-e'mi-a, [lith-ē'mi-ə; 2 lith-ē'mi-a, *n.* *Pathol.* An excess of urates and uric acid in the blood. [< LITH- + Gr. *haima*, blood.] **lith-æ'mi-a**†.— **lith-em'ic**, *a.*

lith'er, *n.* [Lithe, *a.* + -ER; LITH'ER'ER.] Bending easily or gracefully; slender and willowy; supple; limber.

Sohrab sprang aside *Lithe* as the glancing snake.
MATTHEW ARNOLD *Sohrab and Rustum* l. 418.

[< AS. *lithe*, soft.]— **lithe'ly**, *adv.*— **lithe'ness**, *n.*

lith-ec'ta-sy, [lith-ek'tə-si; 2 lith-ek'tə-sy, *n.* *Surg.* The operation of extracting stone from the bladder by dilating the urethra, cutting into the prostate gland, or using the urethra. [< LITH- + Gr. *ektasis*; see ECTASIS.]

lith-ec'to-my, [lith-ek'tə-mi; 2 lith-ek'tə-my, *n.* Lithotomy. [< LITH- + Gr. *ek*, out, + -TOMY.]

lith-e'mi-a, [lith-ē'mi-ə; 2 lith-ē'mi-a, *n.* *Pathol.* An excess of urates and uric acid in the blood. [< LITH- + Gr. *haima*, blood.] **lith-æ'mi-a**†.— **lith-em'ic**, *a.*

lith'er, *a. & n.* Same as LITHE, LITHER.

lith'er, *a.* [Lithe, *a.* + -ER; LITH'ER'ER.] Bending easily or gracefully; slender and willowy; supple; limber.

lith'er, *a.* [Lithe, *a.* + -ER; LITH'ER'ER.] Bending easily or gracefully; slender and willowy; supple; limber.

lith'er†, *a.* Bad; worthless; idle. **lith'er-ous**†.— **lith'er-ly**†, *adv.*— **lith'er-ness**†, *n.* Worthlessness.

lith'er, *pron.* [Lithe, *a.* + -ER; LITH'ER'ER.] Bending easily or gracefully; slender and willowy; supple; limber.

lith'er, *n.* [Prov. Eng.] Mischievous; crafty. **2†.** Lazy. **lith'er-ly**†.

lith'e some, [lith'səm; 2 lith'səm, *a.* [Poet.] Lithe; lissom; nimble.

Ho, un! Aldoneus,' cried the *lithesome* god.
BULWER-LYTTON *Last Tales, Death and Sleepwalk* st. 42.

[< LITHE, *a.*, + -SOME.]— **-ness**, *n.*

Lith'gow, [Lith'gō; 2 lith'gō, *n.* **1. William** (1583?–1645), a Scottish traveler; tortured and imprisoned by the Spanish Inquisition as a spy. **2.** A town in New South Wales.

lith'i-a, [lith'i-ə; 2 lith'i-a, *n.* A fluid obtained from a small tree (*Rhus caustica*) which blisters the skin as severely as its congener the poison-oak of the United States. Its hard wood is used by wheelwrights and cabinetmakers.

lith'i-a, [lith'i-ə; 2 lith'i-a, *n.* *Chem.* A white caustic compound (LiO) that dissolves slowly in water to form lithium hydrate; lithium oxid: formerly *lithion*. [< LITHIUM.] **lithia emerald** (*Mineral*), same as HIDDENITE.— **lithia water**, see WATER.

lith'i-a'sis, *n.* *Pathol.* Lithiasis, especially when affecting the eyelids. [< Gr. *lithias*, stone.]

lith-i'ca, [lith-i'kə; 2 lith-i'ka, *n.* *Pathol.* The formation of gravelly concretions in the body, especially in the urinary passages. [< Gr. *lithiasis*, < *lithos*, stone.]

lith'i-at'ic, [lith'i-at'ik; 2 lith'i-'a-tik, *a.* [Rare.] Affected with lithiasis.

lith'i-fy, [lith'i-fī; 2 lith'i-fy, *vt.* [-FAY'ED; -AY'ING.] To *infuse* with lithia.

lith'ic, [lith'ik; 2 lith'ic, *a.* **1.** *Med.* Of or pertaining to calculus or stone in the bladder. **2.** Of or pertaining to stone.

An area measuring 600 feet each way was enclosed by terraced walls of the utmost *lithic* grandeur.
JAMES *Transactions Hist. Hist. Soc.*, vol. i, pt. i, p. 198. [n. d. 1865.]

3. Of or pertaining to lithium. [< Gr. *lithikos*, < *lithos*, stone.]— **lithic acid** (*Chem.*), uric acid: a former name.— **lithic age**, same as STONE AGE. See AGE, n. (4).

lith'i-ca, *n.* *Med.* A medicine given for calculus.

lith'i-cal, [lith'i-kəl; 2 lith'i-cal, *a.* *Petrol.* Pertaining to or referring to the size, shape, and mutual disposition of the constituents of a rock,— that is, to the texture in the limited sense, as distinguished from structure. [< Gr. *lithos*, stone.]

lith'i-fi-ca'tion, [lith'i-fi-kā'shon; 2 lith'i-fi-ca'shon, *n.* The consolidation or hardening of loose mineral aggregates into stone. Compare PETRIFACTION. [< Gr. *lithos*, stone, + L. *facio*, make.]

lith'i-fy, [lith'i-fī; 2 lith'i-fy, *vt.* [Rare.] To convert into stone. [some or broth.

lith'ing, [lith'in; 2 lith'ing, *n.* [Scot.] Thickening for

lith'i-on-ite, [lith'i-on-īt; 2 lith'i-on-īt, *n.* Lepidolite.

lith'i-o-phil-ite, [lith'i-ō-fil-īt; 2 lith'i-ō-fil-īt, *n.* *Mineral.* A vitreous salmon to brown lithium-manganese phosphate ($LiMnPO_4$), crystallizing in the orthorhombic system. [< LITHIUM + Gr. *philos*, loving.]

lith'o-phyl-o-rite, [lith'ō-fil'ō-rīt; 2 lith'ō-fil'ō-rit, *n.* *Mineral.* A metallic bluish-black hydrated manganese-manganite that is closely allied to psilomelane. [< Gr. *lithos*, stone, + *phyllon*, leaf.]

lith'i-ta'ti-da, [lith-i-tā'ti-də; 2 lith-i-'tā'ti-da, *n. pl.* *Spong.* A division of sponges, especially a suborder of chondrosperglans with a hard skeleton composed of articulating desmic spicules. [< Gr. *lithitēs*, look like a stone, < *lithos*, stone.]

—lith'i-tid, lith-is'ti-dan, *a.* & *n.*

lith'ite, [lith'īt; 2 lith'īt, *n.* An otolite, especially of a medusa. [< Gr. *lithos*, stone.]

lith'i-um, [lith'i-əm; 2 lith'i-um, *n.* A soft silver-white metallic element, the lightest solid element. See ELEMENT. [< Gr. *lithos*, stone.]

lith'o-, **lith-**, [lith'ō-, lith-; 2 lith'ō-, lith-. From Gr. *lithos*, stone: combining forms.— **lith'o-bex'ia**, *n.* *Pathol.* Cough attended by the spitting of gravelly concretions.— **lith'o-bib'li-on†**, *n.* A bibliolite.— **Lith'o-bi'i-dæ**, *n. pl.* *Entom.* A family of holotarsian chilopods with 15 scuta and two kinds, large alternating with small. **Lith'o-bi'us**, *n.* (t. g.)— **lith'o-bi'id**, *a.* & *n.*— **lith'o-bi'oid**, *a.*— **lith'o-bi'te**, *a.* *Chem.* Of, pertaining to, or derived from bilin.— **lithobilinic acid**, an organic compound obtained in the decomposition of certain bile-products.— **lith'o-bi-o'ta**, *n.* Belonging or pertaining to the natural state of crystals, stones, etc.— **lith'o-bi'o-tism**, *n.* The undeveloped existence of crystals, etc.— **lith'o-bo'li-a**, *n.* The practice of throwing stones, in use on certain ancient festivals, as at the Lupercalia at Rome.— **lith'o-car'bon**, *n.* A substance extracted from a bituminuous limestone found in Uvalde county, Tex., employed in making varnishes and insulators.— **lith'o-carp**, *n.* A petrified fruit; carpolite.— **lith'o-ce-no'sis**, *n.* *Surg.* The removal from the bladder of the bits of calculi that result from lithotrity.— **lith'o-chromat'ic**, *a.* Pertaining to lithochromatics. **lith'o-chromat'ics**.— **lith'o-chro'mics**, *n.* The art or process of painting in oil on stone and printing therefrom on canvas. **lith'o-chro'mics**†; **lith'ō-chro-my**†.— **lith'o-chro'ma-to-graph'ic**, *a.* Same as CHROMOLITHOGRAPHIC.— **lith'o-chro-nog'ra-phy**, *n.* Same as CHRONOLITHOGRAPHY.— **lith'o-chrys-og'ra-phy**, *n.* Printing on stone in gold.— **lith'o-clast**, *n.* *Surg.* A forceps for crushing calculi in the bladder.— **lith'o-clas'tic**, *a.*— **lith'o-clas'ti-cism**, *n.* Same as LITHOTRITY.— **lith'o-clys'mi-a**, *n.* Same as LITHOLYSIS. **lith'o-clys-my**†.— **lith'o-col'la**, *n.* A cement for stones.— **lith'o-col-let'ic**, *a.* & *n.* *Pathol.* Same as LITHAGOGUE.— **lith'o-col-let'tis**, *n.* (t. g.)— **lith'o-col'le-tid**, *a.* & *n.*— **lith'o-col'le-toid**, *a.*— **lith'o-co-ral'li-a**, *n. pl.* *Zoöph.* The coralligenous actiniarians.— **lith'o-co-ral'line**, *a.*— **lith'o-cul'ture**, *n.* *Anthrop.* The stage or type of development in which stone is chiefly used for implements.— **lith'o-cyst**, *n.* *Zoöph.* A sac-like body containing concretions, as at the umbrella-margin of certain medusæ.— **lith'o-cys'tis**, *n.* [-TES'DES, *pl.*] [NL.] *Med.* = MA-TA, *pl.*] *Zool.* An umbonal plate which carries a ligament, as in anatinid and lyonsiid bivalves.— **lith'o-di-a'ceis**, *n.* *Med.* The dissolving of a stone in the bladder.— **lith'o-di'a-lyt'ic**, *a.*— **lith'o-di'a-lyze**, *vt.* [-LYZED; -LYZ'ING.] A family of notopodous decapods having an ovate-triangular form with a spine-like rostrum and eyes on the side of it. **Lith'o'des**, *n.* (t. g.)— **lith'o-did**, *n.* & *a.*— **lith'o-dome**, *n.* A bivalve shell that perforates stone, as a petricola or a lithodomus.— **lith-od'o-mous**, *a.* Of, pertaining to, or of the nature of a lithodome; perforating.— **lith'o-don'mus**, *n.* [-MI, *pl.*] A myrtiloid mussel-like bivalve (genus *Lithodomus*). They are of cylindrical form, wedge-shaped behind, and burrow in rocks, shells, etc.— **lith'o-dyte**, *n.* *Chem.* Of, pertaining to, or obtained from gall.— **lithofellic acid**, a crystalline organic compound ($C_{26}O_4H_{42}$), a decomposition product of the ingredients of the bile, found as a constituent of the Oriental bezoar.— **lith'o-fel'lin**, *n.* *Chem.* A high explosive. See EXPLOSIVES.— **lith'o-gen'e-sis**, *n.* **1.** *Pathol.* The formation of calculi. **2.** *Geol.* The process of the production or development of minerals and rocks.— **lith'o-ge-net'ic**, *a.*— **lith'o-gen'e-sy**, *n.* The science of the origin of minerals and of the causes of their modes of occurrence.— **lith'o-gen'ous**, *a.* Capable of forming stone, as the coral-making polypes.— **lith-og'e-ny**, *n.* The formation of calculi.— **lith'o-glyph**, *n.* A carving or engraving of a stone or gem; also, a stone or gem so engraved.— **lith'o-glyph'ic**, *a.*— **lith-og'ly-phite**, *n.* A fossil resembling the appearance of being artificially carved.— **lith'o-glyp'tic**, *a.* *Art.* Relating to the art of engraving gems and stones.— **lith'o-glyp'tics**, *n.* The art of executing; the cutting or engraving of precious stones or gems.

Other words beginning with these prefixes will be found in alphabetical places, either singly or in groups.

lith'o-graf, *pp.* Lithographed. PHIL. SOC.

lith'o-gram, [lith'ō-gram; 2 lith'ō-gram, *n.* A form of the hectograph. [< LITHO- + Gr. *gramma*; see GRAM, *n.*]

lith'o-graph, [lith'ō-graf; 2 lith'ō-graf, *n.* & *a.* **1.** To **lith'o-graf'**,] produce or reproduce by lithography. **II.** *t.* To practise lithography. **lith-og'ra-phist**.

lith'o-graph, *n.* **1.** A lithographic print. **2.** [Rare.] A writing or record.

Unchanged the awful *lithograph*
Of power and glory underfoot.
TENNYSON *Lucretius* l. 1 *in El Ghor* st. 4.

[< LITHO- + -GRAPH.] — **scraped lithograph**, an impression the design of which is made in white on black.

lith-og'ra-pher, [l. **lith-og'ra-fer**; 2. **lith-og'ra-fer**, *n.* **lith'o-graf'er**,] One who lithographs or who is engaged in lithography.

lith'o-graph'ic, [l. **lith'ō-graf'ik**; 2 **lith'ō-graf'ic**, *a.* Of, pertaining to, or produced by lithography; made by printing from stone, as a picture.— **lithographic retail**.— **lithographic ink, crayon, or chalk**, a greasy material made of tallow, soap, etc., and coloring-matter, used for making the design in lithography. **lithographic paper**, specially prepared to be used in lithographic printing.— **l. pen**, a very fine pen used in lithographic work.— **l. roller**, an inked roller specially adapted to lithographic printing.— **l. stone**, a yellowish-gray fine-grained, fatty limestone used in lithography. **l. slate**†.— **l. varnish**, a material derived from linseed-oil, used in thinning or in making the ink employed in lithography.— **lith'o-graph'i-cal**, *a.*

lith-og'ra-phy, [l. **lith-og'ra-fi**; 2 **lith-og'ra-fy**, *n.* The **lith'o-graf'y**,] art or operation of producing printed matter from a flat lithographable stone on which a drawing, design, or transfer has been made with a soapy ink or other suitable material. The art is based upon the principle of the chemical affinity of fatty or resinous substances for those of the same nature and their repugnance for water. When a drawing is made on the stone with lithographic crayon or ink, and all other parts of the surface are wetted with water, the porous surface absorbs both the water and the fatty or resinous compounds. A roller covered with resinous ink then passed over the stone will ink only those portions containing the design, being repelled by the parts moistened with water. The stone is now prepared by "etching" with a solution of acid and gum arabic, which sets the fatty coloring-matter of the design and renders the blank parts of the stone more retentive of water. The stone is then washed with water and afterward with turpentine, when it is ready for the printing process. Owing to the difficulty of obtaining flawless specimens of large size of the best quality of this stone, a variety of calcium carbonate of porous texture, found at Solenhofen, in Bavaria, and the expense of handling it, zinc, and of late years, aluminum,

have been used to a considerable extent as substitutes, the latter with great success. The actual reproduction on paper, whether from stone or metal, is accomplished in a manner very similar in principle from type or plates engraved in relief. The process was invented about 1796 by Alois Senefelder, an amateur printer of Munich. [< LITHO- + -GRAPHY.]

lith'o-gra-ture', *n.* A photogravure.

lith'oid, 1 lĭth'oid; 2 lĭth'ŏid, *a.* Of or resembling stony structure or texture: opposed to *vitreous* or *glassy*. [< Gr. *lithoidēs*, < *lithos*, stone; and see -OID.] **lith-oi'dal**, *a.*

In most lavas devitrification has proceeded so far before the final stiffening that the original glassy magma has passed into a more or less completely *lithoid* or crystalline mass.

ARCH. GEIKIE *Text-Book Geology* p. 227. [MACM., 1882.]

lith'oi-dite, 1 lĭth'oi-dīt; 2 lĭth'ŏi-dīt, *n. Petrog.* A rhyolite having a ground-mass which is aphanitic and not vitreous. [< LITHOID.]

Lithol., *abbr.* Lithology.

lith'o-labe, *n. Surg.* An instrument for grasping a calculus and holding it while it is being crushed: not in recent use.

—lith'o-la-pax'y, *n.* The operation of crushing stone in the bladder, followed by immediate removal of the crushed fragments through a tube or suction. **—lith'o-la'pax**, *a.*

Worship paid to *stones*. **—lith-ol'a-trous**, *a.* **—lith-ol'a-trously**, *adv.* **—lith-ol'a-try**, *n.* An oily liquid obtained from petroleum: used as an antiseptic dressing in skin-diseases.

lith'o-log'ic, 1 lĭth'o-lŏj'ĭk; 2 lĭth'o-lŏg'ĭc, *a.* Of or pertaining to lithology; petrologic. **lith'o-log'i-cal**, *a.*

The *lithological* character of a rock embraces its mineral composition and structure as well as the mode of occurrence.

E. HITCHCOCK *Elementary Geol.* § 3, p. 50. [n. d. p. 1854.]

—lith'o-log'i-cal-ly, *adv.*

lith-ol'o-gy, 1 lĭth-ol'o-jĭ; 2 lĭth-ŏl'o-ġy, *n.* 1. *Geol.* The science or study of rocks; the branch of geologic science which treats of the origin, nature, composition, and classification of rocks as such; petrology; also, loosely, the lithologic character of a rock or formation.

The red shale is of Medina age; the blue section is unmistakably Hudson River, as shown by its fossils as well as by its *lithology* and its place in the scale.

E. ORTON in *Proc. A. A. A. S.*, p. 203. [PUB. BY SEC. 1886.]

2. *Med.* The branch that treats of calculi in the human system and their removal. [< LITHO- + -LOGY.] **lith-ol'o-list**, *n.*

lith-oly'sis, *n. Med.* The dissolving by remedial means of a stone in the bladder.— **lith'o-lyt'ic**, *a.*— **lith'o-lyte**, *n. Surg.* An instrument used for injecting calculi solvents into the bladder.— **lith'o-mage**, *n.* A medicine supposed to be practised by the ancients.— **lith'o-marge**, *n.* 1. A mixture of hydrous aluminium silicates, related to if not identical with kaolin. 2. Same as TRIPOLITE.— **lith'o-me'ter**, *n. Surg.* An instrument for measuring the diameter of a stone in the bladder.— **lith-om'e-tra**, *n. pl. Pathol.* Bony or calcareous concretions of the womb.— **lith-om'e-ter**, *n. Chem.* An instrument for measuring the quantity of carbonic acid in a solution.— **lith'o-me-thrid'ic**, *a.* Pertaining to or characterized by lithomethria.— **lith'o-me-thri'a**, *n. Pathol.* Inflammation of the kidney due to the presence of a calculus. **—lith'o-me-throt'o-my**, *n. Surg.* Section of the kidney for the removal of a calculus.

lith'on-trip'tic, 1 lĭth'on-trĭp'tĭc; 2 lĭth'ŏn-trĭp'tĭc, *n. Med.* A remedial agent prescribed for dissolving calculi in the bladder and urinary passages. [< Gr. *lithon*, acc. of *lithos*, stone, + *tribō*, rub, + -IC.] **lith'on-trip'tor**; **lyth'on-trip'tic**; **lyth'on-trip'tor**, *n.* Same as LITHOTRITE, etc.

lith'o-pe'di-on, *n. Pathol.* A fetus within the womb dead and impregnated with salts of lime. **lith'o-pæ'di-on**; **—lith-oph'a-gous**, *a.* 1. Eating or swallowing stones, as a bird. 2. Perforating or burrowing in stone, as a lithodome or borer.— **Lith-oph'a-ga**, *n. pl. Zool.* Same as LITHODOMUS.— **lith'o-phane**, *n.* A transparency having a design impressed in porcelain or glass.— **lith'o-phan'ic**, *a.*

—lith-oph'a-ny, *n.*— **lith'o-phi'lous**, *a.* Stone-loving; living among, beneath, or on stones: said of insects and plants preferring a stone habitat. **lith'o-phil**; **lith'o-philet**.

—lith'o-phone, *n. Med.* An instrument for ascertaining the presence of calculi in the bladder or other organ by the sound made in touching it.— **lith'o-phos'phor**, *n.* A mineral, as baryte, that becomes phosphorescent when heated.— **lith'o-phos-phor'ic**, *a.*— **lith'o-pho-tog'ra-phy**, *n.* Same as PHOTOLITHOGRAPHY.— **lith'o-phthi'sis**, *n. Pathol.* Consumption with calcareous concretions in the lungs.— **lith'o-phyl**, *n.* A petrified leaf or its impression; or a stone containing such petrifaction. **lith'o-phyll.**—

lith'o-physe, *n. Petrol.* A spherical or ovoid concentrically chambered cavity in glassy igneous rocks, formed by contraction due to crystallization. **lith'o-phy'sa**; **—lith'o-phy'sal**, *a.*— **lith'o-phyte**, *n.* 1. A calcareous or stony polyp or plant-like organism, as a coral. 2. *Paleontology.* A plant that lives on stony or rocky surfaces in air or under water. **lith-oph'y-ton**;— **lith'o-phyt'ic**, *a.*— **lith-oph'y-tous**, *a.*— **lith'o-pone**, *n.* A dry white pigment made of zinc sulfid and barium sulfate.— **lith'o-pœne**, *n.*

Surg. A catheter by which to introduce into the bladder a saw for calculi.— **lith-op'ti-sy**, *n. Surg.* The operation of sawing through a calculus in the bladder.— **lith'o-scope**, *n. Surg.* An instrument used for detecting and examining stone in the bladder.— **lith'o-sid'er-ite**, *n.* A siderolite.— **lith'o-sil'i-cate**, *n. Chem.* A variety of bombycid moths feeding mainly on lichens, and having the body slender, fore wings long, antennæ filiform, the labial palpi bifoliated, and wings large; footman.

—lith'o-sil'i-ca, *n.* (t. g.)— **lith-o-sil'i-can**, *a.* & *n.*— **lith'o-si'la**, *n.* (t. g.)— **lith-o'sil-an**, *n.*— **lith'o-sil'ic**, *a.*— **lith'o-si'line**, *n. pl. The Lithosiidæ* regarded as a subfamily of *Arctiidæ*.— **lith-o'si-oid**, *a.*— **lith'o-sis**, *n. Pathol.* Pneumoconiosis.— **lith'o-sper'mon**, *n.* Any plant of the genus *Lithospermum*. **lith'o-sper'mum**, *n. Bot.* A genus of canescent or hispid herbs of the family *Boraginaceæ*, with alternate sessile leaves and white, yellow, or purple flowers, producing very hard nutlets. They are called *gromwell* or *puccoon*.— **lith'o-sphere**, *n.* The solid globe of the earth as distinguished from its envelopes, the atmosphere and the hydrosphere. Compare ATMOSPHERE; HYDROSPHERE. [Doual).

Lith'o-stra'ton, 1 lĭth'o-strā'tŏn; 2 lĭth'o-strā'tŏn, *n. Bib.* **lith'o-tint**, 1 lĭth'o-tĭnt; 2 lĭth'o-tĭnt, *n.* 1. The art or process of producing pictures in flat tints from lithographic stones. 2. A picture so produced. 3. A flat, graduated stone for reproducing a drawing made by lithotint, crayon, brush, rubbing, asphalt, separately or in combination.

lith'o-tome, 1 lĭth'o-tōm; 2 lĭth'o-tōm, *n.* 1. A mineral found in nature resembling a cut stone. 2. *Surg.* Same as CYSTOTOME. [< Gr. *lithotomos*, < *lithos*, stone, + *temnō*, cut.]

lith-ot'o-my, 1 lĭth-ot'o-mĭ; 2 lĭth-ŏt'o-my, *n. Surg.* The operation of removing stone from the bladder by incision into the organ. [< LL. *lithotomia*, < Gr. *lithotomia*, stone-cutting, < *lithos*, stone, + *temnō*, cut.] **lith'o-to'mi-al**;— **lith-ot'o-my-bl-sec'tor**, *n.* An instrument for making the side cuts in lithotomy.— **l-sound**, *n. Surg.* A steel catheter which by a click reveals the presence of a calculus in the bladder. **l-searcher**.— **median l.** (*Surg.*), that in which the operative incision is in the median line of the perineum.— **lith'o-tomic**, *a.* Cutting or pertaining to lithotomy. **lith'o-tom'i-cal**;— **lith-ot'o-mist**, *n.* One who practises lithotomy.— **lith-ot'o-mize**, *vt.* To perform lithotomy on.

lith'o-tome'ter, 1 lĭth'o-tō-tom'ĕ-tĕr, *n.* A half-tone illustration designed to give an effect resembling a lithographic print.

lith'o-tre'sis, 1 lĭth'o-trē'sĭs; 2 lĭth'o-trē'sĭs, *n.* The process of boring through a calculus. [< LITHO- + Gr. *trēsis*, perforation.]

lith'o-trip'ton, 1 lĭth'o-trĭp'tŏn; 2 lĭth'o-trĭp'tŏn, *n.* A lithontriptic.

lith-ot'ri-ty, 1 lĭth-ot'rĭ-tĭ; 2 lĭth-ŏt'ri-ty (XIII), *n. Surg.* The operation of reducing stone in the bladder to fine fragments by crushing, sawing, etc., with instruments. [< LITHO- + L. *tritus*, pp. of *tero*, rub.] **lith'on-trip'ty**; **lith'o-thrypt'ty**; **lith'o-trip'syt.**— **lith'o-trite**, *n.* Any instrument used in the operation of lithotrity; especially, one for crushing the calculus between two blades, which are forced together by turning a screw. **lith'on-trip'tor**; **lith'o-thryp'tor**; **lith'o-trip'tor**; **lith'o-trip'tor.**— **lith'o-trit'ic**, *a.* Of or pertaining to the operation of lithotrity.

lit, *n.* Same as LITHONTRIPTIC. **lith'on-thrip'tic**; **lith'o-thryp'tic**; **lith'o-trip'tic.**— **lith-ot'ri-dist**, *n.* One skilled in the operation of lithotrity. **lith'on-trip'dist**; **lith'o-thryp'tor** or **-trip'tist.**— **lith'on-trip'tical**, *adv.*

lith'o-type, 1 lĭth'o-tāp; 2 lĭth'o-typ, *n.* 1. *Print.* A stereotype made with a composition of shellac, sand, tar, and linseed-oil, pressed while hot on a plaster mold taken from type. 2. In engraving, an etched stone surface for printing; also, the process of taking prints from such a stone, or the prints so taken. 3. A machine fitted with a keyboard similar to that of a typewriter, by means of which a lithographic transfer-sheet is prepared. It makes a series of perforations in a strip of paper, which control the printing. [< LITHO- + -TYPE.]

lith'o-type, *vt.* To prepare for printing by lithotypy.— **lith'o-ty'pic**, *a.*— **lith'o-ty'py**, *n.* 1. The process of obtaining a relief printing-surface by the computer molds of the types and making casts with a mixture of shellac, sand, etc. 2. Printing from etched stone.

lith'ous, 1 lĭth'us; 2 lĭth'us, *a. Botanical.* Pertaining to, resembling, or having the composition of a calculus.

lit'house, 1 lĭt'-hous; 2 lĭt'-hous', *n.* [Prov. Eng.] A dyehouse.

lith'wyl, 1 lĭth-oks'ĭl; 2 lĭth-ŏks'yl, *n.* Petrified wood. [< LITH- + Gr. *xylon*, wood.] **lith-ox'yle**; **lith-ox'yl-ite**.

Iths'man, 1 ĭths'man; 2 ĭths'man, *n.* A member of an ancient guild in Scandinavian towns, and trafficker in the River Thames. [< AS. *ithsmann*, sailor.]

Lith'u-a'ni-a, 1 lĭth'yu-ā'nĭ-a; 2 lĭth'yu-ā'ni-a, *n.* 1. An independent state in Europe, comprising governments of Kovno, Vilna, Grodno, Minsk, and parts of Mogilĕv and Vitebsk, formerly Russian. 2. A former grand duchy, included in W. Russia and E. Prussia since the partition of Poland, 1795, which country it was incorporated in 1569.

Lith'u-a'ni-an, 1 lĭth'yu-ā'nĭ-ăn; 2 lĭth'yu-ā'ni-an. **I.** *a.* Of or belonging to Lithuania, or the Lithuanians or their language. **II.** *n.* 1. One of the native people of Lithuania, a branch of the Letto-Lithuanian group of the Aryan family, living for the most part in European Russia. The Lithuanians are generally tall, fair-haired, and dolichocephalic, but exhibit some elements of the sub-Northern and Eastern races. They are largely agriculturists of mixed Slavic and Finnic blood. 2. The Lithuanian group of Lithuanian; in a broader sense, Lettic. See LETTIC.

Lith'u-an'ic, 1 lĭth'yu-ăn'ĭk; 2 lĭth'yu-ăn'ĭc. **I.** *a.* Lithuanian. **II.** *n.* Same as LETTIC.

Lit. Hum., *abbr.* [L. *Literæ humaniores* (the humanities).]

lith'u-re'sis, 1 lĭth'yu-rē'sĭs; 2 lĭth'yu-rē'sĭs, *n. Pathol.* The passage of gravel from the bladder through the urethra. [< LITH- + Gr. *ourēsis*, urination.]

lith-u-ri'a, 1 lĭth-yu'rĭ-a; 2 lĭth-yu'ri-a, *n. Pathol.* An excess of uric acid in the urine, a morbid condition in which calcular concretions are formed. [< LITH- + Gr. *ouron*, urine.] **lith-u'ric**, *a.* **lithuric acid**, an acid ($C_5H_4N_4O_3$), NH, extracted from bovine urine.

lith'wake', 1 lĭth'wēk'; 2 lĭth'wāk', *a.* [Prov. Eng.] Limber; flexible; pliable. **leathe'wake'**.

lith'y, 1 lĭth'ĭ; 2 lĭth'y, *a.* [Obs.] flexible; willowy; lethy. 2. [Prov. Eng.] Heavy; warm: said of the weather.

— lith'y-gree', *n.* The British waytaring-tree.

lith'y-lene, 1 lĭth'ĭ-lēn; 2 lĭth'y-lēn, *n.* Same as LITHIL.

lit'i-con'tes-ta'tion, *n.* Same as LITIS CONTESTATION.

lit'i-ga-bi(e), 1 lĭt'i-ga-bĭ; 2 lĭt'i-ga-bi, *a.* That may be litigated.

lit'i-gant, 1 lĭt'i-gant; 2 lĭt'i-ġant. **I.** *a.* Disposed to litigate; litigious; also, engaged in litigation. **II.** *n.* A party to a lawsuit, either plaintiff or defendant.

I was an early reader of Mrs. Clay, that no litigant, rich or poor, should have occasion to say, that for want of counsel they could not obtain justice at every bar where he could appear for them.

[< L. *litigan(t-)s*, ppr. of *litigo*; see LITIGATE.]

lit'i-gate, 1 lĭt'i-gēt; 2 lĭt'i-ġēt, *v.* [-GAT'ED; -GAT'ING.]

1. *t.* To bring into litigation; cause to become the subject of a suit at law; dispute in a lawsuit.

II. *i.* To engage in litigation. [< L. *litigatus*, pp. of *litigo*, < *lis* (*lit-*), strife, + *ago*, carry on.] **— lit'i-ga'tor**, *n.* **— lit'i-ga'to-ry**, *a.*

lit'i-ga'tion, 1 lĭt'i-gā'shŏn; 2 lĭt'i-ġā'shon, *n.* The act or process of carrying on a suit in a court of law or equity; a judicial contest; hence, any controversy that must be decided upon evidence.

So many evils, public and private, spring and unfair dealing among our Anglo-Saxon forefathers, and so much *litigation* and unjust persecution arose from disputed claims to property which had been, or were supposed to have been, purchased, that it was made illegal to buy or sell without witnesses.

T. WRIGHT *Homes of Other Days* p. 90. [TR. & CO. 1871.]

[< LL. *litigatio(n-)*, < L. *litigatus*; see LITIGATE.]

li-tig'i-ous-ly, 1 lĭ-tĭj'ĭ-us-lĭ; 2 lĭ-tĭġ'i-us-lĭ, *adv.* 1. The quality of being litigious; a litigious disposition. 2. *Scots Law.* The prohibition implied by law against the alienation of property to the prejudice of action begun for its acquisition or possession, or its attachment for debt: analogous to the *lis pendens* of the common law. [< L. *litigiosus*; see LITIGIOUS.]

li-tig'ious, 1 lĭ-tĭj'us; 2 lĭ-tĭġ'ius, *a.* 1. Inclined to litigation; given to contention in courts of law; hence, quarrelsome. 2. Subject to litigation or contention; controvertible; disputable; as, a *litigious* right. 3. Of or pertaining to litigation; as, *litigious* forms. [< F. *litigieux*, < L. *litigiosus*, < *litigo*; see LITIGATE.] **li'ti-ga'tious**;— **li-tig'tous-ly**, *adv.*— **li-tig'tous-ness**, *n.*

Lit'el-op'i-dæ, 1 lĭt'e-op'ĭ-dē; 2 lĭt'e-ŏp'i-dē, *n. pl. Conch.* A pelagic family of littorinidean gastropods, having three ciriform appendages to the epipodium, median teeth subquadrangular and without basal denticles, and a turreted shell with a truncated columella. **Li-tif'o-pus**, *n.* (t. g.) [< Gr. *litos* (< *lis*), smooth, + *opē*, hole.] **Lit'i-op'i-na'**.— **li-tif'o-pid**, *n.*— **li-tif'o-poid**, *a.*

lit'i-con'tes-ta'tion, 1 lĭt'i-kon'tes-tā'shon; 2 lĭt'is-con'tes-tā'shon, *n.* 1. *Scots Law.* The process by which a suit is contested by the opposing statements of the respective parties. BOUVIER. 2. *Eccl. Law.* The issue of an action. [GF., < LL. *lits contestatio(n-)*, < L. *lis*, gen. *litis*, strife, + *contestatio(n-)*, proving by witnesses, < *contestor*; see CONTEST, v.]— **li'tis-con-test'**, *n.*— **li'tis-con'tes-ta'tion-al**, *a.*

lit'ling, *n.* Very little.

Lit. M. or **Litt. M.**, *abbr.* Same as M. LIT.

lit'mus, 1 lĭt'mus; 2 lĭt'mus, *n.* A blue dyestuff made by fermenting certain coarsely powdered lichens, as *Lecanora tartarea*, *Roccella fuciformis*, etc. It contains a red coloring-matter related to orcein in the form of an acid producing blue salts. It is turned red by acids, and returns to its original color when heated with an alkali. [Cor. of LACMUS, as Hitmus milk (*Bacterial.*), milk which has been tinged with litmus.— **l. paper**, bibulous paper dipped into a solution of litmus, and used to test solutions, etc., in order to determine whether they are acid or alkaline.

Li'top-ter'na, 1 lī'tŏp-tĕr'na; 2 lī'tŏp-tĕr'na, *n. pl. Paleon.* A suborder of ungulates composed wholly of the genus *Macrauchenia*. It consists of a small group of singularly horse-like animals with very long necks, now confined to Patagonia during Miocene and Pliocene times. [< Gr. *litos*, smooth, + *pterna*, heel.]

li'to-ral, *a.* Same as LITTORAL.

lit'o-tes, 1 lĭt'o-tēz or lai'to-tēz; 2 lĭt'o-tēġ or lī'to-tēġ, *n. Rhet.* Affirmation produced by the negation of the opposite; as in the sentence, "The Puritan . . . had been rescued from the common delivered from the opposite *common foe*." MACAULAY *Essays*, *Milton* p. 16. [A. 1880.]

[< Gr. *litotēs*, < *lis*, smooth.]

li-tram'e-ter, 1 lĭ-tram'ĭ-tĕr; 2 lĭ-trăm'e-ter, *n.* An apparatus for determining the specific gravity of liquids by the comparative height to which they are raised in vertical tubes by a definite air-pressure. [< Gr. *litra*, Sicilo-Greek form of L. *libra*, pound, + *metron*, measure.]

li'tre, *n.* Same as LITER, *n.*

li'tre, 1 lī'tĕr; 2 lī'ter, *n.* [F.] *Her.* A hatchment, consisting of a black belt charged with the arms of the deceased, painted on the walls of a church or other building.

lit're, 1 lĭt'ĕr; 2 lĭt're, *n.* [Chilean.] Same as LITRI.

lit'ster, 1 lĭt'stĕr; 2 lĭt'ster, *n.* [Prov. Eng.] A dyer. **lit'ste-ress**.

litt., *abbr.* Litterateur.

Lit'ta, 1 lĭt'ta; 2 lĭt'ta, **Pompeo, Count** (*or* 1781–*or* 1852). An Italian historian; *Celebrated Italian Families*. [terg).

Litt. B., *abbr.* [L.] *Litterarum Baccalaureus*, Bachelor of Letters.

Litt. D., *abbr.* [L.] *Litterarum Doctor* (Doctor of Letters).

Lit'tell, 1 lĭt'ĕl; 2 lĭt'tell, **Eliakim** (*or* 1797–*or* 1870). An American editor; founded *Littell's Living Age*.

lit'ten [Rare], *pp.* of LIGHT, *v.*

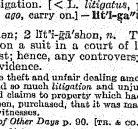
lit'ten, 1 lĭt'n; 2 lĭt'n, *n.* [Prov. Eng.] A garden; churchyard.

lit'ter, 1 lĭt'ĕr; 2 lĭt'ter, *n.* 1. *a.* To bring forth, as a litter of young: applied to certain quadrupeds, and sometimes, in contempt, to human beings.

Gabriel Honoré [Mirabeau], . . . roughest lion's whelp ever *littered* of that rough breed.

CARLYLE *French Revolution* vol. i, p. 134. [R.]

2. To scatter things in carelessly; as, to *litter* a room. 3. To scatter straw, hay, or the like in, as a stable, for the purposes of cleanliness or comfort; to supply with litter; hence, to provide bedding for. 4. To carry in a litter.



II. *i.* 1. To lie or sleep in litter, as cattle. 2. To give birth to a litter of young.

lit'ter, *n.* A bringing forth of several young at a single birth; also, the young so brought forth: applied sometimes, in contempt, to human beings.

The young of the same *litter* sometimes differ considerably from each other.

DARWIN *Descent of Man* pt. i, ch. vi, p. 164.

2. Straw, hay, or other similar material, used as bedding for horses, cattle, and the like. 3. Waste materials, shreds, and fragments scattered about; a clutter; hence, a state of disorder. 4. *Forestry.* That portion of the forest floor which is not in an advanced state of decomposition. GIFFORD PINCHOT *Primer of Forestry, in U. S. Dept. of Agr., Bulletin No. 61.*

Traveling Litter of the 16th Century.

5. A stretcher consisting of a cloth covering sick or wounded, as on a battle-field; formerly, also, a couch upheld by shafts at each end for the transportation of people of wealth or importance.

The Swedish monarch, who was carried about in a *litter*, and yet one of the most vigorous of commanders—defeated the army of the Austrian Kaiser.

J. D. MORRIS *German Lit.* p. 215. [c. 1. r. 1879.]

[< F. *littière*, < L. *lectica*, < *lectus*, bed.] Syn.: see PLOCK.

lit'ter-age, *n.* **lit'ter-y**, *a.*

lit'ter-a-teur', 1 lĭt'ĕr-a-tûr'; 2 lĭt'er-a-tûr', *n.* One who is by profession engaged in literature; a literary man. [F., < L. *literator*; see LITERATOR.]

lit'ter-d, *pp.* Littered.

lit'ter-ing, 1 lĭt'ĕr-ĭng; 2 lĭt'er-y, *a.* Covered with or constituting of litter. [terg).

Litt. L., *abbr.* [L.] *Litterarum Licentiatus* (Licentiate in Letters).

lit'tle, 1 lĭt'l; 2 lĭt'tle, *a.* [LESS; LEAST; also (Colloq. or Dial.) LITT'LER; LITT'LEST. I. Of a size, degree, quantity, etc., below the ordinary or normal; not large or much. (1) Below the normal size; diminutive; as, a *little* man, house, animal.

The microscope cannot find the animalcule which is less perfect for being *little*.

EMERSON *Essays, Compensation* first ser., p. 85. [H. M. & CO. 1890.]

(2) Below the normal number or amount; restricted; as, a *little* assembly; a *little* joy or sorrow. (3) Below the normal distance or time; short; brief; as, a *little* journey; a *little* visit. (4) Below the standard in merit or importance; inconsequence; insignificant; petty; hence, mean; narrow; as, a *little* quarrel; a *little* nature.

Great men do not play stage tricks with doctrines of life and death; only *little* men do that.

RUSKIN *Sesame and Lilies* p. 27. [W. & S. 1887.]

(5) Lacking in ability, efficiency, or force; weak: as, *little* wit; *little* perseverance.

2. Smaller than other like things with which it is contrasted; as, the *little* finger; the *little* toe. [< AS. *litel*, <

lyt, little.] Syn.: brief, contemptible, diminutive, feeble, inconsiderable, insignificant, mean, microscopic, minute, narrow, paltry, petty, short, slender, slight, small, tiny, trifling, trivial, unimportant. See INSIGNIFICANT; MINUTE; SMALL. — Ant.: see synonyms for IMMENSE; LARGE. — **lit'tle-beak'**, *n.* A rhynchocephalid lizard (*Sphenodon punctatum*). — **l. brain**, *n.* = **l. cause**, *n.* Bodily discomfort; specif., a cell that was much too small for a prisoner, or any condition that causes unhealthful discomfort, such as the pillory or the stocks: an old name. — **L. Egypt**, the mythical land which the Cipsies, entering Europe presumably as pilgrims to Rome in the 15th century, represented as Little-Egypt, from which the chiefs claimed to be lords and rulers. — **l. end** (*Mach.*), the cross-head end of a connecting-rod. — **l.-endian**, *n.* One who disputes about trifles; specif., in *Gulliver's Travels*, a member of the political party in Lilliput which maintained that eggs should be broken at the little end: opposed to *Big-endian*. — **L.-Englander**, *n.* [U. S.] One of those who are opposed to the territorial extension of the British empire as well as to the imperial federation. — **L.-Englandism**, *n.* The policy or principles of the Little-Englanders. — **l. giant**, subject of Stephen A. Douglas: originating in the striking contrast between his small stature and great oratorical powers. — **l.-good**, *n.* The sun-spurge (*Euphorbia helioscopia*). — **l.-goudy**, — **l.-gride**, *n.* [Sc.] The dotterel. — **l. habit** (*Gr. Ch.*) the ordinary monastic dress, worn after the completion of the novitiate. — **L. Horse** (*Astron.*), Equuleus. — **l. hours** (*R. C. Ch.*), the offices of Prime, Tierce, Sext, and None. — **l. Mac**, the name affectionately given to Gen. George B. Mecklellan by his men: in allusion to his short stature. — **L. Magician**, a contriver of intrigues: a name given because of his political sagacity. — **l. magpie**, the magpie-lark. — **l. men or people**, fairies. — **l.-neck**, *n.* 1. The round or hard clam or quahog (*Venus mercenaria*), when young and tender: named, according to some, from a little Neck on Long Island; others suppose the name to refer to the neck or siphon, which is smaller than that of the soft clam. 2. One of various clams on the Pacific coast of the United States. — **l. ones**, little children. — **L. liv'er², *n.* **1.** A large glandular organ situated at the upper part of the abdominal cavity of vertebrates, secreting bile, elaborating and storing up glycogen, and otherwise changing the blood that passes through it: in man it is situated to the right beneath the diaphragm and above the stomach. The hepatic artery brings arterial blood to the liver directly from the aorta, while the portal vein conveys to it venous blood from the stomach, intestines, pancreas, and spleen. The liver is of a dark reddish tint and is composed of lobules held together by extremely fine tissue, and consisting of hepatic cells, of a plexus of biliary ducts, of a plexus of capillaries, and of minute arteries. The process of bile-formation is not known, but the minute ducts are reduced to two large trunks which unite to form the hepatic duct; the hepatic duct and cystic duct unite to form the common duct, which drains to the duodenum and is about 3 inches long and of slender diameter. In health this organ contains 68.6 per cent. of water, 3.8 per cent. fat, 4.7 per cent. albumen; the rest is made up of vessels, salts, etc.

Wall-lizard. 1/3

Lizards may be fairly well separated for popular study, according to the structure of their scales. Some have very coarse, overlapping scales, each terminating in a sharp point and having a strong keel; species thus coated are rough, limbless and bristling with sharp points. Others have smooth, rounded scales as polished as glass. Within a variety the scales are often arranged in oblique rows, many display a ringed arrangement on both the body and the tail. A good proportion of the larger ones (as of the smaller lizards) have a fine, granular section of their scales; they appear to be covered merely with a bare, rough skin unless closely examined. L. Lobsters mostly frequent rocky coasts: they swim mainly by means of the broad tail (*telson*), altho the legs are of service in forward movements. The first ambulatory legs are much enlarged and form the claws. The eyes are compound, and are carried on movable stalks; the sense-organs are fairly well developed. The food of the lobster consists mainly of carrion, altho any small creature coming within reach of the claws is captured and devoured. The American lobsters spawn irregularly during the warmer half of the year; they swim near the surface, until about an inch long, and during this period are commonly called fry. Before reaching edible dimensions they pass through several moults, which are accompanied by the loss of the claws, but the few survivors sink to the bottom, where they remain in comparative safety in crevices of rocks and under stones until mature. When adult, they probably moult once annually. The shell is usually greenish or bluish, but becomes red by boiling. Lobsters are caught mainly in cylindrical cage-traps (lobster-pots), which are batted with refuse fish, and sunk to the bottom in favorable places and left over night. See CRUSTACEA.

bility that treats of the mean values of geometrical magnitudes that comply with given conditions, or of the probability that material figures dropped at random will answer certain relations.— **I. sign** (*Psychol.*), that variable complex of sensations which distinguishes the different areas of the same sense-organ, when under stimulation, and which also enables the mind to locate the different portions of the body and the positions of objects in space. According to Lotze the associated accessory impressions which render for the soul the clue, by which it transposes the same red, now to one, now to another spot; or simultaneously to different spots in the space intended by it.

We define the *local sign*, then, as that mixture of feeling which gives to the sense-experience its peculiar coloring, and is dependent upon the combined result of exciting the nerves of a given locality of the organ. LADD and WOODWORTH *Elements of Phys. Psychol.* (revised ed.) p. 300. [s. '11].

— **l. space**, space as measured in units of extension, in contradistinction to space of time.— **l. time**, time referred to the meridian of the place in question.— **l. value** (*Arith.*), the value attached to the place of a digit.— **l. vent** (*Plumbing*), a vent-pipe, as in a water-closet, to carry off foul gas.

lo'cal-i-za''tion, 1 lō'kal-i-zā'shun; 2 lō'cal-i-zā'shun, *n.* **1.** The act of localizing, or the state of being localized. **2.** *Psychol.* The reference of sensation to a particular part of the body or to some spot external to the body.

In the sphere of touch and sight, the most original investigation has been made upon the Ortsinn, the faculty of *localization*, that is, the processes by which tactile and visual data are located in space. RIBOT *German Psychol. of To-day* tr. by Baldwin, p. 305. [s. 1886.]

lo''cal-i-sa'tion.— **cerebral localization**, the process of locating the function-centers in the brain. That of the motor regions is most certainly located: that of the visual and auditory senses somewhat less positively; and those of touch, taste, and smell least definitely. Recent cases of cerebral surgery without anesthetics have given opportunity for conscious localizations of certain sensations produced by stimulation of the exposed areas of the brain; and these have shown that the brain itself has no feeling, but that exciting it in the proper areas causes the mind to localize the sensations in the corresponding places in the periphery. See AGRAPHIA, AMNESIA, APHASIA, PSYCHICAL BLINDNESS, PSYCHICAL DEAFNESS, etc.

lo'cal-ize, 1 lō'kal-aiz; 2 lō'cal-īz, *vt.* [-IZED; -IZ''ING.] **1.** To determine the exact place of; make local in character. **2.** To identify with a certain locality; attach to a specified district; as, to *localize* an army by units.

Locke's philosophy was promulgated in his *Essay Concerning Human Understanding*, which is not a psychology, but a theory of knowledge, in which he treats of the origin, certainty, and extent of human knowledge, together with the grounds and degrees of belief, opinion, and assent." In his *Essay* he combats the Cartesian view of the origin of ideas as innate — misunderstanding it, however — and maintains the doctrine that the mind begins, as a sort of *tabula rasa*, with sense-impressions received from the outside, and reflection, or the internal mode of experience. Thus it acquires true and false ideas, which are conserved and expressed by language, and accumulates knowledge or grounds belief, which is higher or lower degrees of probability. Lockianism was, on the one hand, the forerunner of the Scottish realism and on the other of the English and French sensationalism and skepticism.

tive, Reidley l., Baldwin l., etc. They may be classified: (1) according to the general character or some particular feature of their construction; as, **rear-truck l.** (one having a truck with one or more pairs of wheels at the rear of the driving-wheels); **bicycle** or **single-driver l.** (one having only one pair of driving-wheels, a 4-wheeled leading truck, and one pair of trailers: used where high speed rather than great tractive power is required); **bogy l.** (one having a swiveling-truck as in American practice, as distinguished from English: a term used chiefly in England); **camel-back l.** (a style of locomotive designed about 1850, having a sloping fire-box, and the cab located in the center of length of the boiler); **compound locomotives,** which embody the principle of the compound steam-engine and include (*a*) **balanced compound l.** (in which one set of pistons drives from the outside, and the other from inside or from between the wheels, through the agency of cranks upon the axle); (*b*) **Baldwin** or **Vauclain compound l.** (in which all the pistons drive from the outside); others take the name of their manufacturer or of the place where they are manufactured; as, **Pittsburg compound l., Richmond compound l., Rhode Island compound l.,** etc., each of which presents unique features, altho all have the same general character; (*c*) **tandem compound l.** (having the high- and low-pressure cylinders in line, as in the **Baldwin tandem compound l., Calvin-Wightman tandem compound l., Schenectady tandem compound l.,** etc.); **consolidation l.** (a heavy freight locomotive taking its name from that given to the original example of the type; it has four pairs of connected driving-wheels, and a two-wheeled swinging truck in front); **double-cylinder** or **double-piston l.** (the result of an unsuccessful attempt to design a locomotive in which internal disturbing forces would be reduced to a minimum; each cylinder contained two pistons, which in operation moved toward and away from each other alternately); **double-ender l.** (one having two fire-boxes and two sets of engines, or one fitted with pilots, headlights, etc., at both ends, so as to run in either direction with equal facility); **double-truck tank l.** (Mason's locomotive); **geared l.** (one in which the transmission of power from cylinders to driving-wheels is effected through a system of gearwheels usually employed on rack railroads); **inside-cylinder l.** (one having the cylinders placed inside or between the wheels); **Mason's l.** (one in which the engine and tender are on one frame supported by a pair of trucks, the cylinders and driving-wheels being connected to the truck which supports the boiler); **rack l.** (a form of geared locomotive having a cogged driving-wheel which engages with a rack secured between the rails: used on heavy grades, as mountainsides, etc., where high speed is unnecessary); **saddle-tank l.** (one having the water-tank resting upon and partially surrounding the boiler, after the fashion of a saddle on a horse); **Strong l.** (one having a bifurcated, corrugated, cylindrical fire-box and a valve-gear capable of working either forward or backward with a single eccentric); **tank l.** (one having the engine and tender inseparably connected); (2) according to the number of cylinders; as, **two-cylinder l.** or **four-cylinder l.,** etc.; (3) according to the motive power; as, **compressed-air l.** (carrying tanks of compressed or liquid air which is allowed to expand into the cylinders); **electric l.** (using electric motor mounted on trucks and connected with the driving-axles by gearing, the current being taken from an overhead trolley-wire, from a third rail, or derived from storage-batteries carried by the locomotive itself; unlike the electric car, the electric locomotive has no accommodations for passengers, and is designed solely to take the place of the steam-locomotive; **fireless l.** (a locomotive in which steam is obtained from superheated water confined under pressure in strong tanks instead of by generation in a boiler); **liquid-air l.** (see COMPRESSED-AIR LOCOMOTIVE); (4) according to use; as, **freight-l.** (one having several pairs of driving-wheels of small diameter, and large boiler capacity, designed for drawing heavy trains at a moderate rate of speed); **logging l.** (one of the geared locomotive type, mostly used for hauling logs over temporary tracks in timber localities); **mine l.** (a small locomotive used in or about a mine for hauling the coal or ore cars); **street l.** (for use where a railroad-track runs through a city street; it has a short wheel-base, powerful brakes, an exhaust muffler, and the boiler is usually concealed

America, were for many years unknown in Europe, where they are now gradually coming into use. English and Continental locomotives as a rule have only two pairs of drivers, while to transport the heavy freight-trains common in the United States, engines have been built having 8 and 10 driving-wheels and weighing almost 200,000 pounds.

Inasmuch as the number and arrangement of the various wheels of a locomotive are practically uniform for each type, a classification based on these features is rapidly superseding all others. In this system, as applied to the American types the number of wheels is indicated immediately after the name by figures, the right-hand numeral indicating the number of the driving-wheels, the middle number of drivers, and the left-hand numeral the number of pilot-wheels, while the arrangement of the wheels from front to rear of one side is indicated by circles, the small circles (○) to the left representing pilot-wheels, the large circles (◯) drivers, that to which the driving-rod is usually attached having a shaded circle within it (◉), and the small circles to the right representing the trailers. The symbol ⊿ stands for the connector and indicates the number of coupled pairs; for example, the *Decapod locomotive* has 2–10–0 wheels, or two pilot-

Fairlie l. (one having four cylinders and two bollers with a double fire-box between them carried on two swiveling-trucks: used on narrow-gauge roads with frequent curves, where high tractive power and small diameter of boiler are essentials); **Forney l.** (one having the tank and bunkers borne on an extension of the engine-frame back of the fire-box, and carried by a swiveling-truck: used formerly on the elevated railroads of New York city); **Mastodon l.** (a freight-locomotive having four pairs of driving-wheels and a two-wheeled swinging truck); **Mikado l.** (a freight-locomotive having a 2-wheeled leading-truck, four pairs of coupled drivers in a short wheel-base, and a pair of trailers); **Mogul l.** (one having two pairs of coupled drivers and one pair of leading truck-wheels usually employed in freight, the sometimes in passenger service); **Pacific l.** (one having a 4-wheeled leading-truck, three pairs of coupled drivers, and a pair of trailers: employed for hauling heavy fast trains where the requirements are the same as for those of the Atlantic type); **Prairie l.** (one having a 2-wheeled leading-truck, three pairs of coupled drivers and a pair of trailers: used for both freight and passenger service).

European locomotives differ from those in use in America mainly in the following details: the American locomotive has a box frame and carries its cylinders outside of this, while the majority of European makes, including the English, have a bar frame and carry their cylinders inside of it. In American locomotives the frame usually rests upon equalized springs, which in turn rest upon the wheels, while in European types equalizers are rarely used. The tenders in America are practically all 8-wheeled, while in Europe 4-wheeled and 6-wheeled tenders are used. The large cabs with seats for the engine-driver and fireman, universal in wheels, ten drivers, and no trailers, arranged ⊿○○○○○○, or, from front to rear on one side, one pilot-wheel, six drivers, the driving-rod being attached to the center driver.

—**light locomotive** (*Eng. Law*), any self-propelled vehicle not exceeding three long tons in weight when unladen, which is not used to draw more than one other vehicle, in which case the combined weight unladen must not exceed four long tons, which emits no smoke or other visible vapor save under accidental conditions, and which must not exceed a speed-limit of 14 miles an hour.—**lo"co-mo'tive-bal"ance,** *n.* **1.** *Engin.* A weight consisting of metal filling between spokes of a locomotive driving-wheel, to balance the inertia of the reciprocating parts. **2.** The spring which controls the safety-valve of a locomotive-boiler.—**l.-boiler,** *n.* A multitubular, horizontal, cylindrical boiler having at one end an extension containing a fire-box surrounded by water: almost universal for locomotives, and sometimes used for stationary engines.—**l.-car,** *n.* A railway-car having a locomotive combined with or attached to it.—**l.-pump,** *n.* **1.** A pump on a locomotive for supplying the boiler with water from the tank. **2.** A self-propelling power-pump.

lo"co-mo-tiv'i-ty, *n.* [Rare.] Locomotive power or activity. **lo"co-mo'tiv(e-ness‡.**

lo"co-mo'tor, 1 lō'kō-mō'tor; 2 lō"co-mō'tor. **I.** *a.* Of or pertaining to locomotion.

II. *n.* [Rare.] One who or that which has the power of locomotion; specif., a self-propelling motor vehicle as opposed to a stationary electric motor. [< LOCO- + MOTOR.]—**locomotor ataxia,** a disease caused by degeneration and sclerosis of the posterior columns of the spinal cord, accompanied by atrophy and degeneration of the nerve-fibers, and evidenced by unsteadiness and inability to coordinate locomotor and other voluntary movements, the irritation of the patellar reflex, and disorders of vision, nutrition, etc.—**lo"co-mo-to'ri-al,** *a.* [Rare.] Of or pertaining to locomotion or the locomotorium.—**lo"co-mo-to'ri-um,** *n.* [-RI-A, *pl.*] *Biol.* The motive apparatus.—**lo"co-mo'to-ry,** *a.* Of or pertaining to locomotion; having the ability to move; locomotive.

Loc'ri, 1 lok'ri; 2 lōc'ri, *n. pl.* The people of Locris.

Loc'ri-an, 1 lok'ri-an; 2 lōc'ri-an, *a.* Of or pertaining to Locris, a district of ancient Greece; specif. (*Mus.*), noting a mode. **Lo-cren'sian.**—**Locrian mode,** see GREEK and GREGORIAN MODES, under MODE.

Loc'ri Ep"i-ze-phyr'i-i, 1 ep"i-zi-fir'i-ai; 2 ēp"i-ze-fir'i-i. An ancient Grecian seaport in southern Italy; the ruins of a temple of Persephone were excavated here in 1889 and 1890.

Locrine', 1 lō-krin'; 2 lō-krin', *n. Brit. Myth.* The eldest son of Brutus, legendary king of Britain; father of Sabrina, who is spoken of in Milton's *Comus*.

Loc'ris, 1 lŏk'ris; 2 lō'cris, *n.* Either of two districts of ancient Greece: **Eastern,** N. W. of Bœotia; capital, Opus; **Western,** N. of the Gulf of Corinth; capital, Amphissa.

loc'u-las-ment, 1 lŏk'yu-lăs-mənt; 2 lō-cyu-lă-ment, *n.* **1.** *Bot.* A locelus. **2.** *Anat.* One of the saccules of the large intestine. [< L. *loculamentum,* case, < *loculus;* see LOCULUS.] **loc'u-lar-ment,** **-ment'ose,** **-lous,** *a.*

loc'u-lar, 1 lŏk'yu-lər; 2 lō-cyu-lar, *a.* *Bot.* (*a*) Containing to a cell or loculus; having loculi or cells: usually in compounds; as, *trilocular;* *quadrilocular.*

loc'u-late, 1 lŏk'yu-lĕt; 2 lō-cyu-lāt, *a.* Having loculi or cells. **loc'u-lat-ed,** *a.*

loc'u-la'tion, 1 lŏk'yu-lē'shən; 2 lō-cyu-lā'shon, *n.* A condition marked by the presence of loculi; cell-production.

loc'u-li-ci'dal, 1 lŏk'yu-lı-sı'dəl; 2 lō-cyu-lı-cı'dal, *a.* *Bot.* Cutting into or through the loculus: said of a capsule in which the dehiscence takes place in the middle of the back of each loculus or on the dorsal suture: opposed to *septicidal.* [< L. *loculus* (see LOCULUS) + *cædo,* cut.]

loc'u-lose, 1 lek'yu-lōs; 2 lō-cyu-lōs, *a.* Having loculi. [< L. *loculosus,* < *loculus:* see LOCULUS.] **loc'u-lous.**

loc'u-lus, 1 lŏk'yu-lus; 2 lō-cyu-lus, *n.* [-li, 1 -lı; 2 -lı, *pl.*] **1.** A small cavity or chamber; a cell; especially, any cellular compartment; separated from others by septa, as in pomegranates. Specif.: (1) *Bot.* (*a*) The cavity or cell of a carpel in which the seed or seeds are contained; locularment. (*b*) An anther-cell, or cell of an anther in which the pollen is contained. (2) One of the spaces between the septa of corals. **2.** *Arch.* A recess or small chamber in ancient tombs, designed for the reception of an urn or body. **3.** *Helminth.* A subdivision of a sucker of a tapeworm. Also, dim., **loc'u-le** (place.) **loc'u-lef.— Archimedean loculus,** a puzzle the solution of which consists in correctly reforming a square out of fourteen irregular sections into which it has been divided.

Loculus.

1. A gallery in the catacombs of Rome, showing loculi (def. 2). 2. Loculus in the Glass bottle embedded in the cement of the locul.

lo'cum-te'nens, 1 lō'kum-tē'nenz; 2 lō'-cum-te'nens, *n.* One who takes the place of another for a time; a representative or substitute; especially, in England, the temporary substitute of a clergyman or doctor. [LL., < L. *locum,* acc. of *locus,* place, + *tenens,* ppr. of *tenere,* hold.] **—lo'cum-te'ncy,** *n.*

lo'cu-ple'ta-tive, (*a*) lō'kyu-plē'tə-tiv; (*b*) lō'cyu-plē'ta-tiv, *a.* Having a tendency to enrich. [< L. *locupletans,* pp. of *locupletare* rich.]

loc'u-plete, 1 lŏk'yu-plīt; 2 lō'cyu-plēt, *a.* [Rare.] Wealthy.

lo'cus, 1 lō'kus; 2 lō'cus, *n.* [Slang.] **1.** To drug: render insensible by drink. **—to locus away,** to bear away while stupefied.

lo'cus', 1 lō'kus; 2 lō'cus, *n.* [-ci, 1 -sı; 2 -cı, *pl.*] [L.] **1.** A place; locality: chiefly in Latin phrases. See below. **2.** *Anal.* A place or area: used with a qualifying term; as, the *locus cæruleus* of the fourth ventricle of the brain. **3.** *Math.* A surface or curve regarded as traced by a line or point moving under specified conditions; any figure made up wholly of points or lines that satisfy given conditions; as, the *locus* of a point at a given distance from a fixed point (or, differently stated, of all the points at such distance) is a sphere whose center is the fixed point. **4.** *Optics.* A figure formed by the foci of a series of pencils of light. **5.** A passage in a writing in the plural, a series of passages, as from the Scriptures, suitably classified for reading or study; a book containing such passages. **6.** The place in a book from which a citation is made, usually following such citation.

—caudal locus, the terminal one of the cusps of a family of curves. **cusp'lo'cus†.—l. citatus,** the passage cited.—**l. classicus** [LOC CLASSICI, pl.], an illustrative passage from a standard work, or one that is regarded as the recognized or original authority.—**l. communis,** a common place; speech: (1) a public place; (2) a burial-place; (3) [LOCI COMMUNES, *pl.*], a general argument.—**l. delicti** (*Law*), the venue or place of an offense or crime.—**l. contractus,** **l. criminis†.—l. primo citatus,** the passage first cited. **pœnitentiæ** (*Law*), a formal release from an engagement at its initial stage.—**l. sigilli,** the place of the seal: used commonly in the abbreviated form L. S.) to indicate on a copied document the position of the seal in the original.—**l. standi,** a rightful position; specif., in law, a right to be heard in court, or, in England, before Parliament, especially with regard to private bills before the House.—**l. standi reports,** the reports of the referees on the rights of parties to be heard before Parliament.—**medial l.,** the position of the nodes of a system of curves.

lo'cus², *n.* [Slang.] A narcotic dose. **lo'cus‡.**

lo'cust, 1 lō'kust; 2 lō'cust, *n.* [Rare.] To destroy and devour like locusts: disguises.

lo'cust¹, *n.* **1.** One of various acridiid insects or grasshoppers, especially when destructive and migratory.

Pachytylus migratorius is the **common locust** of eastern Europe, Africa, and Asia; *Caloptenus italicus* and *Acridium peregrinum* are also found in Europe. The locusts of the Old World are notable for the immense swarms in which they periodically move, and their destruction to vegetation. *Caloptenus spretus* is the **Rocky Mountain l.,** notable for its ravages in the western United States. The eggs are usually laid in earth-en tubes.

Development of the Seventeen-year Locust.

1. Eggs within a punctured twig. 2. Newly hatched (subterranean) or barefoot-fly, as the locust is emerging from a periodical cicada on the ground. 4. Adult locust.

seventeen-year locust (*Cicada septendecim*). See illustration under CICADA.

The so-called "seventeen-year locust" is not a *locust,* or even distantly related to the true *locusts.* . . . The "seventeen-year locust," or, let us properly call him the seventeen-year cicada, belongs to the order Hemiptera, and is closely related to the familiar "dog-day," or harvest fly, an insect which in these regions buzzes loudly in the tree tops during the day in the hot August weather.

ALPHEUS DRYMALIS in *New York Times* Feb. 23, '11, p. 8, col. 6.

3. [North. Eng.] A cockchafer. **4.** [Austral.] Any insect of the genus *Orthoptera.* [< L. *locusta,* locust.]—**American locust,** the largest long-winged grasshopper (*Schistocerca americana*) of the United States.—**bald l.,** the annam.—**California devastating l.,** an acridiid (*Melanoplus plus devastator*) of the western United States, highly destructive to crops.—**Carolina l.,** an acridiid (*Dissosteira carolina*) widely distributed throughout the United States.—**clear-winged l.,** *Camnula pellucida.*—**clouded l.,** an acridiid (*Encoptolophus sordidus*) of the eastern United States.—**differential l.,** a grasshopper (*Melanoplus differentialis*) very destructive to cotton-crops in the southern United States.—**dog-day l.,** a cicadid insect (*Tibicen pruinosa*) of the United States.—**green-faced l.,** an acridiid (*Chortophaga viridifasciata*) of the United States.—**grasse'hor'cust,** *n.* A small grasshopper of the subfamily *Tettigine.*—**hooded l.,** a locusiid of the genus *Typhopeza,* found in the Malay Peninsula, having a muscular hood with which it covers its head in time of danger.—**leather-colored l.,** *Schistocerca alutacea.*—**lo'cust-bird",** *n.* A bird which feeds on locusts, as: (1) [India], the rose-colored pastor: (2) [S. Afr.], a white stork (*Ciconia alba*); (3) any prattincole.—**l. cañon,** *n.* **1.** The dial-bird. **2.** The rose-colored starling.—**l. hunter,** *n.* An oxpecker.—**l.-mite,** *n.* A diminutive mite (*Trombidium locustarum*) of a reddish color that feeds on the eggs of grasshoppers or locusts.—**l. shrimp,** *n.* The mantis-shrimp.—**red-legged l.,** *Melanoplus femur-rubrum.*—**spiny l.,** *Chloëaltis conspersa.*—**two-striped l.,** *Melanoplus bivittatus.*

lo'cust², *n.* **1.** A North-American tree (*Robinia pseudacacia*) of the family *Fabaceæ,* with a rough bark, odd-pinnate leaves, prickly stipules, loose slender racemes of fragrant white flowers, and flat linear pods. Its wood is very durable and is highly prized for fence-posts. **black or yellow locust.**

2. Any one of several other trees whose pods resemble those of *R. pseudacacia;* especially, in Guiana and the West Indies, the courbaril (*Hymenæa courbaril*), and in the Mediterranean region the carob-tree (*Ceratonia siliqua*), which is also found in New Zealand, the kowhai. **3.** Timber from the locust-tree. **4.** [U. S.] A policeman's truncheon, generally of locust-wood.

—African locust, same as NITTA-TREE.—**black l.,** the common locust.—**bristly l.,** a locust of the second variety of the common locust.—**bristly l.,** a mountain shrub (*Robinia hispida*) 3 to 8 feet high, with large rose-colored flowers: occurs from Virginia to Alabama, often cultivated.—**buffalo l.,** *Gleditschia* (*R. viscosa*) of the same habitat as the moss-locust, and often cultivated.—**lo'cust-bean",** *n.* The sweet pod of the carob-tree, which is the Mediterranean locust-tree.—**l.-beetle,** *n.* A coleopterous beetle (*Cylleneˆ obtecta*) whose larva destroys the locust-tree. **l.-borer'.—l.-berry,** *n.* The berry borne by the malpighiaceous shrub *Byrsonima spicata;* also, the fruit of *Hirtella,* native in the West Indies.—**l.-moth,** *n.* A small moth (*Depressaria robinella*) the larva of which preys on locust-leaves.—**l. saw-fly,** a tenthredinid fly (*Nematus similaris*) that feeds upon the leaves of the locust-tree. See SAW-FLY.—**l.-tree,** *n.* [New Zealand.] The yellow kowhai.—**prickly l.,** the bristly locust.—**spotted l.,** a variety of the common locust.—**tree l.,** the honey-locust.—**umbrella-l.,** a species of *Robinia* acaciæ cultivated in Europe for its shade.—**water-l.,** *n.* A spiny tree (*Gleditsia aquatica*), one of the honey-locusts. It has thin, fissured bark, pinnate or bipinnate leaves, and racemose flowers. The wood is reddish-brown, heavy, very hard, and strong.—**West-Indian l.,** the courbaril (*Hymenæa courbaril*). See HYMENÆA, 2.

lode, 1 lōd; 2 lōd, *n.* **1.** *Mining.* A somewhat continuous unstratified metal-bearing vein.

In general usage, a lode, gash vein, or ledge is a tabular deposit of valuable mineral between definite boundaries. Whether it be a fissure formation or not is not always known, and does not affect the question. Under the decisions of federal and local statutes and customs relative to *lodes.* But it must not be a placer, i. e., it must consist of quartz or other rock in place, and bearing gold and silver. W. RAYMOND *Glossary of Mining Terms.* [AM. INDP. MIN. ENGIN.]

Lode, originally a Cornish miners' term for mineral veins containing ore or more of the ores of the metals, is now used in that sense generally. The *lodes* usually occupy the intervening space between the opposite walls or "cheeks" of a fissure. In nearly all cases this fissure constitutes part of a fault, or dislocation, of the country rock on one side relative to that on the other. The ores, and their accompanying gangue or "rider," usually occur in a very irregular and sporadic manner throughout the height and length of the *lodes,* and their extent in a longitudinal direction generally much exceeds that from below upwards.

GOODCHILD & TWENEY *Technological Dict.*

The terms *dyke, lead, ledge, reef,* and *vein* are sometimes used as synonyms of *lode;* in Australia the use of *reef* is the most common. See these words.

2. *Hydraul. Engin.* A reach of water in a canal or other sleek water. **3†.** A path. [< AS. *lād,* < *Rihan,* go.]

—champion lode (*Mining*), the main vein as distinguished from branches.—**dead l.,** a lode exhausted of metal.—**live l.,** a lode containing metal-bearing ore.—**l. formation** [Austral.] (*Mining*), a layer or wall of metalferous material enclosed between definite walls of rock: usually the contents of a fissure in barren-country rock deposited by the action of water carrying metals in solution.—**mother l.,** a main lode.—**right-running l.,** a lode parallel to the axis of elevation of the district.

Lo'-ede'har, 1 lō'-ēd'hər; 2 lō'-ed'hār, *n.* *Bib. 2 Sam.* ix, 4.

lod'ed, 1 lōd'ed; 2 lōd'ed, *a.* Magnetized by a lodestone.

lodg'er, 1 loj'er; 2 lŏdj'er, *n.* One who lodges or lives in lodgings; often, one who occupies a room in a house but takes his meals elsewhere.

It is difficult to state exactly the distinctions between a *lodger* a guest, and a boarder. A person may be a guest at an inn without being a *lodger;* and boarder includes one who regularly takes his *meals with, and forms in some degree a part of,* the household's family; a *lodger* does not take meals in the house as *lodger;* but the duration of the inhabitancy is of no importance as determining his character. The difficulty in this respect is in deciding whether a person is an under-tenant, entitled to notice to

quit, or merely a *lodger*, and not entitled to such notice.
BOUVIER *Law Dictionary* Rawle's revision, vol. ii, p. 275.

—lodger franchise (*Eng. Law*), the suffrage granted in 1867 and 1884 to those whose unfurnished lodging rental amounted to £10 annually.

log', *n.* **1.** *Naut.* A device for estimating the speed of a vessel, either in the form of the old-fashioned **chip-log,** found on nearly all vessels but now rarely used, or the modern **patent log.**

The **chip-log** consists of (1) the *chip* (sometimes called the **log-chip, log-ship,** or simply *log*), a flat piece of wood, shaped like the sector of a circle of about six inches diameter, and weighted with lead along its rounded edge to keep it upright in the water; and (2) the **log-line,** attached by three strands to the corners of the chip and divided into equal spaces, called knots, which are arranged to bear the same relation to a nautical mile that the time of 30 seconds does to the hour. The line runs freely on a reel so that the chip practically remains stationary in the water while the vessel recedes from it. The time is measured by the **log-glass** marking either twenty-eight seconds (American and British naval practise) or thirty seconds, corresponding to a knot of 47 feet 3 inches or 50 feet 8 inches

log'a-phi'si-a, l lŏg'ə-fī'si-ə; 2 lŏg'a-fī'ṡhi-a, *n. Pathol.* Loss of ability to use articulate language correctly, due to cerebral disorder; a form of aphasia. [< Gr. *logos*, word, + APHASIA.]

log'a-rithm, l lŏg'ə-riдhm; 2 lŏg'a-rithm (XIII), *n. Math.* **1.** The exponent of the power to which a fixed number, called the base, must be raised in order to produce a

given number. **2.** In a former and broader sense, one of any series of numbers whose members correspond, each to each, with the natural numbers, but are in arithmetical progression when the latter are in geometrical, so that if the products of pairs of numbers are equal, the sums of the corresponding logarithms are also equal.

Logarithms in the modern sense of def. 1 have also the property described in def. 2, but are limited by the requirement that, whatever may be the base, the logarithm of 1 must be 0, so that processes of addition and subtraction of the logarithms correspond to multiplication and division of natural numbers. The first numerical systematic use of a **logarithm** is the difference between the logarithm and 10, which is the base in the decimal logarithms of Briggs. Tables of logarithms are mainly used to abridge computation. Thus, when two large numbers are to be multiplied, their logarithms are found in the table and added. The sum is the logarithm of the product sought. Logarithms were discovered by John Napier, who expounded them in his *Logarithmorum canonis descriptio* (Edinburgh, 1614). Professor Briggs of Oxford had the idea of taking 10 as the base and published a table from 1 to 1000 in 1618 which he enlarged in 1624. Vlacq, a Dutch mathematician, added to the work in 1628, and additions were made by Callet, 1783, and Lalande, 1802. To arrive at a system of logarithms two progressions are taken: a geometric progression beginning at unity and an arithmetical progression beginning at zero, and each term of the arithmetic progression is considered as the logarithm of the corresponding term of the geometric progression; thus

$$\begin{matrix} 1, & x, & x^2, & x^3, & \dots & x^n \\ 0, & y, & 2y, & 3y, & \dots & ny \end{matrix}$$

which shows us that ny is the logarithm of x^n, or taking 10 as a base, as in the **Briggsian** or **common** or **decimal** logarithms, we have

$$\begin{matrix} 10^{-1}, & 1, & 10^1, & 10^2 & \dots & 10^n \\ -1.0, & 0, & 1, & 2 & & n \end{matrix}$$

which shows us that n is the logarithm of 10^n or 2 the logarithm of 10^2. When the required number lies between values of 10 the logarithm is calculated to decimal places, and the integer part, which is known as the *characteristic*, written in the decimal part is called the *mantissa*. **Logarithms of sines, cosines, tangents,** etc. are calculated like those of numbers, and with the characteristic 10 added to them they appear as **tabular logarithms** in trigonometric tables. **Napierian** or **natural** logarithms have for a base 2.718281828 +. When x is infinitely small, in this system, the logarithm of $1 + x$ = x. [< Gr. *logos* (< *legō*, speak) + *arithmos*, number.]

— **Gauss's logarithms,** tables of logarithms so constructed as to find the logarithm of the sum or difference of two numbers when their logarithms only are given. **addition and subtraction l.'s.** — **hyperbolic logarithms** (*Math.*), logarithms which appear in the expression for the area of a figure bounded by a hyperbola and its asymptote. **natural l.'s.** — **logistic logarithm,** the logarithm of the quotient of 3,600 divided by a number. — **parabolic l.,** a real logarithm. — **proportional l.,** the difference between the logarithm of a number and the logarithm of 3,600.

log'a-rith'mic, 1 log'a-rith'mik; 2 log'a-rith'mic, *a.* Pertaining to, consisting of, or concerning a logarithm or logarithms. **log'a-rithm'mal'; log'a-rith-met'ic; log'a-rith-met'i-cal'; log'a-rith'mi-cal'.** — **logarithmic curve,** a curve whose ordinates are the logarithms of the corresponding abscissæ. — **logarithmic decrement,** the logarithm of the ratio of a quantity to the next in a decreasing series: applied usually to damped oscillations as of a galvanometer needle. — **elliptic,** the logarithmic ratio of two cylinders the directrix of one of which is a parabola and of the other an ellipse. — **l. scale,** a graduated slide-rule, combination of disks, or similar device, on which the logarithmic values are mechanically indicated: used in computation. — **l. series.** **1.** A series whose terms depend on logarithms. **2.** The expansion, in series, of the logarithm of $1 + x$). — **l. singularity** (*Math.*), a point near which a function behaves like a logarithm. — **l. spiral,** a spiral intersecting all radiants at the same angle. **logistic spiral.**

— **log'arith'mi-cal-ly,** *adv.* In relation to the method of logarithms. **log'a-rith-met'i-cal-ly.**

log'a-rith'mo-man'cy, 1 log'a-rith'mō-man'sē; 2 lŏg'a-rith'mō-măn'cy, *n.* Divination by the use of logarithms. [< LOGARITHM + -MANCY.]

log'a-rith'mo-tech'ny, 1 log'a-rith'mō-tek'nē; 2 lŏg'a-rith'mō-tĕk'ny, *n.* The art of calculating or using logarithms. [< LOGARITHM + Gr. *technē*, art.]

log'at, *n.* A small stick of wood. **log'gat.**

log'ats, 1 log'ats; 2 lŏg'ats, *n. pl.* [Eng.] A game in which each player tries to cast a wooden disk near to a jack, or wheel-shaped bowl. The player who tosses the pins nearest to the jack wins the game. **log'gats.**

log'-boat', etc. See under LOG, *n.*

log'book', **log'-chip,** etc. See under LOG, *n.*

loge, 1 lōzh; 2 lōzh, *n.* [F.] A theater-box; booth; stall.

Lo'ges, 1 lō'jēz; 2 lō'jĕz, *n. pl.* [L.] *Class. Antiq.* A raised stage used in the Roman theater, and in later times in those of the Greeks. **lo'gei-on; lo'gi-um.**

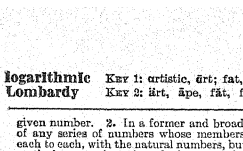
log'gey, 1 lŏ'gi; 2 lŏ'gy, *a.* **1.** A fat or heavy person. **2.** The surface in a fish-tank. [< LOG, *n.*]

log'fish', 1 lŏg'fish'; 2 lŏg'fish', *n.* The black rudder-fish.

log'gan, 1 log'an; 2 lŏg'an, *n.* A large boulder so nicely balanced as to rock easily; a logging rock; a rocking stone. [< LOG², *n.*] **log'an'**.

logged, 1, & 2, *a.* Same as LOGGA.

log'ge, 1 leg'e; 2 lĕg'e, *n.* [It.] Plural of LOGGIA.



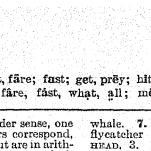
log'gen, 1 l lĕg'ĕn; 2 lŏg'ĕn, *a.* Made heavy or slow, as by logs, being soaked with water; water-logged; hence, stupid; insensate. **2.** Of land, cleared of timber by cutting it into logs.

log'ger, 1 leg'er; 2 lŏg'er, *vi.* [Prov. Eng.] To wabble, as a log.

log'ger, *n.* Heavy; stupid.

log'ger, *n.* **1.** One engaged in the occupation of logging. **2.** A structure consisting of two derricks with engines, used in a logging camp for hauling in the logs from both sides and loading them on flat cars.

log'ger-head', 1 log'er-hed'; 2 lŏg'er-hĕd', *n.* **1.** A stupid or thick-headed person; blockhead; dunce. **2.** A very large marine chelonioid turtle (genus *Thalassochelys*), as *T. caouana* or *caretta* of the warmer parts of the American Atlantic, which yields turtle-oil, and *T. olivacea* of the Indian ocean. **3.** A shrike (*Lanius ludovicianus*) of the United States. **4.** The steamer-duck. **5.** A bull-like mass or lump of iron, with a long handle, used when heated to melt pitch, heat liquids, explode charges, etc. **log'ger-heat'ʹ.** **6.** *Naut.* A post on the gunwale of a whale-boat around which the line is turned to retard the motion of a harpooned whale. **7.** [Local, Eng.] The chub. **8.** [W. Ind.] A flycatcher (*Tyrannus vostratus*). **9.** Same as HARD-HEAD. **10.** Anything with a head disproportionately large and heavy. **11.** A heavy pewter inkstand: formerly so called. **12.** Pl. one of the games consisting in connecting the piston-rod of an engine to the pumping-gear. **13.** *v.* [< HEAD.] — **at loggerheads,** engaged in a quarrel or dispute; contending. — **log'ger-head'-sponge',** *n.* One of various massive sponges of the Gulf of Mexico, so called from its resemblance to the logger-head (turtle). — **to fall, get, or go to loggerheads,** to come to blows.—



Loggia in the Vatican, Rome, decorated by Raffael.

log'ger-head'ed, *a.* Thick-headed; stupid; doltish; silly. **log'ger-head'ed-ness,** *n.*

log'gia, 1 loj'a; 2 lŏj'a, *n.* [It.] In Italian architecture: (1) A covered gallery or portico, especially when in the upper part of a building, having a colonnade on one or more sides open to the air. (2) A large ornamental window, often projecting from the wall, and forming a chief feature of the design, as frequently in Venetian architecture.

log'gin, 1 log'in; 2 lŏg'in, *n.* Prov. Eng.] A bundle of straw.

log'ging, 1 log'in; 2 lŏg'ing, *n.* **1.** The business of felling timber and getting out logs for market. **2.** Logrolling. — **log'ging-bee',** *n.* Same as LOG-ROLLING, 1.— **l.-bobs,** *n. pl.* Heavy sticks used for hauling logs. — **l. camp,** *n.* An encampment of loggers. — **l.-head,** *n.* The walking-beam in a steam-engine. — **l.-railway,** *n.* A single-track railway used in lumber-regions for conveying logs, as down a gentle slope. — **l.-wheels,** *n. pl.* Wheels about 10 ft. in diameter, used for transporting logs.

Logging-railway.

log'gy, 1 log'i; 2 lŏg'y, *a.* [Rare.] Heavy; stupid.

log'head', 1 leg'hed'; 2 lŏg'hĕd', *n.* Same as LOGGERHEAD, 1.

log'head'ed, 1 leg'hed'ed; 2 lŏg'hĕd'ĕd, *a.* Loggerheaded.

Lo'gi, 1 lō'gi, 2 lō'gi, *n. Norse Myth.* A god of fire personified in his contest with Loki.

log'i-a, 1 log'i-a; 2 lŏg'i-a, *n. pl.* [LOGI'ON, *sing.*] [Gr.] Literally, sayings; specif., collected sayings of Jesus that by tradition, and in some modern critical theories, furnish the basis of a main source for the four Gospels.

log'ic, 1 loj'ik; 2 lŏj'ic, *a.* **1.** Logical. **2.** [Rare.] Pertaining to the Logos, or to Jesus Christ as the Son and Word of God.

log'ic, *n.* **1.** The science or doctrine of reasoning; the principles governing the reasoning faculties in the pursuit and exposition of truth; also, a book on this science. It deals with all the forms of thought—conception, judgment, reasoning, and scientific system.

Logic may be divided, according to the forms of thought and expression, into (1) the **logic of conception,** treating of the *term*, (2) the **logic of judgment,** treating of the *proposition*, and (3) the **logic of reasoning,** treating of the *syllogism*, and (4) the **logic of construction,** treating of the *system*. It is distinguished as **theoretical, pure, formal,** as dealing scientifically with the laws and principles of thought in the abstract or in general, and **practical, applied, mixed,** as making application of these laws and principles to material thinking about thought. In its method it is either **deductive** or **inductive.** See DEDUCTION; INDUCTION; SYLLOGISM; MOOD. The conception and treatment of logic has varied with different philosophers. With Aristotle it was chiefly the a priori deduction of the relations to which was given the name of **formal logic,** and which maintained its supremacy until the time of Kant. While recognizing that the main function of logic is to secure pure thought or **general l.**, Kant developed a **transcendental l.** or critical theory of the nature and limits of cognition. With regard to logic became a metaphysical science, the dialectical exposition of the self-development of rational being. With Bacon and Mill the attention was directed rather to **inductive l.** as the positive method of the investigation of the discovery and exposition of their various truths. At present each science is committed to a somewhat special method, involving both induction and deduction.

Many writers, chiefly in recent years, have made no distinction between *logic* and epistemology, but it is perhaps better to use the word *logic* in the sense which it had for over two thousand years and in which it is now generally understood as relating to the science which deals not with the question, in what way must we think in order that we may think truly? and with the more fundamental questions, Is our knowledge valid at all? And if so, What must be the relation of the knowing consciousness to the object known? — **applied l.,** the application of the principles of logic to material thinking. — **formal l.,** that branch of logic which considers a universe of properties from the logical point of view. — **pure l.** = **formal logic.** **2.** Logic unmixed with the principles of any specific art; general abstract logic. — **symbolic l.,** logic in which symbols are substituted for the conceptions, judgments, etc., so as to use the principles of mathematical logic to obtain conclusions. — **algebraic l.**; **exact l.**; **mathematical l.**; — **traditional l.,** formal logic.

log'i-cal, 1 loj'i-kal; 2 lŏj'i-cal, *a.* **1.** Relating to or of the nature of logic; employed in logic; as, *logical* distinctions.

The *logical* ground of our judgments is various without end,—perception, testimony, reasoning, in every possible combination.

MANSEL, *Limits of Christianity, Restoration of Belief* p. 381. [L. o. & co. 1879.]

2. Conformed to the laws of logic; consistent in point of reasoning; as, a *logical* conclusion. **3.** Capable of or characterized by clear reasoning; versed in the principles of logic; as, a *logical* reasoner; he thinks in a *logical* manner. — **logical axioms,** the principles of identity, contradiction, excluded middle, and sufficient reason (which see). — **l. conviction,** rational conviction or conviction. — **l. machine,** a machine for ascertaining a logical conclusion by the mechanical action of certain keys which are assumed to represent certain terms or processes. — **l. subject** (*Gram.*), that about which something is said according to the real meaning or logic of the sentence; thus, in "it is human to err," *to err* is the logical or real subject, while *it* is the grammatical subject. — **log'ical-ism,** *n.* One of the mathematical school of logicians. — **log'i-cal-ly,** *adv.* According to the rules or principles of logic. — **log'i-cal-ness,** *n.* The character or quality of being logical. **log'i-cal'i-ty.**

log'i-cal-ize, 1 loj'i-kal-aiz; 2 lŏj'i-cal-īze, *vt.* [Rare.] To render logical. — **log'i-cal-i-za'tion,** *n.* **log'i-ci-za'tion'.**

log'ic-as'ter, 1 loj'ik-as'tar; 2 lŏg'ic-ăs'ter, *n.* A dilettante in logic. [< LOGIC + -ASTER.]

lo-gi'cian, 1 lo-jish'on; 2 lo-gish'an, *n.* **1.** One versed in logic, or an instructor in logic; an expert reasoner.

Newton was a *logician* by precept no less than by example.

BAIN, *Mind and Body* p. 157. [L. 1874.]

2. A student of arts preparing for a bachelor's degree in a medieval university. — **lo-gi'cian-cr't; lo-gi'cian-cr't.**

log'i-cize, 1 loj'i-saiz; 2 lŏj'i-cīze, *vi.* [Rare.] To use one's powers of logic; argue. **log'i-sēize'.**

lo'gie', 1 lō'gi; 2 lō'gi, *n.* [Theat.] Cheap stage jewelry.

log'ie', *n.* [Scot.] A cleared space in front of a kiln-fire.

log'ie's, *n.* [Brit. Guiana.] A wedded man or husband.

lo'gin, 1 lō'gin; 2 lō'gin, *n.* [Dial., U. S.] A stretch of smooth water in a stream or larger body.

log'i-on, 1 log'i-on; 2 lŏg'i-on, *n.* [pl. LOGI'A, *pl.*] [Gr.] A traditional maxim, doctrine, or truth set forth by a religious leader. In the plural, specif.: (1) [L.] Collections of sayings attributed to Jesus. (2) A certain collection which has been supposed to form an important part of the present Gospel according to Matthew. (3) Such agrapha (see AGRAPH), or extracanonical sayings of Jesus, as formed the basis of the *Logia* collection. (4) The collection of fragments attributed to Jesus discovered on papyri by Grenfell and Hunt at Oxyrhynchus, Egypt, in 1897 and 1903. These sayings, in the opinion of some critics, were used by the evangelists.

lo'gis-mog'ra-phy, 1 lō'jis-mog'ra-fi; 2 lō'gis-mŏg'ra-fy, *n.* In bookkeeping, any form of double entry. [< Gr. *logismos*, calculation, + -GRAPHY.]

lo-gis'tic, 1 lo-jis'tik, -ti-kal; 2 lo-gis'tic, -ti-cal, *a.* **1.** Logistical.

lo-gis'ti-cal, [Of, pertaining to, or skilled in calculation; [Of or pertaining to proportion; specif., made on a scale of the powers of 60; sexagesimal. **3†.** Logical. [< Gr. *logistikos*, < *logos*, speak.] — **logistical curve** or **line,** a logarithmic curve. — **l. logarithms,** see LOGARITHM.—

Logistic Curve.

l. spiral, same as LOGARITHMIC SPIRAL.

log'is'tic, *n.* **1.** [Pl.] Art of calculation; common practical arithmetic. **2.** Sexagesimal arithmetic.

lo-gis'ti-cs, 1 lo-jis'tiks; 2 lo-gis'tics, *n.* **1.** *Mil.* The branch of military science that embraces the details of moving or supplying armies. **2.** The general conduct of a campaign. **2.** Same as LOGISTIC.

log'jump'er, l.-loader, etc. See under LOG, *n.*

log'man, 1 log'man; 2 lŏg'man, *n.* [-MEN, *pl.*] **1.** A logger. **2.** [Local, U. S.] One who labors at logging.

log'mea'sur-er, *n.* See under LOG, *n.*

log'o-, 1 log'o-; 2 lŏg'o-. Before vowels, log-. A combining form. — **log-oc'a-cy,** *n.* [Rare.] Government or supremacy by the aid of words. — **log'o-cy'cle,** *a.* Circular-logarithmic. Logocyclic Curve. — **log-o-cyc'lic,** *a.* Pertaining to or characterized by the use of logocyclic curve, a curve that represents the theory of the geometrical origin of logarithms. — **log'o-dad'a-lus,** *n.* One devoted to words. — **log'o-ded'a-ly,** *n.* [Rare.] Skill in word-play; verbal legerdemain.

log'o-gram, 1 log'o-gram; 2 lŏg'o-grăm, *n.* **1.** An abbreviation or other sign representing a word, as *a.* for *ante*, *fig.* for *figure*, etc. **2.** In phonography, an arbitrary sign representing a short word or phrase in common use. **2.** A versified word-puzzle, in which certain words suggest synonyms that, being recombinations of some of the letters of the original word, furnish the clue to its discovery. **3.** A logograph. [< LOGO- + Gr. *gramma*, letter, < *graphō*, write.] — **log'o-gram-mat'ic,** *a.*

log'o-graph, 1 log'o-graf; 2 lŏg'o-grăf, *n.* **1.** A written word. **2.** An instrument for registering the sounds of the human voice; sometimes applied to the phonograph. **3.** [Rare.] *Print.* A logotype. [< LOGO- + GRAPH.] — **lo-gog'ra-pher,** *n.* **lo-gog'ra-phist,** *n.* **2.** One skilled in logography.— **log'o-graph'ic,** *a.* **1.** Of the nature of or representing by logographs. **2.** Relating to logography.— **log'o-graph'i-cal-ly,** *adv.* — **lo-gog'ra-phy,** *n.* **1.** In printing, the use of logotypes. **2.** The art of reporting speeches in longhand by several reporters, each taking a few words in succession.

log'o-griph, 1 log'o-grif; 2 lŏg'o-grĭph, *n.* A logogram, in which it is required to discover some word by a recombination of the letters or elements of various given words or by guessing such words from the letters (when correctly arranged) form the word to be guessed. **2.** [Rare.] Any anagram or puzzle which involves an anagram. — **log'o-gri'phic,** *a.*

log-o'la-try, 1 lo-gol'a-tri; 2 lō-gŏl'a-try, *n.* Excessive regard for verbal or literal accuracy. [< LOGO- + Gr. *latreia*, service.]

log-o-lept, 1 log'o-lept; 2 lŏg'o-lĕpt, *n.* A word-maniac: said of a writer who has a passion for sensational uses or combinations of words. [< LOGO- + Gr. *lēptas*, taken.]

lo-gol'o-gy, 1 log-ol'o-ji; 2 lō-gŏl'o-gy, *n.* [Rare.] The doctrine of the Logos. **2.** [Rare.] Same as PHILOLOGY.

lo-gom'a-chy, 1 lo-gom'a-ki; 2 lo-gŏm'a-cy, *n.* [-CHIES, 1 -kiz; 2 -cīz, *pl.*] A strife about mere words; also, a wordy contest without deeds.

One of the main disputes among our clergy has reference to the question, Whether Christ died for all men, or only for those who believed, and which, if any, is the more *logomachic*.

J. W. ALEXANDER *Familiar Letters* vol. i, p. 72. [s. 1870.]

2. Any one of various games of word-making, in which cards containing each one letter are used. [< Gr. *logomachia*, < *logos*, word (see LOGOS), + *machomai*, fight.]

— **log'o-mach'ic, -i-cal,** *a.* — **lo-gom'a-chist,** *n.* One who wars about words; a disputatious person. **log'o-mach.** — **lo-gom'a-chize,** *vi.*

log'o-man'cy, 1 log'o-man'sē; 2 lŏg'o-măn'cy, *n.* Augury practised through definite magical phrases.

log"o-ma'ni-a, 1 log"o-mē'ni-a; 2 lō̤g"o-mā'ni-a, *n.* A species of cerebral disturbance, characterized by excessive and uncontrollable loquacity.— **log"o-ma'ni-ac,** *n.*

lo-gom'e-ter, 1 lo-gom'e-ter; 2 lo-ġom'e-ter, *n.* 1. A logarithmic scale. See LOGARITHMIC. 2. A scale for ascertaining chemical equivalents. [< LOGO- + Gr. *metron*, measure.] — **log"o-met'ric, log"o-met'ri-cal,** *a.*— **log"o-met'ri-cal-ly,** *adv.*

log-om'e-ter, 1 log-om'i-ter; 2 lōg-om'e-ter, *n.* Naut. A patent log for a ship: a misnomer. [< LOG², *n.*, + Gr. *metron*, measure.]

Lo-gone', 1 lo-gōn'; 2 lo-ġōn', *n.* 1. A district, formerly a native state, in Kamerun, W. Africa, S. of Lake Chad; capital, Logone. 2. A river in Kamerun; length, 250 m. to Bahia river.

log"o-neu-ro'sis, *n. Pathol.* A mental disorder causing forgetfulness and defective use of language: a vague, general term for all forms of aphasia, agraphia, etc.— **log-on'o-my,** *n.* The science of language.— **log-op'a-thy,** *n. Pathol.* Disorder of speech due to disease of the brain.— **log"o-ple'gi-a,** *n. Pathol.* A paralytic condition, in which the pronunciation of particular words becomes impossible.— **log"o-ple'gic,** *a.*— **log'or-rhe'a,** *n. Med.* Very rapid speech; volubility. **log"or-rhe'an.**

Log'os, 1 log'os; 2 lōg'os, *n.* 1. *Theol.* The divine creative Word, the Son of God, the second person of the Trinity, both in his preexistent and in his incarnate condition. Philo Judæus, by syncretizing ideas and language of the current Neoplatonism with the scriptural doctrine of the Divine Word, had developed a doctrine of the Logos in some respects similar to, but in other important respects different from, that found in the first chapter of the Gospel according to John.

2. Originally, reason manifesting itself in the power of speech; speech; word. (1) The Stoic conception of the rational, informing, and controlling principle in the universe. (2) The Platonic conception of reason as a manifestation of the Divine Being. (3) In gnosticism, a being intermediate between God and the world, one of the Æons of God. Compare EON, 2. [< L. *logos*, < Gr. *logos*, < *legō*, speak.]

log'o-thete, 1 log'o-thēt; 2 lōg'o-thēt, *n.* 1. An auditor of accounts; specif., in the Byzantine empire, (1) the treasurer of a department, or (2) the chancellor of the empire. 2. The chancellor of the Patriarch of Constantinople. [< LOGO- + Gr. *thetos*, va. of *tithēmi*, place.]

log'o-type, 1 log'o-tīp; 2 lōg'o-tīp, *n. Printing.* a type bearing a syllable, a word, or words. Compare LIGATURE.

I have deemed it advisable to contrive a new pair of composing cases . . . introducing a number of logotypes which were often, of, to, re, an, in, th, in, as; they were not printed as ligatures which I denominate *logotypes*.

The meridian of Greenwich has now been adopted with practical unanimity by all nations as the prime or first meridian, being officially known as longitude 0°. Longitudes may be expressed either in time (**longitude in time**) or in degrees (**longitude in arc**), and is usually determined by ascertaining as exactly as possible the difference between the local time of the place under consideration and Greenwich time, every hour of difference being equal to 15 degrees of longitude, either east or west, the local time being in the former case faster, and in the latter behind, that of Greenwich. Thus, the longitude of New York city, where the local time differs from Greenwich time by 4 hours and 56 minutes, or 74° west, or, as expressed in arc, 5h 56m west. Longitude is reckoned east and west to 180°, where the two systems meet as the antipodes, the meridian running through the 180th degree of arc being both of a degree of longitude at the equator is 69.16 statute miles, and decreases continually, as the poles are approached, being 53 statute miles in the latitude of New Orleans, 43 that of London, 34½ that of Petersburg, and 0 at Franz-Josef Land. Compare LATITUDE.

As the distance half round the Earth is 180°, the greatest *longitude* a place can have is 180°.

J. N. Lockyer *Elements of Astron.* p. 88. [a. 1889.]

2. The angular distance from the vernal equinox to the foot of the perpendicular from a heavenly body upon the ecliptic: usually termed *celestial longitude*. **3.** The angular distance between the earth's center and the sun's center as taken as the central point.

3†. [*Naut.*] **a.** *Longitudo (-din-)*, < *longus*, long.]

— longitude by dead-reckoning, the longitude of a ship as calculated approximately from an estimate of the course and distance run when weather or other conditions prevent the taking of an accurate observation. See DEAD-RECKONING. **i. by account**†; **i. of account.**—**i. of node** (*Astron.*), the angular distance from the vernal equinox as measured in an easterly direction along the ecliptic.—**i. of perihelion** (*Astron.*), the heliocentric longitude of a planet or comet when it reaches the point in its orbit nearest the sun. — **i. of place,** the distance along the line of the ecliptic to the node of the orbit and then along the orbital curve to the perihelion-point.—**i. rime,** a mnemonic rime for the longitude when working a chronometer-sight, which runs:

Greenwich time best [ahead], Longitude west:
Greenwich time least [behind], Longitude east.

— i. star (*Astron.*), any one of certain bright stars, whose right ascension has been accurately determined, employed in determining longitude by the nearly obsolete method of lunar distances, such as Aldebaran, Regulus, Antares, etc.

lon'gi-tu'di-nal, 1 lon'ji-tiū'di-nel; 2 lŏn'gĭ-tū'dĭ-năl, *a.* **1.** Of, pertaining to, or consisting in length; as, *longitudinal* distance. **2.** Running lengthwise, as distinguished from *transverse*; as, the *longitudinal* diameter of a body; the *longitudinal* veins of an insect's wings.

BULWER-LYTTON *Last Days of Pompeii* p. 25. [T. Y. C.]

[< AS. *lufian*, love.] **Syn.:** see ADMIRE; LIKE. Compare LOVE, *n.* Altho their distinction in meaning is one of the peculiar felicities of the English language, *love* and *like* are often confounded in use. We *love* that which ministers to our affections; we *like* what ministers to appetite, taste, fancy, etc. A man *loves* his wife and children; he *likes* roast beef; he *likes* some good-natured acquaintance whom he could not be said to *love*, except as he should *love* all men; he *likes* a fast boat, a fine house, a pleasing picture, a brisk walk, a chat with friends, a ride through the country, etc.

love^1, *n.* **1.** A strong complex emotion or feeling inspired by something, as a person or a quality, causing one to appreciate, delight in, and crave the presence or possession of the object and to please or promote the welfare of that object; the yearning or outgoing of the soul toward what is apprehended and regarded as good or excellent from any point of view or in any relation; devoted affection for or attachment to: strictly applicable to persons. Compare AFFECTION; BENEVOLENCE; COMPLACENCY.

Love includes complacency, desire, and delight, and has rational beings for its objects.
HODGE *Theology* vol. i, p. 427. [S. 1872.]

2. Specif., such feeling between persons of opposite sex, based on or affected by sexual attachment; the affection subsisting between husband and wife, or between lover and sweetheart.

Marrying for *love* may seem to be a very silly thing, to a woman of the world, but marrying without *love*, for a consideration, is wicked. HOLLAND *Titcomb Letters* p. 128. [S. 1870.]

3. One who is beloved; a sweetheart: often used as a term of endearment.

I dreamed last night of our darling boy, He shouted aloud for glee;
O *love*, but it filled my heart with joy His ruddy health to see.
W. C. WILKINSON *Consolation* st. 1.

4. Animal passion, or the gratification of it. **5.** [L-] A personification of the love-passion; also, an embodiment of such a personification; specif., Cupid (Amor) or Eros.

Love knoweth every form of air. N. P. WILLIS *The Annoyer* st. 1.

(2) In Tasmania, the blue creeper (*Comesperma volubile*). **9.** [Colloq.] Anything highly pleasing; as, a *love* of a bonnet. **10.** A form of euchre. **11**†. A kindness. **12**†. A thin silk stuff. [< AS. *lufe*, < *lufian*, love.]
Syn.: affection, attachment, attraction, charity, devotion, feeling, fondness, friendship, liking, passion, regard, tenderness. *Affection* is kindly feeling, deep, tender, and constant, going out to some person or object, being less fervent and ardent than *love*, whether applied to persons or things. *Love* is the yearning or outgoing of soul toward something that is regarded as excellent, beautiful, or desirable; *love* may be briefly defined as strong and absorbing *affection* for and *attraction* toward a person or object. *Love* may denote the sublimest and holiest spiritual *affection*, as when we are taught that "God is *love*." *Charity* has so far swung aside from this original meaning that probably it never can be recalled (compare BENEVOLENCE). The Revised Version uses *love* in place of *charity* in *1 Cor.* xiii, and elsewhere. *Love* is more intense, absorbing, and tender than *friendship*, more intense, impulsive, and perhaps passionate than *affection*; we speak of fervent *love*, but of deep or tender *affection*, or of close, firm, strong *friendship*. *Love* is used specifically for personal *affection* between the sexes in the highest sense, the *love* that normally leads to marriage, and subsists throughout all happy wedded life. *Love* can never properly denote mere animal passion, which is expressed by such words as appetite, desire, lust. One may properly be said to have *love* for animals, for inanimate objects, or for abstract qualities that enlist the affections, as we speak of *love* for a horse or a dog, for mountains, woods, ocean, or of *love* of nature, and *love* of virtue. *Love* of articles of food is better expressed by *liking*, as *love*, in its full sense, expresses something spiritual and reciprocal, such as can have no place in connection with objects that minister merely to the senses.— **Ant.:** see synonyms for ANTIPATHY; ENMITY; HATRED.— **Prep.:** Love *of* country; *for* humanity; love *to* God and man.— **for love,** without compensation; as, to play *for love;* to work *for love.*— **for l. or money,** under any circumstances; for any consideration; as, he would not do it *for love or money.*— **in l.,** under the influence of a tender affection for one of the opposite sex.— **labor of l.,** labor undertaken for love of another, or without expectation of compensation.— **love'-af-fair",** *n.* All that happens with a particular person in an experience of the tender passion.

Not half of the *love affairs* among the youth of Christendom end in marriage. G. H. CALVERT *Goethe* p. 146. [L. & S. 1872.]

By *'lumber,'* we are reminded that Lombards were the first pawnbrokers, even as they were the first bankers, in England: a *'lumber'*-room being a 'lombard'-room, or room where the pawnbroker stored his pledges.

TRENCH *On the Study of Words* lect. iv, p. 171. [c. p. & co. 1888.] [Perhaps < LOMBARD, the Lombards having been pawnbrokers: but cp. LUMBERS, *n.*]

lum'ber-dri'er, *n.* A lumber-kiln. See KILN.—

lum'ber-jack', *n.* [Northwestern U. S.] A lumberman.— **l.-measure,** *n.* [U. S.] **1.** Board-measure. **2.** A contrivance for calculating the measurement of superficial feet in timber of varying dimensions.— **l.-part,** *n.* [U. S.] *Naut.* A loophole cut in the bow of a lumber-ship for convenience in loading and unloading heavy logs or timber.— **l.-room,** *n.* A garret or chamber for disused household articles.— **L. State,** Maine.— **l.-wagon,** *n.* **1.** A wagon suitable for hauling lumber. **2.** [U. S.] A rough, heavy, springless wagon or box wagon suitable for farm-work.— **l.-yard,** *n.* [U. S. & Canada.] A yard for the storage or sale of lumber.

lum'berd, *pp.* Lumbered.

lum'ber-man, 1 lum'ber-man; 2 lūm'ber-măn, *n.* [-MEN, *pl.*] **1.** [U. S. & Canada.] A man engaged in the lumber-industry, as a forest proprietor, or lumberer. **2.** Specif., a foreman of lumberers: distinguished from a *logger*. **3.** A vessel employed in the lumber-trade.

Lum'ber rh'er. A river in North Carolina; length, 140 m. to Little Pedee river.

Lum'ber-ton, 1 lum'ber-tən; 2 lūm'ber-ton, *n.* A town in Pearl River county, Miss.

lum'bi-plex, 1 lum'bi-pleks; 2 lūm'bi-plĕks, *n.* *Anat.* The lumbar plexus of nerves.

lum'bo-, 1 lum'bo-; 2 lūm'bo-. From Latin *lumbus*, loin: a combining form.— **lum'bo-ab-dom'i-nal,** *a.* Of or pertaining to the lumbar region and the abdomen; as, a *lumbo-abdominal* nerve.— **lum'bo-a-or'tic,** *a.* Of or pertaining to the lumbar portion of the aorta.— **lum'bo-co-lot'omy,** *n.* *Surg.* The operation of making an incision into the large intestine or colon through the loin or in the lumbar region. **lum'bo-cos'to-my†.** — **lum'bo-cos'tal,** *a.* Of or pertaining to the lumbar region and the ribs; as, the *lumbocostal* ligament.— **lum'bo-dor'sal,** *a.* Of or pertaining to the lumbar region and the back; as, the *lumbodorsal* fascia.— **lum'bo-dyn'i-a,** *n.* Muscular pain in the loins; lumbago.— **lum'bo-il'i-ac,** *a.* *Anat.* Relating to the lumbar vertebræ and the ilium; as, the *lumbo-iliac* ligament is triangular.— **lum'bo-in'gui-nal,** *a.* Of or pertaining to the loins and the groin.— **lum'bo-sa'cral,** *a.* Of or pertaining to the loin and the sacrum.— **lum'bo-ver'te-bral,** *a.* Of or pertaining to the lumbar vertebræ.— **lum'bovertebral index** (*Anat.*), the ratio between the posterior and anterior measurements of the lumbar vertebræ.

lum'bric, 1 lum'brik; 2 lūm'brik, *n.* [Rare.] A worm, especially an earthworm. [< L. *lumbricus*, stomach-worm.]

— **lum'bri-cal,** *a.* & *n.* **1.** *Anat.* Relating to or one of four vermiform muscles found in the hand and the foot. **2.** Resembling a *lumbricus* or worm.— **Lum-bric'i-dæ,** *n. pl.* *Helminth.* A family of worms, now mostly restricted to meganephric earthworms, having sperm-sacs without diverticula, or entirely absent.— **lum'bri-cide,** *n.* *Med.* A vermifuge.— **lum'bric-i'form,** *a.* Like an earthworm.

— **Lum'bric-i'na,** *n. pl.* *Helminth.* A tribe of oligochætous worms including the earthworms.— **lum'bri-cin'e,** *a.*— **lum'bri-coid,** *a.* & *n.* **1.** *Anat.* Same as LUMBRICAL. **2.** *Helminth.* A family of roundworms (*Ascaris lumbricoides*) in the intestines.— **Lum'bri-cu'li-dæ,** *n. pl.* *Helminth.* A family of limicolous oligochætous worms having all the sanguiferous vessels contractile and two rows of setæ on each side. **Lum-bric'u-lus,** *n.* (*t. g.*) — **lum-bric'u-lid,** *n.*— **lum-bric'u-loid,** *a.*— **Lum'bri-cus,** *n.* **1.** A genus typical of *Lumbricidæ*. **2.** [L.] An earthworm.

Lum'bri-ne-re'i-dæ, 1 lum'bri-ni-rē'i-dē; 2 lūm'bri-ne-rē'i-dē, *n. pl.* *Helminth.* A family of polychetous worms without gills, the dorsal cirri being absent. **Lum'bri-ne'ris** (*t. g.*) [< L. *lumbricus*, earthworm, + *Nereis*; see NEREIS.]— **lum'bri-ne're-id,** *n.*— **lum'bri-ne're-oid,** *a.*

lum'bus, 1 lum'bus; 2 lūm'bus, *n.* [Rare.] The loin.

lum'bus, 1 lum'bus; 2 lūm'bus, *n.* [-BI, 1 -bū; 2 -bī, *pl.*] [L.] The region of the loins.

lu'men, 1 lū'men; 2 lū'mĕn, *n.* 1. [-MI-NA, *pl.*] A passage-way, as the hollow of a tube. Specif.: (1) *Anat.* & *Zool.* The cavity of a tubular organ.

By the sending out of certain nerve-impulses, the muscular contractions diminish the lumen of the artery.

J. C. CUTTER *Comprehensive Physiology* p. 68. [l.]

(2) *Bot.* The internal space or cavity of a cell. **2.** *Photom.* A unit of light-flux through a square centimeter perpendicular to the rays, at a distance of one centimeter from a uniform point-source of light (candle-power, or, more properly, through a square centimeter one meter from a unit-source. [L., light, < *lucco*, shine.] — **Lumen Christi** (*Eccl.*), the vesture sung to a candle-flame during the procession of the sacred fire or light on Holy Saturday.

lu'mière', 1 lü'myār'; 2 lü'myĕr', *n.* [F.] A slit in the vizor of a medieval helmet, for seeing; eyesslit. See illus. under ARMOR, 1. **lu'mi-ere'†.** — **lu'mi-ar'y,** *a.* Of, pertaining to, or affected on the moon by the earth, and an analogous phenomenon observed on Venus.

lu'mi-nal, 1 lū'mi-nal; 2 lū'mi-nal, *a.* Of or relating to a lumen; as, the *luminal* walls of a cell

lu'mi-nance, *n.* [Rare.] The property of giving light; luminousness.

lu'mi-nant. [Rare.] **I.** *a.* Luminous; enlightening. **II.**

lu'mi-na-rist, 1 lü'mi-nā-rist; 2 lū'mi-nā-rist, *n.* *Art.* One skilful in rendering effects of light and shade. [< *luminary.*]

lu'mi-na-ry, 1 lü'mi-nā-ri; 2 lū'mi-nā-ry, *n.* [-RIES, 1 -riz; 2 -rĭz, *pl.*] **1.** Any body that gives light; specif., one of the bodies in the heavens that are sources of light.

Moore asserts that the earth existed before the sun was given as a *luminary*. Modern science proposes a theory which explains how this was possible.

GEIKIE *Hours with the Bible* vol. i, p. 43. [c. p. 1881.]

2. One who enlightens men or makes clear any subject; as, a legal *luminary*. **3†.** An illumination.

lu'mi-nate, 1 lü'mi-nāt; 2 lū'mi-nāt, *v.* [< L. *luminatus*, < *lumen*, light.] L. *lumen* = see LUMEN.]

lu'mi-na'tion, *n.* **1.** [Rare.] A flashing out as of light; outburst. **2†.** Illumination.

lu'mi-na'tor, *n.* *Scot. Hist.* A sizar or servitor at St. Andrew's University.

lu'mi-nē', *n.* Same as ILLUMINATE.

lu'min(e)s, *n.* [Rare.] Luminiferous ether, the medium of light.

lu'mi-nesce', 1 lü'mi-nes'; 2 lū'mi-nĕs', *vi.* To become luminescent.

lu'mi-nes'cence, 1 lü'mi-nes'ens; 2 lū'mi-nĕs'ĕns, *n.* *Physics.* A light-emission not directly attributable to the heat that produces incandescence.

The forms of luminescence are named according to the sources from which they arise, thus: **auto-luminescence** (from radioactive substances, as *uranium*, or self-luminous animals, as the *firefly*); **cathode-l.** (from the subjection of certain bodies to cathode rays); **chemi-l.** (from chemical action); **crystallo-l.** (from the crystallization of certain bodies); **electro-l.** (from gases in vacuum tubes subjected to electric oscillations of high frequency); **photo-l.** (from light or invisible rays); **pyro-l.** (from heating during exposure and *phosphorescence* when exposure ceases); **thermo-l.** (from suddenly warming certain bodies previously exposed to light); **tribo-l.** (from friction); etc. — **lu'mi-nes'cent,** *a.* Emitting or capable of emitting light apart from incandescence.

lu'mi-nif'er-ous, 1 lü'mi-nif'er-us; 2 lū'mi-nĭf'er-ŭs, *a.* **1.** Emitting or producing light; luminous. **2.** Transmitting or conveying light; as, the *luminiferous* ether. [< L. *lumen* (*lumin-*) (see LUMEN) + *fero*, bear.]

lu'mi-nism, 1 lü'mi-nizm; 2 lū'mi-nĭzm, *n.* *Art.* A painter whose chief study it is to render the effect of light in atmosphere, as certain impressionists. **lu'mi'nist†** [F.].

lu'mi-nol'o-gist, 1 lü'mi-nol'o-jist; 2 lū'mi-nŏl'o-jist, *n.* **1.** One who makes a study of illuminated manuscripts. **2.** One who studies luminescence in living organisms. [< L. *lumen*, light, + -OLOGY.]

lu'mi-nom'e-ter, 1 lü'mi-nem'i-ter; 2 lū'mi-nŏm'ē-ter, *n.* An appliance for gaging the brilliancy of light.

lu'mi-nos'i-ty, 1 lü'mi-nes'i-ti; 2 lū'mi-nŏs'ĭ-ty, *n.* **1.** The quality of being luminous; luminousness; also, something luminous. **2.** The intensity of light in a color by photometric measurement.

Langley and Very compared the light of insects with that of the sun by superimposing their spectra and found that the spectrum of the sun, with equal *luminosity*, extends farther both toward the violet and the red ends of the spectrum. . . . Among insects, besides the well-known fireflies, *luminosity* is confined to a few other beetles, as certain Elaterida.

New Internat. Encyc. vol. xii, p. 536. [D. M. & CO.]

[< LL. *luminositas*, < L. *luminosus*; see LUMINOUS.]

lu'mi-nous, 1 lü'mi-nus; 2 lū'mi-nŭs, *a.* **1.** Giving or radiating light; shining; luminiferous; in a restricted sense, emitting original light, or self-luminous; as, the sun is a *luminous* body; some plants are *luminous*.

With a mind, in its nature, of flame, not merely illuminated, but *luminous*, Plato shines with his own light.

JOHNSON *Thoughts* &c. by Calvert p. 153. [w. v. s. 1867.]

2. Full of light; well lighted; bright; as, a *luminous* room; a *luminous* landscape. **3.** Giving light to the mind; perspicuous; lucid; as, *luminous* statements [< F. *lumineux*, < L. *luminosus*, < *lumen*; see LUMEN.] **lu'mi-nal-ru-ous†** [Rare]. SYN.: see BRIGHT.

— **lu'mi-nous-ly,** *adv.*— **lu'mi-nous-ness,** *n.* **1.** Intellectual clearness; lucidity. **2.** Luminosity.

lum'mas-kin, 1 lum'a-kin; 2 lŭm'a-kĭn, *a.* [Dial., Eng.] Clumsy; heavy.

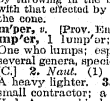
Lum'mi ri'er, 1 lum'i; 2 lŭm'ī. A river in Whatcom county, Wash.; Cascade mountains to Bellingham Bay.

lum'mox, 1 lum'oks; 2 lŭm'ŏks, *n.* [Prov. Eng. & Colloq., U. S.] A heavy or clumsy fellow **lum'mux.**

lum'my, 1 lum'i; 2 lŭm'y, *a.* [Slang.] Admirable; clever.

lump. 1 lump; 2 lŭmp, *v.* **I.** *t.* **1.** To form into a lump; heap indiscriminately; throw into a mass. **2.** To take or to consider in the gross or collectively; as, he *lumped* the facts. **3.** [Slang.] To put up with as one may from necessity; as if you don't like it you may *lump* it. **4.** [Slang, Eng.] To gulp. **5.** [Prov. Eng.] To flog. **II.** *i.* **1.** To do service as a stevedore or lumper. **2.** To grow lumpy; bulk. **3.** [Prov. Eng.] To look glum; sulk. **4.** To move like a lump; plump; plod.

lump, *n.* **1.** A shapeless mass of inert matter, especially a small mass; as, a *lump* of earth or of sugar. **2.** A mass of things thrown together; aggregate; gross **3.** A protuberance; excrescence. **4.** *Med.* A tumor. **5.** A nipple-seat on a gun-barrel: also, a metal projection on a break-joint breech-loader. **6.** A stupid person. **7.** The lumpfish. **8.** [Gk. Brit.] (1) A sort of brick or tile. (2) A double brick. [< Sw. Norw. *lump*, stump.] **lumpe,** Syn.: see MASS.



— **in a lump, in the lump,** all together; with no distinction.— **l. coal,** coal in very large pieces.— **l. sugar,** refined sugar broken into pieces of various sizes.— **1. sum,** a gross sum covering several items.— **1. work,** work contracted for or taken in the aggregate.— **to have a l. in its speed** (*Mech.*), said of a machine when the motion that is created by throwing in the back-gear is not in geometrical ratio with that effected by changing from one step to another of the cone.

lum'per, *n.* [Prov. Eng.] Same as LUMBER².

lump'er, 1 lump'er; 2 lump'er, *n.* [Prov. Eng.] **1.** One who lumps; especially, in zoology, one who lumps several genera, species, etc., in one: opposed to *splitter*. [C.] **2.** *Naut.* (1) A dock-hand; longshoreman. (2) A heavy lighter. **3.** A militiaman. **4.** A sweater; a small contractor; a middleman. **5.** A river thief. **6.** [Eng.] A coarse kind of potato.

lump'et, 1 lump'et; 2 lŭmp'ĕt, *n.* [Rare.] A small lump.

lump'fish', 1 lump'fish'; 2 lŭmp'fĭsh', *n.* A cyclopteroid fish of northern seas, especially *Cyclopterus lumpus*, with a small spinous dorsal fin, a dorsal row and three lateral rows of tubercles, no scales, and the ventral fins united to form a sucker. **lump'suck'er†.**

Lumpfish. 1/12

Sluggish fishes feeding on small animals and plants. . . . The common *lumpfish* of our coasts is the largest member of the group, growing to a length of 2 feet or more. The male makes pits in the sand between stones, in which the female deposits the eggs; he watches over them and also over the young, which cling to his body with their suckers.

BOULENGER *Cambridge Natural History* vol. vii, p. 699. [MACM '10.]

lump'ing, 1 lump'ing; 2 lŭmp'ĭng, *a.* **1.** Heavy; bulky; hence, colloquially, big. **2.** Of or pertaining to putting things together indiscriminately; as, *lumping* methods of bookkeeping.— **lump'ing-ly,** *adv.*

lump'ish, 1 lump'ish; 2 lŭmp'ĭsh, *a.* Like a lump; gross; inert; hence, stupid.— **lump'ish-ness,** *n.*

lump'jaw', *n.* Actinomycosis of the lower jaw.

lump'kin, 1 lump'kin; 2 lŭmp'kĭn, *n.* [Prov.] A clumsy, unlovely person.

Lump'kin, *n.* **1. Joseph Henry** (2 11/16 1790–5/6 1/4 1867), a Chief Justice of Georgia, 1845. **2. Wilson** (1/4 1/4 1783–12/16 1870), an American lawyer; brother of Joseph H.; United States senator, 1837–1841. Governor of Connecticut. **3.** A county in N. Georgia; 282 sq. m.; county-seat, Dahlonega. **4.** A town in Stewart county, Ga.

lumps, *pp.* Lumped.

lump'y, 1 lump'i; 2 lŭmp'y, *a.* [LUMP'I-ER; LUMP'I-EST.] **1.** Consisting of or full of lumps; as, *lumpy* clay; *lumpy* dough. **2.** *Naut.* Running in confused, pounding waves that do not break; as, a *lumpy* sea. **3.** Of large size or gross. **4.** [Slang, Eng.] Drunk.— **Lump'i-ly,** *adv.*— **lump'i-ness,** *n.*

Lu'na, 1 lū'na; 2 lū'na, *n.* **1.** *Rom. Myth.* The goddess of the moon and of months, corresponding to the Greek Selene; patron of races. **2.** [Poet.] The moon, personified. **3.** An ancient town in Etruria, Italy. Its ruins are now called Luni. **4.** A county in New Mexico. **5.** In alchemy, silver. **6.** [l-.] The luna-moth. **7.** *R. C. Ch.* A lunette. **8.** *Arch.* A panel in the blazonry of princes. [L., moon, < *lucco*, shine.]

lu'na-cy, 1 lū'na-si; 2 lū'na-cy, *n.* [-CIES, 1 -siz; 2 -cĭs, *pl.*] **1.** *Pathol.* An intermittent form of insanity: formerly supposed to be dependent on the changes of the moon; hence, in general and legal use, mental unsoundness in any form or degree, as distinguished from *idiocy*. See INSANITY.

At first two kinds of insanity only seem to have been recognized by English law — idiocy and *lunacy*: . . . the lunatic, who hath sometimes his understanding, and sometimes not.

MAGNA CARTA *Responsibilities in Mental Diseases* p. 80. [l. a. 1876.]

2. Exaggerated foolishness; wild folly; wanton and senseless conduct. [< LUNATIC.] SYN.: see ABERRATION; INSANITY.— **master in lunacy,** [Eng.] 1. A member of a board appointed by the Lord Chancellor to inspect asylums and issue licenses to private persons to have the care of lunatics. **2.** One of two legal officers appointed to investigate cases of alleged insanity and to make orders regarding the persons and estates of lunatics.

lu-nam'bu-lism, 1 lu-nam'bū-lizm; 2 lū-năm'bŭ-lĭzm, *n.* [Rare.] Somnambulism attributed to the influence of the moon. [< L. *luna*, moon, + *ambula*, walk.]

lu'na-moth', 1 lū'na-mŏth'; 2 lū'na-mŏth', *n.* A large North-American bombycid moth (*Actias luna*), expanding about 3 inches, having light-green wings with long

"tails," marked by a purplish anterior margin and a translucent crescentic spot surrounded by yellow, blue, and black rings. It appears in the evening, or during still warm nights, flitting about with ghostly beauty.—**lu'na-silk'worm**, *n.* The caterpillar of the lunamoth bended obliquely with yellow, which feeds on the foliage of forest trees, and spins a very thin cocoon enclosed in a folded dead leaf.

Luna Moth. 1/4

lu'nar, ı lū'nər, 2 lū'nar, *a.* **1.** Of or pertaining to the moon: lunary; crescented or orbed; like the moon. The *lunar* volcanoes differ from the terrestrial in their enormous dimensions and immense number.

E. Loomis *Astronomy* rev. ccxxv, p. 121. [a. 1874.]

2. Measured by revolutions of the moon. The *lunar* year still continues in use among the Arabs.

Rawlinson *Herodotus* vol. ii, bk. ii, p. 239, app. [a. 1885.]

3. Lunate. **4.** Caused or affected by or attributed to the moon; as, *lunar* insanity, influence. **5.** *Anat.* Of or pertaining to the lunare. **6.** In alchemy and medicine, of or pertaining to silver; as, *lunar* caustic. [< L. *lunaris*, < *luna*; see LUNA.]

It is the chief church in Germany, the state church in Scandinavia, and extends into Baltic Russia.— **The United Lutheran Church of America** was formed November 15, 1918, by the merging of: (1) the *General Synod*, formed in 1820, which adheres to the Augsburg Confession less strictly than the others, and whose congregations are Anglicized; (2) the *General Council*, organized in 1867 (whose congregations comprise German, Swedish, and English-speaking peoples), and less strict in its confessionalism than the Synodical Conference; (3) the *United Synod in the South*, formed in 1886, by the union of the "Southern General Synod" (constituted in 1863 by synods cut off by the "Northern General Synod"), and two independent synods, having the same confessional basis as the General Council, but adhering to it less consistently. Outside this merger are the *Synodical Conference*, the largest body, organized in 1872, consisting of the synods of Missouri, Wisconsin, Minnesota, and Michigan, and having the strictest confessional requirements, and (5) the *United Norwegian Lutheran Church*, organized in 1889, which includes one-fourth of the Scandinavian population of the United States. The Lutheran Church has three ecumenical creeds in common with other orthodox churches — the Apostles', the Nicene, and the Athanasian. Its distinctive confession is that of Augsburg, but some of the European state churches and some of the synods in America receive also the Apology for the Augsburg, the two catechisms of Luther, the Articles of Schmalkald, and the Formula of Concord. These nine symbols are grouped in the *Book of Concord.* Compare REFORMED GERMAN CHURCH.

-ly¹, *suffix.* Like; of the nature of; belonging or pertaining to: used to form adjectives from nouns; as, manly; godly; goodly. Compare LIKE. [< AS. *-lic*, *-līc*, form; see LIKE, *a.*]

-ly², *suffix.* In a (specified) manner: used to form adverbs from adjectives, or (rarely) from nouns; as, brightly; softly; longingly. In some cases *-ly²* is added to *-ly¹* (*-ly* being then changed to *-li*); as, *worthily*. In other cases the forms of the adjective and adverb are identical: as, he spoke kindly, or in a kindly tone. In old English the suffix was *-līce*, *-līċe*, or *-līċes*; in Middle English it became the form of *-liche*; it has been suggested that the final *k* sound was lost as in the form *-tk* from which we have the pronoun *I*, and *-ly* has become the predominant adverbial ending in modern English. It should be noted that the ending becomes abbreviated to *-y* in the case of words derived from French adjectives ending in *le*, as *nobly*, possibly. [< AS. *-līce*, *-līċe*, *-līċes*.]

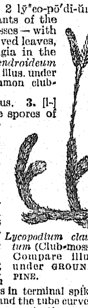
ly'co-pin, 1 lɑi'ko-pin; 2 lȳ'co-pĭn, *n.* *Chem.* A brownish compound obtained from the resin of the bugleweed (*Lycopus virginicus*), and used in medicine as an astringent and narcotic. [< Gr. *lykos*, wolf, + *pous*, foot.]



ly'co-pod, 1 lɑi'ko-ped; 2 lȳ'co-pŏd, *n.* Any plant of the family *Lycopodiaceæ.* [< LYCO- + Gr. *pous* (*pod-*), foot.] — **ly-cop'o-dal,** *a.*

Ly"co-po-da'les†, 1 lɑi"ko-po-dē'līz; 2 lȳ"co-po-dā'lēs, *n. pl.* *Bot.* A former alliance comprising most of the fungi now included in the order *Lycopodiales.*

ly'co-pode, 1 lɑi'ko-pōd; 2 lȳ'co-pōd, *n.* Same as LYCOPODIUM, 2.

Ly"co-po"di-a'ce-æ, 1 lɑi"ko-pō"dɪ-ē'sɪ-ī; 2 lȳ"co-pō"di-ā'çe-ē, *n. pl.* *Bot.* A small family of cryptogamous plants — the club-mosses — with small lanceolate or awl-shaped simple leaves arranged in two or many ranks on trailing or erect stems. The spores are of one kind, borne in spore-cases or solitary in the axils of the leaves. [< LYCOPODIUM.] — **ly"co-po"di-a'ceous,** *a.* — **Ly"co-po"di-a'les,** *n. pl.* *Bot.* An order of pteridophytes — club-mosses — containing the living families *Lycopodiaceæ*, *Isoetaceæ*, and *Selaginellaceæ*, and also two families of fossil plants that were abundant in the Pennsylvanian (Upper Carboniferous) period. Dichotomous branching of root and stem and the production of sporangia singly at the leaf-bases or in the leaf-axils are characteristics of this order. — **ly-cop'o-din,** *n.* *Chem.* An alkaloidal compound ($C_{32}H_{52}N_2O_3$) isolated from the festoon ground-pine. **ly-cop'o-dine‡.** — **Ly"co-po-di'tes,** *n.* A somewhat artificial genus of Paleozoic plants with homophyllous branches covered with scale-like leaves, resembling the living lycopods.

Ly"co-po'di-um, 1 lɑi"ko-pō'dɪ-um; 2 lȳ"co-pō'di-ŭm, *n.* **1.** *Bot.* A genus of evergreen plants of the family *Lycopodiaceæ* — the club-mosses — with moss-like stems, 4 to 16 rows of 1-nerved leaves, and copious spores borne in sporangia in the axils of leaves or in spikes. *L. dendroideum* is the ground-pine or tree club-moss (see illus. under GROUND-PINE), *L. clavatum*, the common club-moss or running pine. **2.** [l-] A plant belonging to this genus. **3.** [l-] An inflammable yellow powder, the spores of various species of club-moss (*Lycopodium*), especially *L. clavatum* (used in pharmacy as an absorbent medium for excreted matter, and also as a coating for pills) and *L. selago* (used as an emetic and cathartic). Other varieties are *L. phlegmaria* (useful as an aphrodisiac), *L. rubrum* (a remedy for elephantiasis), and *L. saussurus* (a purgative and convulsant). Lycopodium is also used in the manufacture of fireworks on account of its extreme inflammability. [< LYCO- + Gr. *pous* (*pod-*), foot.] — **lycopodium powder,** same as LYCOPODIUM, 3.

Lycopodium clavatum (Club-moss). Compare illus. under GROUND-PINE.

Ly-cop'sis, 1 lɑi-kop'sɪs; 2 lȳ-cŏp'sis, *n.* A genus of four Old World species of annual herbs of the borage family, with alternate leaves and small bluish flowers in terminal spike-like racemes. The corolla is salverform and the tube curved. *L. arvensis*, the small bugloss, is now common in the northeastern United States. [Gr.]

Ly'co-pus, 1 lɑi'ko-pus; 2 lȳ'co-pŭs, *n.* *Bot.* A small genus of perennial herbs of the mint family, growing in wet places in temperate regions. Their white or purple flowers, arranged in dense axillary whorls, have bell-shaped, four-cleft corollas, and but two perfect stamens. *L. virginicus* is the common bugleweed. [< Gr. *lykos*, wolf, + *pous*, foot.]

Lyc"o-re'a, 1 lik"o-rī'ə; 2 lȳc"o-rē'a, *n.* **1.** The ancient name of one of the two peaks of Mt. Parnassus. Those who slept there were said to become either inspired or mad. Now **Mt. Li"a-kou'ra.** **2.** An ancient town on or at the foot of the peak.

ly"co-rex'i-a, *n.* *Pathol.* Wolfish hunger; ravenous appetite. — **lyc'o-rin,** *n.* *Chem.* A crystalline alkaloid substance ($C_{32}H_{32}N_2O_8$) occurring in certain plants of the genus *Lycoris.* **lyc'o-rine‡.** — **Ly-co'ris,** *n.* *Bot.* A genus of bulbous-rooted plants, natives of China and Japan, belonging to the family *Amaryllidaceæ.* They have pink or yellow flowers in clusters, with simple fringed stigma and the waved segments of the spreading perianth curving upward. Several species are in cultivation.

The term is said to be derived from the name of Charles Lynch (1736–1796), a patriotic Virginian who during the Revolutionary war punished lawless persons summarily. **Lynch's law‡.**

Lynch-law is an outbreak of the reformatory spirit among people of low or recent civilization.

E. EGGLESTON *Grayson* p. 135. [c. ca.]

Lynch law is frequently prevalent in sparsely settled or frontier districts where government is weak and officers of the law too few and too powerless to enforce law and preserve order. The practice has been common in all countries when unsettled frontier conditions existed, or in periods of threatened anarchy. . . . *Lynch law*, not civil law, cleared the western forests, valleys, and mountain passes of horse and cattle thieves, and other robbers and outlaws, gamblers and murderers. This was especially true of California in the years of the '49 rush.

Lynx, 1 liŋks; 2 ŀiŋks, *n.* **1.** A genus of the family *Felidæ*, or subgenus of the genus *Felis*, characterized by the short tail, tufts on the ears, relatively long and powerful legs, and 2 instead of 3 premolars in the upper jaw. It is represented by various species and subspecies in all parts of the north temperate zone, and by the caracal in northern Africa. 2. [l-] A wild cat of the genus *Lynx*. The *common lynx* of Europe and Asia (*Lynx borealis*) is still found in the wilder mountainous parts of the Old World, and its fur is sought for garments and robes. The spotted Canada lynx (*L. canadensis*) is the most common species in the United States, and is uniformly grayish; the bay lynx is somewhat smaller, and more reddish, in Eastern specimens, becoming yellower and increasingly spotted toward the Pacific coast. All these lynxes are very local or almost stationary in their distribution: they have the general habits of predatory cats, varying locally with the nature of their habitat and food. Rodents form their principal fare, with birds and their eggs and young in the nesting-season. The great Canada lynx subsists in winter mainly upon hares, but is able to pull down wild sheep and goats, or even small deer under favorable circumstances. Its practise is to watch a runway, a trail, a stream or rock, and leap upon passing prey of the larger sort, and to stalk smaller animals. The fur of all varieties is valuable, especially that of the spotted Canada lynx.
